

**ABC-X-FILE symptom list:** The ABC file is methodologically the most important because the assignment of symptoms to the planes of the cause-effect formula,  $A + B > C$ , can be found here. The symptoms of repertorization can be arranged like a domino according to this letter code.

In addition, at the beginning of each chapter of the list of symptoms you will also find the translations of the body locations into their meanings:

\* MIND \* Burn out \* VERTIGO \* HEAD \* Scalp \* Temples \* head side \* EYES \* Lids, eyelids \* Eyebrows \* Conjunctiva, conjunctiva \* SEE \* EARS \* NOSE outer, inner \* root of nose \* sinuses \* FACE \* upper jaw \* lower jaw \* temporomandibular joint \* chin \* lips \* upper lips \* lower lips \* mouth; around the \* forehead \* cheek \* MOUTH \* gums \* tongue \* TEETH \* upper teeth \* lower teeth \* incisors \* molars \* wisdom teeth \* NECK \* THROAT inner, pharynx \* esophagus \* esophagus \* trachea \* trachea \* STOMACH, ventriculus \* cardia, gastric orifice \* pylorus, pylorus \* ABDOMEN \* Hypochondria \* intestine, small intestine \* liver \* gallbladder, bile \* Groin area, groin problems \* navel \* pancreas \* solar plexus, solar plexus \* diaphragm \* duodenum, duodenum \* RECTUM, RINDEX \* Anus, Anus \* perineum, perineum \* STOOL \* BLADDER \* urethra \* KIDNEYS \* URINE, URINE \* GENITALIA male + female \* Sterility \* GENITALIA; MALE \* testicles \* penis \* GENITALIA; FEMALE \* Tubal Problems \* Ovaries, Ovaries \* Uterus, Uterus \* Cervix, Cervix \* Vagina \* LARYNX, LARYNX \* Vocal Cords \* SPEECH & VOICE \* BREATHING \* COUGH \* CHEST \* Armpit, Axilla \* Sternum, Sternum \* Clavicle \* Chest - Heart \* Chest - Lungs \* Chest - Mammae, Female Breasts \* BACK \* Thoracic Spine \* Dorsal Spine \* Cross, Sacral Region \* Sacroiliac joint \* Lumbar Region, Lumbar Region \* Neck Problems, Cervical Region \* Coccyx, coccygeal region \* EXTREMITIES \* Joints \* Joint flexures \* Nails \* Tendons \* Extremities - Arms \* Elbows \* Upper arms \* Shoulders \* Shoulder joints \* Forearms \* Extremities \* Legs \* Heel \* Feet \* Soles of feet \* Buttocks \* Hip joints \* Knees \* Ankles, \* Hocks \* Thighs \* Lower legs \* Toes \* Extremities - Hands \* Fingers \* Thumbs \* Palms \* Wrists \* Backs of hands \* SLEEP \* DREAMS \* CHILL \* FEVER \* SWEAT \* SKIN \* GENERAL \* Secretions, excretions \* Abscess, tendency to suppuration \* Blood vessels \* Hypertension \* Hypotension \* Bones \* Cartilage \* Development, stages of life \* Lymph glands, lymph nodes \* Musculature \* Thyroid gland \* phlegm \* pain \* eating \* drinking

Standardization of symptom selection part 1: Article 1: Beyond gut feeling:

- a. Encoding by capital letters:** For the hierarchy method according to Part 1, selection criteria of symptoms for repertorization are presented. Hierarchization means the ranking of symptoms according to their relevance to the case. Before Vitoulkas the focus was on the noticeable and unusual symptoms, after him on the psychological symptoms. In my approach, I compose the disease process from the three dynamic planes: emotional plane (A), causal plane (B) and reaction plane (C) according to the cause-effect formula  $A + B > C$ . i.e. the plane of disease symptoms, is of particular importance. I assume that not all symptoms of a case are of central importance. The aim is to repertorize the symptoms that are centrally relevant to the case. This means that the mechanics of the disease are emotionally based at the core, which can only be understood by understanding the person and her emotional situation
- A particularly noticeable symptom does not necessarily have to be relevant to the illness. It is therefore important to record the focus of the disease - usually found at plane (C) - and the causes with the associated symptoms and symptom combinations. Combined symptoms cut across two planes, creating a mandatory logical connection so that the letter codes can be used like dominoes.

So if you have an AC symptom (psychosomatic) and a BC symptom (symptom with modality), you have a suitable symptom for repertorysation from each plane. Of course, provided that the plane (C) symptom belongs to the same organ or organ system. I call this commonality synchronicity. This creates the prerequisites for making maximum use of the repertory.

**b. Synchronicity of organs and organ systems:** At reaction plane (C), the plane of disease symptoms, the organic synchronicity criteria apply, namely that the same physical location also means similarity in content (IMPORTANT!). This results in the simple reference described above, that all singular and combined symptoms with the same body location can be used for repertorization. This applies to symptoms of the same organ and the same organ system.

**Same organ:** All symptoms that occur in the same organ at the same time are to be synchronous.

**within an organ system:** All symptoms that occur in the same organ system at the same time are to be synchronous.

- (NS) Nervous system: CNS, peripheral NS, neurological complaints, neuralgia, nerve pain;
- (SEX) hormonal problems: sex organs: vagina, uterus, ovaries, mammae or penis, testicles, prostate;
- (CIRC) circulatory system / lymphatic system: heart, rush of blood, pulsation head, arteries, veins, kidneys, allergies;
- (URO) kidneys > ureters > bladder > urethra
- (LAW) lower airways DOWN, inner throat > larynx > lungs,
- (HEAD) brain, scalp, sides of head, back of head, cranium, vertigo,
- (UAW) upper airways, nose inside, sinuses, ear INSIDE, sounds, balance, throat-
- (ALIM) alimentary canal: mouth > pharynx > tonsils > esophagus > stomach > intestines > anus;
- (MSS) musculoskeletal system, spine, joints, bones, tendons, muscles;
- (FACE) Facial skin: forehead, temples, cheeks, chin, lips, OUTSIDE nose, OUTSIDE ear, incisors
- (SKIN) skin, scalp, facial skin, skin of extremities, trunk; hair, head hair; teeth;

When considering which symptoms of a case represent the **center of the disease** process, the "ranking list" of symptoms also plays a role on the mechanical level discussed here. This means the severity of the disease. The present ranking from top to bottom comes from Prafull Vijajakar (book: Theory of Repression), who did it according to the cotyledons. It makes a difference whether a disease affects the surface (e.g. ectoderm) or is located in an organ (e.g. mesoderm).

The mind naturally stands above all appearances:

**Mind:** sensory sensitivity: light, smell, hearing, touch, pain, temperature;

Then follows on the body level:

**Cell:**

**CNS:**

**endocrine glands:**

**Mesoderm:** circulatory system, heart, kidneys, lungs, breast, lymphatic system, blood, cartilage + joints, bones, muscles + tendons, connective tissue + hypodermis,

**Endoderm:** urogenital tract, liver + bile, stomach + intestines, tonsils + inner throat, bronchi, larynx, paranasal sinuses,

**Ectoderm:** ears, eyes, tonsils, mouth, skin

**c. Numerical rating according to the importance of the symptom.** However, when assessing a case, we are not only dealing with defined locations on the body level. The numerical coding behind the capital letters should be some sort of ranking of the symptom within its plane.

Measured against the criteria under point a. this ranking is less important. You can't choose the symptoms, the reality of what is present determines our actions. So these numbers are just an indication; if you set the center of the disease correctly, everything else falls into place

I assume three levels of increasing destructiveness for the symptoms of each level (A), (B) and (C). So these ratings are just a suggestion.

• **Emotional level (A): irritability (sensitivity), impulsiveness, emotionality;**

1.: Expression of sensitivity, attitude towards reality that leads to likes and dislikes.

E.g.: fears;

2.: psychosomatic symptoms are physical consequences of mental symptoms. E.g. headache from excitement

3.: severe psychological symptoms of extreme sensitivity or distortion of reality, delusions. E.g.: neuroses, paranoia, psychoses, autism, anorexia etc.

• **Causal level (B): stimulus, causality, causality.**

1.: Modalities: aggravating or ameliorating circumstances. E.g. heat improves condition;

2.: Physical symptoms with modalities: aggravating or ameliorating circumstances as the cause of a local reaction. E.g. heat relieves headache;

3.: Serious causes of internal (development-specific) or external (violent) origin: birth, puberty, etc. or injury, surgery, shock, oppression, abuse, accidents, etc. E.g.: birth shock;

• **Reaction level (C): Reaction, consequences of a cause.**

1.: local emotion (pain, heat, cold, etc.). E.g.: throbbing headache

2.: Inclusion of several localizations or symptoms of internal contradiction e.g. spasmodic, constricting.

3.: Destruction: Body level: necrosis, paralysis, tumors, ulcers, etc..

In Part 1 I show how one can compose a case from symptoms that belong to several levels according to their letter code. If all three letters are present in the code, it is almost always a symptom of systemic relevance.

## Standardization of the choice of symptoms according to Part 2: Article 2: Illness and emotion.

In order to be able to extend the hierarchy method according to Part 2, it is necessary to code the symptoms not only according to their respective planes (A), (B) and (C), but also according to their dynamic criteria. I discovered that with the dynamic directions (>) and (<), coding is not only more complicated, but also more error-prone. Therefore, when surveying patients, I always try to obtain the appropriate symptoms for the methodology shown in Part 1.

This is not always possible. In some cases we can only find the relevant symptoms through their dynamics. However, if the symptoms of the case allow it, security equivalent to that of the ABC method can also be achieved in this way. I demonstrated this procedure in part 2 as part of the example case of part 1.

If indifferent symptoms can be found on all three levels (A), (B) and (C) (><), which also match each other in terms of content, this certainty can be achieved. This is significant because systemic illnesses, trauma or developmental disorders have an indifferent characteristic.

### **The coding according to dynamics:**

**Explanations of the logic of the procedure for coding the symptoms with external > or < internal or >< indifferent arrow signs:**

**Meaning of the arrows:** Coding was carried out according to these criteria.

< INTROVERSION = negative social dynamic = passive, Vector moves away from the social outside, points to the ego center, attacks himself, his tendency to avoid challenging social contacts or expectations leads to tension of expectations, dependence on familiar social relationships, external control or developmental delay.

> EXTRAVERSION = positive social dynamic = active, Vector moves away from the ego center, points to the social outside as a positive social dynamic, so he is sociable, he is responsible, committed, reflects, faces social life up to the point of aggression, his sensibilities lie in a lack of attention and recognition.

>< INDIFFERENT symptom markings mean a fluctuation between extraversion and introversion. They can be used "universally" in the described method to combine symptoms. Since I view serious illnesses as indifference, they could still be very important for better-suited remedy prescriptions.

### **Dynamic encodings can be found in all three files, ABC, B and C:**

These dynamic assignments for the **mind symptoms** of plane (A) can be found in the **ABC file**.

If you call up the **B file** (plane B), you will find this coding for the **modalities**, i.e. the improving and aggravating circumstances.

In the **C file** (plane C), it was performed for the **properties of body symptoms** (e.g. the type of pain).

Measured at planes (B) and (C), the assignment of A symptoms according to dynamic criteria is difficult. Basically, you have to know that the dynamics of feelings and emotions are described through everyday language and therefore cannot be determined with certainty depending on how the language is used. For this reason, it was necessary to use translations of symptoms to assess dynamics. I have added them to hundreds of them to make the decisions more transparent.

Finally, I would like to note that the methodology I offer here is the mechanical basis of the disease process. It is particularly safe if the case is such that one can select the symptoms for repertorization according to part 1 of the article (A,B,C methodology) or within the framework of the indifferent approach according to part 2 (><). In practice, it is important to consider that the dynamic of the illness is based on the circumstances and the personality of the sick person. This dynamic is often characterized by an individual behavior that do not necessarily only show itself in symptoms of plane (A) but also in a characteristic symptom of the other two planes.

In practice we have to deal with inhomogeneous repertories. Depending on the symptoms present, finding a suitable remedy will therefore move between logical content-related approaches and the use of the classic Hahnemannian conspicuous and special symptom. More security cannot be achieved with our repertories. The reason is that the largest remedy has over 17,000 symptoms and the smallest has under 100 symptoms, the internal distribution within each drug test of mental, physical and general symptoms varies significantly. In addition, there are many other problems that we have to learn to deal with, because an ideal repertory is not currently in sight and will not be any time soon.

\* **MIND: Conflict, not being able to reconcile the idea of yourself and the world with reality**

## **Code A, AB, BA**

**at night; Activity BA 1/>:**

**Eat; lazy after BA 2/<:**

**Alcoholism BA 3/<:**

**Age; Problems in childhood BA 3/><:** developmental delay

Reading exhausts AC 2/<:

**Age; Problems old age BA 3/><:**

**adopted children BA 3/?:**

**Children who want to be able to do everything straight away BA 3/><:**

**Baby bites the spoon BA 3/><:** developmental delay

**nipple of mother; bites in BA 3/>< when breastfeeding:**

Glass; bites the (baby) BA 3/><:  
Children; bite to bite BA 3/><:  
Perforation; bite at BA 3/><:  
weaning; Complaints according to (baby side) BA 3/><:  
 Abortion; Complaints by BA 3/>: separation problem  
numbness + headache A 2/<:  
numbness, fatigue with anxiety CA 2/<:  
 Effort, overspending, frustrated effort, business failure, loss of money; Complaints from futile exertion A 1/<: exertion  
 Unemployment, loss of position, job loss Complaints from A 1/>: desire to work  
Disability; Complaints from situations of physical A 3/<:  
 being deceived, cheating; Mood complaints from A 1/<: victim situation  
 paternalism; Mood complaints from A 1/<: victim situation  
 humiliation, insult, rudeness, contempt; Mood complaints from BA 1/<:  
 indignation, indignation; Mood complaints from A 1/<: emotional disruption  
 Disappointment; Mood complaints from A 1/<: victim situation  
 Excitement; Mood complaints from A 1/<: avoids social confrontations  
 are sick on certain occasions; Children BA 3/><: developmental delay  
 anticipation tension, stage fright; Complaints by A 1/><: fear of failure  
 excesses; Mood complaints after sexual (shock) BA 3/><:  
 mental exertion; Complaints by A 1/<:  
 breathing problems; mental exertion causes AC 2/<:  
 grief; Complaints by A 1/>:  
 Grief, complaints from loss of money BA 1/>:  
 nervous exhaustion from grief AC 2/>:  
 Laugh; Complaints from excessive A 1/><:  
 Lovesickness, complaints from disappointed love A 1/>:  
 disregard, non-acknowledgment; Mood complaints from BA 1/<:  
 abuse, sexual abuse, rape; Complaints by BA 3/><:  
 suppresses sexual abuse BA 3 /<:  
 moral impressions; Mood complaints from A 1/>: like him, everyone has to obey the rules  
In the morning; Mind symptoms, mind problems in the morning BA 2/<: anticipation  
 tension  
 news, atrocities in movies, television; Emotional problems due to bad BA 3/>: threat to  
 social cohesion  
nervous tension; Complaints by A 2/><:  
 Shame; Emotional complaints from A 1/<: desire to avoid  
 strokes of fate; Emotional complaints from BA 3/><: feels attacked  
 shock sequence, shock worse; Complaints from shock, threatening living conditions,  
 intensive measures, resuscitation, intensive care unit BA 3/><:  
 consequences of shock, shock worse; Complaints from fright, shocking excitement  
 BA 3/><: feels attacked unexpected  
 Electricity; Shock by: BA 3/><  
 Spasms from fright: BAC 3/><  
 Psoriasis from fright, shock BAC 3/><  
 Write; Complaints by A 1/<: lack of social understanding  
 Sexuality; Emotional complaints from suppressed A 1 />: repressed commitment  
 blame, criticism; Complaints by BA 1/<: unexpected attack  
 death of relatives, child, parents, partner; Emotional complaints from A 3 /<:  
 children; Complaints from the death of A 3 /<:  
 animals; Complaints from the death of A 3 /<:  
 anger; mood problems caused by A 1/<: emotional disruption  
 suppressed anger; Emotional complaints from A 1 />: because of social claims  
 Trembling, trembling from anger BAC 2/<:  
 suppressed excitement; Complaints by BA 1/>:  
 Sexuality; suppressed BA 1/>:

. religious reasons, fear of punishment; suppresses sexuality from BA 3/>:  
 Responsibility; Emotional complaints from BA 1/>: social commitment  
 embarrassment, helplessness; Complaints by BA 1/<:  
 Neglect; Complaints by A 1/>: social sensitivity  
 Mother; Complaints about neglect by A 1/>: see above "Neglect; Complaints about";  
 Father; Complaints due to neglect by the A 1/>: see above "Neglect; Complaints by";  
 Anger; Complaints from A 1/<: see below "anger";  
 being deceived, deception; Feeling A 1/>:  
 Alcohol; Unconsciousness, fainting from BA 3/>: controlling typology  
 exertion or overexertion; Unconsciousness, fainting at/after BA 2/<:  
 getting up from bed; Unconsciousness, fainting at BA 3/>: desire to avoid  
 Movement worsens unconsciousness, fainting BA 3/<:  
 looking at an object; unconsciousness, fainting with long BA 3/<: desire to avoid  
 childbirth; Fainting at BA 3/><:  
Vomiting with (causes) unconsciousness, fainting BA 2/>: loss of connection  
 Eat; Unconsciousness, fainting after BA 3/<: desire to avoid social connection  
 driving, horseback riding (active); Fainting at BA 3/>: to be dependent on binding  
 reciprocity  
 smells, sensitivity to smells; Unconsciousness, fainting from BA 3/>: sensitive for social  
 consensus  
 floral fragrance; Unconsciousness, fainting BA 3/>:  
 eggs; Fainting from the smell of open BA 3/>:  
 food and kitchen odours; passed out by BA 3/>:  
raising arms above head; Unconsciousness, fainting from BA 3/<: avoids presence;  
 Hunger; Fainting from BA 3/>: loss of connection  
 Church; Fainting in BA 3/<: dislike society  
 Lay; Unconsciousness, fainting at BA 3/>: loss of connection  
Menses; Unconsciousness, fainting with the BA 3/><: social distance  
Menses suppression; Loss of consciousness, fainting at BA 3/>: wishes distance  
Menopause; Unconsciousness, fainting in BA 3/><: fears loss of connection  
 Music; Unconsciousness by BA 3/<: problem to find the same beat  
 Space; Unconsciousness, fainting in a crowded with people BA 3/><:  
Scarlet fever; Unconsciousness, fainting at BA 3/><: developmental delay  
Pregnancy; Unconsciousness, fainting in BA 3/><: development problem  
 sunstroke; Unconsciousness, fainting at BA 3/><:  
Bowel movement; Fainting at BA 3/>: loss of social connection  
Bowel movement; Fainting after BA 3/>:  
Bowel movement; Fainting before BA 3/>:  
 injury shock; Fainting from BA 3/><: feels attacked unexpected  
 warm room; Fainting in BA 3/<: feels socially harassed  
 alcoholic delirium, delirium tremens BA 3/>: loss of control  
 Dusk, dawn; Mental symptoms in BA 2/><:  
Sleep; Delirium in BA 3/>: loss of control  
 closing the eyes; Delirium at BA 3/>:  
sadness, melancholy A 3/>: disappointed strive for reciprocity  
abortion Depression, sadness, melancholy after BA 3/>:  
 alone; Depression, sadness, melancholy if BA 3/>:  
 Darkness; Sadness BA 3/>: lack of connection  
awakening; Sadness at BA 3/><: between wakefulness and sleep  
 Eat; Sadness after BA 3/<:  
climacteric, menopause; Depression in BA 3/><: developmental problem of old age  
 head injury; Depression according to BAC 3/><: feels attacked  
Menses; Depression before BA 3/><:  
Menses; Depression during BA 3/><: not to be valued anymore  
Menses; Depression after BA 3/><:  
Menses, menses suppressed by sadness BA 3/><:

**Music; Depression caused by BA 3/<:** problem to find the same beat  
**fog, winter, cloudy weather; Depression, Sadness BA 3/><:**  
**semen discharge; Sadness after BA 3/>:** not to be valued anymore  
**Pregnancy Depression BA 3/><:** development problem  
**Postpartum depression BA 3/><:** lost of contact with baby  
**Duodenal ulcer due to depression BA 3/>:** feeling to be unsuitable  
**children; Jealousy, envy at BA 3/><:** not to be valued anymore  
**newborn gets all the attention; Jealousy, envy if the BA 3/><:**  
**Children; stubborn, unyielding, unruly BA 3/><:** problem of development  
**old Age; Feeling of loneliness in BA 3 /><:** developmental problem of old age  
**Incubator insulation BA 3 /><:** loss of reference  
**Feeling of abandonment, of having been discarded, set aside by loved ones**  
**(parents, spouse, children, friends) BA 3 />:** loss of reference  
**Family; Feeling that he didn't belong to his own BA 3 />:**  
**would have died Feeling of isolation as if the other BA 3 />:**  
**closing eyes; Pictures, phantoms appear at BA 3 />:** loss of reference  
**Impressions; easily irritated by; Sensitivity to sensory impressions BA 1/>:** sensitive for  
social consensus  
**some examples of nervous sensitivities:**  
**Comb; Head sensitivity to BCA 2/>:**  
**Head noise sensitivity, headache BCA 2/>:**  
**Sensitivity to light in headache BCA 2/>:**  
**Sensitivity to light, photophobia (sensitivity) BCA 2/>:**  
**Sounds; sensitive to normal noises, noise sensitivity BA 2/>:**  
**hypersensitivity of the sense of smell; odor sensitive BA 1/>:**  
**Sensitivity to touch, oral mucosa, gums, throat, sensitive to touch, solid food,**  
**brushing teeth, dentures BCA 2/>:**  
**Sensitivity to touch, touch sensitivity abdomen, abdomen BCA 2/>:**  
**Sensitivity genitals touch BCA 1/>:**  
**sensitivity to touch, pressure; Breast BCA 2/>:**  
**Sensitivity soles Druk BCA 1/>:**  
**nervous sensitivity BA 1/><:**  
**Developmental standstill, delay BA 3 /><:**  
**Head trauma, developmental arrest since BA 3/><:**  
**Development refusal BA 3 /><:**  
**sexual immaturity BA 3 /><:**  
**Eat; Mental symptoms after BA 2/<:** adjustment problems  
**Eat; Mood better through BA 2/>:** contact request  
**Growing up Complaints BA 3/><:** development problems  
- **precocious, pematue children BA 3/><:**  
- **sexual immaturity BA 3/><:**  
- **retarded, mentally retarded (development) BA 3/><:**  
**development in old age; Complaints due to aging BA 3/><:** developmental problem of  
old age  
- **mental problems; old aging BA 3/><:**  
**outdoors; Mind, mood when walking in:**  
**Mind better when walking outdoors, walking in fresh air BA 2/<:**  
**Mood worse walking outdoors, walking in open air BA 2/>:** fears isolation  
**anxiety, fear:**  
**downward movement; Anxiety, fear at BA 2/>:** fears social decline  
**alone at night; Anxiety, Fear BA 2/>:** wants social contact  
**awakening; Anxiety, fear at BA 2/><:** between wakefulness and sleep  
**To become old; Anxiety, fear of BA 3/><:**  
**approach, touch; Anxiety, fear of BA 1/<:** contact refusal  
**touching painful parts of the body; Anxiety, fear of BA 1/<:**  
**occurrence, appearance; Anxiety, fear of public BA 1/<:** fear of failure

to go out of the house; Anxiety, fear BA 1/<: problem of being public  
to close eyes; Anxiety, Fear BA 1/>: wants to control environment  
to be laughed at, to make a fool of oneself; Anxiety, fear BA 1/<:  
traffic jams; Anxiety, fear in BA 2/<: avoids social pressure  
**Movement improves anxiety, fear BA 2/>:**  
**Movement worsens anxiety, fear BA 2/<:** problem of being public visible  
**Blood; anxiety, fear of; can't see blood, wounds BA 3/><:** fear of not fitting socially  
children; **Fear of darkness at BA 3/><:** problem of development  
to fall asleep; anxiety, fear BA 3/><: see below "Sleep; anxiety, fear of; to fall asleep";  
marriage, marriage; Anxiety, fear of A 1/<: shies away from responsibility  
childbirth; Anxiety, fear during BA 3/><: fear of failure  
awakening in the morning; Anxiety, fear at BA 2/><: between wakefulness and sleep  
**Eat; Anxiety, fear after BA 2/<:** fear of contact  
**Driving causes problems, fear, anxiety when (actively) driving, riding BA 2/><:**  
nervous tension  
**Driving, being driven (passive); Fear BA 2/<:** suspicious  
**Fear of falling:**  
turning the head; **Fear of falling at BA 2/<:** loss of self-control  
descending stairs; **Fear of falling at BA 2/>:**  
Climb stairs; **Fear of falling at BA 2/<:**  
**Fly; fear of flying BA 2/<:** supersuspicious  
**Airplane; Anxiety, fear in BA 2/<:** suspicious  
**outdoors; Anxiety worse in BA 2/>:** wants social closeness  
**outdoors; Anxiety better in BA 2/<:** wants social distance  
**strange, new, unknown, unfamiliar, change; Anxiety, fear of BA 2/<:**  
to be carried; Anxiety, fear BA 1/<: suspicious  
**Thunderstorm; Anxiety, fear of BA 2/><:** nervous tension  
**Skin rash; Anxiety, sadness after suppressed BCA 3/>:** to be not allowed to react  
house; Anxiety, fear in BA 2/>: distrust of not being safe  
to leave home; Anxiety, fear BA 2/>: wants social closeness  
**high places; Fear of heights BA 2/<:** fear of being socially exposed  
**Anxiety, fear when looking through lattice steps, down stairs BA 2/<:**  
**Light; Anxiety, fear of BA 2/<:** Fear of being seen  
**Darkness; Fear of BA 2/>:** Fear of being not seen  
**Lay; Anxiety during BA 2/>:**  
**crowd; Anxiety, fear in BA 2/<:**  
menses; Anxiety, fear at BA 3/><: no longer valued socially  
menses, menses; Anxiety, fear after BA 3/><:  
menses; Anxiety, fear after/during suppression of BA 3/><: to be valued as a woman  
only through permanent role fulfillment  
Menses; Anxiety, fear of BA 3/><:  
at night; Anxiety, Fear BA 2/>: not be seen  
at night; Anxiety, fear of children BA 3/><: development problem  
to appear in public; Anxiety, fear BA 1/<: see "Public appearance" above and  
"Stage fright" below;  
open places; anxiety, fear of, agoraphobia BA 2/<: see below "streets, squares to  
cross; anxiety, fear, busy";  
operations; Anxiety, fear of BA 2/><: nervous tension to be without control;  
**Exams; anxiety, fear of; Exam anxiety BA 1/><:**  
**Forgetfulness during exams BA 1/><:** see below "Poor memory, exams; forgetful  
at";  
menses; Anxiety, fear at BA 2/><: see above "Menses; anxiety, fear at";  
rain; Anxiety, fear of BA 2/>: to be detached from social relationships  
pitch and toss; Anxiety, fear of BA 2/><: to surrender to rhythms without control;  
see below " being pitched and tossed; refusal to";  
Sleep; Anxiety, fear of BA 3/>: to be without control;

**to fall asleep; Anxiety, Fear BA 3/>:**

**to choke falling asleep; Anxiety, fear at BAC 3/><:** between wakefulness and sleep  
**death, to die in sleep; Fear of BAC 3/>:**

**Insomnia, lack of sleep from/due to anxiety AB 2/>:** fears to be without control  
**cut; Anxiety, fear of hurting oneself while shaving BA 2/<:** dreads the aggressive presence of the knife

**Pregnancy; Anxiety during BA 3/><:**

**sweat; Fear at BA 2/>:** fear of being isolated

**swimming, diving; Anxiety, fear of the BA 2/>:** lack of fixed references

**streets, squares to cross; Anxiety, fear, animated BA 2/<:**

**Bowel movement; Fear at BA 2/>:** loss of references

**involuntary stool when urinating, flatus; Anxiety, fear of BCA 2/>:**

**daytime; Fear of the day BA 2/<:** shuns the social public

**Phone; Anxiety, fear of BA 2/<:**

**appointment, time is fixed; anticipation tension, anxiety when BA 1/><:** anticipation tension

**animals; Anxiety, fear of BA 2/>:** Problem with unpredictable references

**dogs; Anxiety, fear of BA 2/>:**

**Insects; anxiety, fear of teeming BA 2/>:**

**cats; Anxiety, fear of BA 2/>:**

**mice, rats; Anxiety, fear of BA 2/>:**

**horses; Anxiety, fear of BA 2/>:**

**Snakes; Anxiety, fear of BA 2/>:**

**scorpions; Anxiety, fear of BA 2/>:**

**spiders; Anxiety, fear of BA 2/>:**

**birds; Anxiety, fear of BA 2>**

**wasps; Fear of BA 2/>:**

**Worms; Anxiety, fear of BA 2/>:**

**Sleep; Fear of death followed by deep AB 3/><:**

**going down stairs; Anxiety, fear of the BA 2/>:** fears social decline

**Drink; Anxiety, fear of the BA 2/><:** lack of fixed references

**with thirst; Anxiety, Fear Liquids BA 2/><:**

**doors locked; locked rooms; Anxiety, Fear BA 2/>:**

**if the door is difficult to open; Anxiety, fear BA 2/>:** see above "doors closed; Fear fear";

**tunnels, highway; Anxiety, fear of BA 2/>:**

**Water; anxiety, fear of BA 3/>:** see below, "rabies"; lack of fixed references

**Bathe; Anxiety, fear of BA 2/>:**

**head under water; Anxiety, fear when diving the BA 2/>:**

**sea; Anxiety, fear of BA 2/>:**

**swimming in deep water; Anxiety, fear of BA 2/>:**

**wind, storm; Anxiety, fear of BA 1/>:** unrelatedness and aggressive pressure

**Senility, dementia senilis BA 3/><:** problem of development

**sunstroke; Memory loss BCA 3/><:**

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

diarrhea; Vertigo with C 2:

Vomiting + vertigo C 2:

Cough; Vertigo with C 2:

liver problems; Vertigo at C 2:

Meniere vertigo C 3:

Vertigo with...

propensity to fall; Vertigo with CB 3:

tendency to fall, to hold on; clings to (walker) CBA 3/><:

tendency to fall backwards; Vertigo with CB 3:

tendency to fall to the side; Vertigo with CB 3:

tendency to fall forward; Vertigo with CB 3:

Nosebleeds improve vertigo C 2:

wave-like vertigo C 2:

\* **HEAD:** The problem of having to coordinate one's claim to validity with the claims of others in order not to be called into question as a social presence.

\* **scalp:** Conflict of being exposed in his autonomy to social pressure to adapt, having just accepting it, not being able to adapt or withdraw.

\* **Forehead:** Conflict, not asserting one's image of oneself, thus not being able to convince or to appear in impressive way.

\* **temples; Complaints of C 1:** Conflict, thinks to be directed in its claims to validity by the demands of the environment, that he is not allowed to make free decisions but has to orientate itself according to external influences.

\* **Sides, head side:** conflict, not being independent in his appearing, having to orientate himself according to the social conditions of the environment in order not to be called into question in his affiliation.

\* **Back of the head:** conflict, being exposed to fluctuating conditions of validity, not being able to reach a consensus between your own demands and those of those around you, so not being able to orient yourself.

## **Code A/AB/AC/BA**

something sticks out of his head he can't look away from; Feeling A 3/<: a flaw does not exist, does not belong, is separate; Feeling that the head is A 3/<:

Crying out - Cri encephalic CA 3/><: hold back to the breaking point in order to be socially accepted

Loss of consciousness, fainting with meningitis CA 3/<:

**Upper eyelid problems, complaints C 1:**

Lower eyelid problems, complaints C 1:

outward-turned eyelids (ectropion) C 3:

inturned eyelids (entropion) C 3:

granulated lids (small vesicles) C 3:

Hair loss of the eyelids, loss of eyelashes C 3:

half-open eyelid gap, opening the eyes is sometimes possible or impossible C 3:

Rashes of the eyelids C 1: see above "Rashes of the eyes, lids";

Herpes eyelids C 3: see "Eye rashes, herpes of the eyes";

Condylomas, growths of the eyelid C 3: see "Tumor of the eyelids" below;

Spasm of the eyelids, eyelid spasm C 2:

**Paralysis of the eyelid, eyelid paralysis C 3:**

**Inflammation of the lid and edge of the lid (blepharitis) C 3:**

**cracked eyelids C 3:**

Cracks of the Canthi C 3:

Swelling of the eyelids C 3: see below "Swelling around the eye; swelling eyelids";

glued eyelids C 2: see below "glued eyes";

Growths, condylomas of the eyelid C 3: see above "Cancer of the eyelids";

sore eyelids C 3: see below "lacrimation, excoriating";

Twitching, twitching of the eyelids C 2:

Cysts, eyelid cysts C 3:

**Retina C 3: dealing with the criteria of social standing;**

Retinal detachment BCA 3/><:

Retinal hemorrhage C 3:

Retinitis C 3:

retinal inflammation + hemorrhage; Hemorrhagic retinitis C 3:

Retinal thrombosis C 3:

**Neuralgia of the eye C 3:**

**Nystagmus C 2: see below "trembling, eye trembling";**

**Pupils C 2: exposure to public light;**

see "Iris, iris inflammation" above;

**Pupils dilated (mydriasis) C 2:**

months extended; Pupils over C 3:

**Pupils contracted C 2:**

more contracted on the left; Pupils C 2:

more contracted on the right; Pupils C 2:

**rheumatic, gouty, arthritic eye inflammation, rheumatism, gout of the eyes C 3:**

**Rolling the eyes C 3:**

**Jerking of the eyes C 2: see below "trembling, eye trembling";**

**Squinting, strabismus C 3:**

outside (divergent); Squinting at C

inside (converging); Squinting at C 3:

eyes turned up; after C3:

**Eye pain, eye pain C 1:**

bursting eye pain C 1:

foreign body, foreign body sensation; Eye pain as from a C 3:

smoke in the eyes; Burn like C 1:

Sand; Burning of the eyes like C 1:

extends...; eye pain:

eye around; Pain extends around C2:

- Eyebrows; Pain from the inner corner of the eye around C 2:

- corner of eye to corner of eye; Pain from C2:

occiput; Eye pain extends to C 2:  
 Ear; Pain extends from eye to C 2:  
 frontal sinuses; Eye pain extends to C 2:  
 Neuralgia of the eye C 3:  
   left eye C3:  
   right eye C3:  
 Lacrimation + eye pain C 2:  
 Orbital pain C 1:  
 swelling around eyes; edematic C 2:  
   Swelling of the conjunctiva C2: see above "Conjunctivitis, swelling of the  
   conjunctiva";  
   Swelling lids:  
     upper eyelids; Swelling C 2:  
     Lower lids, swelling and swelling under the lids C 2:  
 Optic nerve, optic nerve C 1:  
   Inflammation of the optic nerve C 3:  
   Paralysis of the optic nerve (amaurosis) C 3:  
 Star; cataract or green C3: see "cataract" or "glaucoma" above;  
 Stricture tear duct C3:  
 Lacrimal gland inflammation C 3:  
 Lacrimation general C 1:  
   Eye sand, liquid with hard secretions, sand C 3:  
   burning, caustic tears C 1:  
   Cough; Lacrimation at C 2:  
   Runny nose + tears C 2:  
   blurred with tearing of the eyes ; sees C 2:  
   Wind; Tearing in BC 2:  
   sharp (burning) tears C 1: see "burning tears" above;  
 Lacrimal sac b Complaints C 1:  
   Inflammation of the lacrimal sac C 3:  
   Swelling of the lacrimal sac C 2:  
   tear duct narrowing, stricture; Lacrimal duct narrowing, lacrimal duct stricture C 3:  
   Lacrimal caruncle, swelling of the tear duct exit C 3:  
 Dryness, dehydration, dry eyes C 1:  
 rolled eyes; spasmodic 2C:  
 sticky eyes, eyelids, eyelids C1:  
   Soreness, excoriation of lids, upper eyelid C 3:  
 Trembling, twitching, twitching of the eyes, swinging of the eyes (nystagmus) C 3:  
   twitching of the eyes C 2: see above "trembling of the eyes" for topic;  
   Jerking of the eyes + paralysis of the legs C 3:

\* **SEE:** Willingness to appear socially, to be seen

Code **A/AB/AC**

visual hallucinations:

Aura vision around people, trees A 3/<: is struck by awe and feels overwhelmed by an distant charisma far from any reciprocity

Movement of things before the eyes A 3/<:

ghosts when closing eyes; see BA 3/<:

Photophobia, sensitivity to light **BCA 2/>:** see “Eye, sensitivity to light”; Photophobia has nothing to do with vision!

color blind **CA 3/<:**

red-green blindness **CA 3/<:**

Color vision A 3:

Gray; sees objects A 3/>:

red; see A 3/>:

black spots; see A 3/>:

White spots; see A 3/>:

Stains; sees floating, floaters A 3/><:

Flickering before eyes CA 2/><:

Flickering before eyes + headache CA 2/><:

Flickering before the eyes from a headache CA 2/><:

mental exertion; Vision loss at **A 3/<:** see below “Reading; vision loss at”;

Visual acuity changes when reading **AB 2/<:**

reading hard; Double images with **AB 2/<:**

empty stomach; Full at CA 2/><:

indigestion: not being able to fulfill the prerequisite for social relationships, to trust the unfamiliar

excitement, emotion; Indigestion, complaints after AC 2/<:

nervous indigestion AC 2/><:

- Stomach Rage: feels anger in stomach AC 2/<:

anger, anger; Stomach pain with BC 2/<:

tolerates touch; Stomach pain that does not have BC 2/<:

Excitement; Stomach pain with AC 2/<:

mental exertion; Stomach pain from AC 2/<:

hunger, sober; Stomach pain from AC 2/>:

Hunger, fasting worsens conditions; Complaints when sober: AB 2/>

grief; Stomach pain from AC 2/>:

fright; Stomach pain BAC 2/><:

Speak; Stomach pain worse from AC 2/<:

**Hiccup C 2/><:**

hysterical; Hiccup, singultus AC 3/><:

Think; Nausea when AC 2/<:

excitement, emotion, emotions; Nausea, choking AC 2/<:

mental exertion, reading; Nausea from AC 2/<:

Coitus; Nausea with ABC 2/<:

caresses; Nausea from AC 2/<: not being able to trust caresses

Study; Nausea AC 2/<: see above "mental exertion; Nausea";

Tobacco; Smoking nausea BC 2:

Nausea at the sight of food AC 2/<:

Atrophy of the stomach BCA 3/><:

Cancer, stomach cancer BCA 3/><:

Gatekeeper cancer BCA 3/><:

Pregnancy; Heartburn in BCA 3/><:

Pregnancy; Nausea in BCA 3/><: see "Vomiting, pregnancy in" above;

**Development**

breast milk; vomits the BAC 3/><:

teeth, vomits at BCA 3/><:

Puberty, stomach cramps in the BCA 3/><:

alternation, climacteric; Nausea in BCA 3/><:

involuntary belching BCA 3/><:

persistent vomiting, incessant, vomits everything, vomits food immediately, cannot retain anything BCA /><3:

sudden vomiting BCA 3:/><

Pregnancy vomiting + morning sickness BCA 3/><:

Stomach cancer BCA 3/><:

## Code BC/CB

Food improves stomach problems BC 2:  
 Eating makes stomach problems worse BC 2:  
   overeating; Nausea, stomach problems from BC 2:  
 Lying improves stomach problems BC 2:  
 Lying down aggravates stomach problems BC 2:  
 flour foods, starchy foods; Stomach problems after BC 2  
 Hunger, fasting aggravates conditions BC 2:  
   emptiness, eating does not improve; Feeling empty after eating BC 2:  
at night; Cravings, Hunger BC 2:  
full stomach; Cravings despite AB 3/>:  
 Fullness after every bite BC 2:

belching C2:  
   improves Belching B 1:  
   worse (does not improve), belching B 1:  
   at night; Belching BC 2:  
 Breathing; Belching improves BC 2:  
 Eat; belching; Belching after BC 2:  
   Milk; Belching after BC 2:  
at night; difficult, incomplete; Belching BC 2:

heartburn  
In the morning; acid regurgitation, heartburn, heartburn BC 2:  
at night; acid regurgitation, heartburn, heartburn BC 2:  
 Eat; acid regurgitation, heartburn after BC 2:  
 Coffee; Heartburn after BC 2:  
 Lying down makes heartburn worse BC 2:  
 Milk; Heartburn after BC 2:  
 candy, sugar; Heartburn after BC 2:

Vomit  
In the morning; Vomit BC 2:  
at night; Vomit BC 2:  
Vomiting improves conditions, symptoms BC 1:  
Vomiting aggravates conditions, symptoms BC 1:

ice cream; Vomiting after BC 2:  
 Eat; Vomiting after BC 2:  
   skin rash (urticaria); vomiting after suppressed B 3:  
   breakfast; Vomiting after BC 2:  
 Beverages; Vomiting on BC 2:  
 Coffee; Vomiting after BC 2:  
 cold water; Vomiting on BC 2:  
 cold water when warm in the stomach; vomits BC 2:  
 Water; Vomiting after BC 2:  
Menses; vomits before the BC 3:  
Menses; vomits at the BC 3:  
 Milk; Vomiting after BC 2:  
 Opium; Vomiting after BC 2:

Symptoms better after vomiting BC 2:

Vomiting water, does not even tolerate water BC 2: see "Drinks, vomit on" above;  
 Feeling of fullness A 1:

Inflammation of the stomach, upset stomach, gastritis  
 Bread; Stomach problems caused by BC 2  
 diet mistakes; upset stomach at each BC 2:  
 drinks improve stomach; cold BC 2:  
 drinks aggravate stomach; cold BC 2:

shellfish, oysters; Stomach problems after BC 2:  
 Fruit; Stomach problems caused by BC 2:  
 Pork meat; Stomach problem after BC 2:  
 indigestion:  
 hasty eating, drinking; Indigestion after BC 2:  
 infants, young children; Digestive disorders with BC 3:  
 stomach pain  
Stomach pain in the morning BC 2:  
stomach pain at night BC 2:  
 Effort; Stomach pain after BC 2:  
 Bending, bending relieves stomach pain BC 2:  
 Bread; Stomach pain after eating BC 2:  
 Eating relieves stomach pain BC 2:  
 warm milk relieves stomach pain BC 2:  
 Eating makes stomach pain worse BC 2:  
 overeating; Nausea, stomach problems from BC 2:  
 Walking relieves stomach pain, stomach problems BC 2:  
 Walking aggravates stomach pain, stomach problems BC 2:  
 Coffee; Stomach pain after BC 2:  
 sweets, sugar; Stomach pain after BC 2  
 Cold relieves stomach pain BC 2:  
 Cold aggravates stomach pain BC 2:  
 Bending, hunching relieves stomach cramps BC 2:  
 Lying relieves stomach pain BC 2:  
Menses; Stomach pain before BC 3:  
Menses; Stomach pain with BC 3:  
Menses; Stomach pain after BC 3:  
 Rest aggravates stomach problems BC 2:  
 Heartburn: see belching, acid regurgitation and burning pain above;  
 Drinking makes stomach pain worse BC 2:  
 Warmth; Stomach pain better with BC 2:  
 Nausea - general  
In the morning; Nausea BC 2:  
 Morning sickness, getting up aggravates BC 2:  
at night; Nausea BC 2:  
Awakening; Nausea at night with BC 2:  
 driving a car, airplane (passive); Driving sickness, motion sickness BC 2:  
 Movement; Nausea at BC 2:  
 ice cream; Nausea after BC 2:  
 eggs; Nausea, vomiting after BC 2:  
Vomit; Nausea worse after BC 2:  
 Eat; Nausea better with BC 2:  
 Eat; Nausea after BC 2:  
 fat; Nausea after BC 2:  
 Meat; Nausea after BC 2:  
 Coffee; Nausea after BC 2:  
 Milk; Nausea after BC 2:  
 candy; Nausea after BC 2:  
 overeating; Nausea, stomach problems from BC 2:  
 Eat; Nausea before BC 2:  
 smell of food, dishes; Nausea from BC 2:  
Menses; Nausea before BC 3:  
Menses; Nausea at BC 3:  
 Seasickness, seacraane when driving in a boat (passive), nausea BC 2:  
Bowel movement; Nausea BC 2:  
during/before bowel movement; Nausea BC 2:

after defecation; Nausea BC 2:

Drink; Nausea BC 2:

relieves nausea; Drink BC 2:

worsens nausea; Drink BC 2:

Bloating, eating worse BC 2:

- Fullness after the smallest bite BC 2:

Bloating after drinking worse BC 2: needs solid references, is overwhelmed by the lack of stability and arbitrariness of liquids

Brush teeth; Nausea BC 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

Feeling of emptiness in the stomach C 1:

Feeling of emptiness + salivation + ravenous appetite C 2:

pit of stomach (epigastrium); Feeling of emptiness in C 1:

Weakness in the stomach C 1:

burping

loud burping CA 2/>:

burping empty C 2:

Sneezing when burping C 2:

difficult, incomplete; belching C2:

Pain from difficult, incomplete burping C2:

acid regurgitation, heartburn C 2:

neck up; Heartburn the C 2:

foamy liquid; burping C2:

fetid, putrid eructations 3C:

rotten eggs; burping stinks of C 3:

undigested, after eating; Belch (vomit) tastes C 2:

suppressed belching BC 3:

aqueous liquid; belching C2:

Distension of the stomach C 1: see below "Gastric distention";

Distension of the stomach C 1: see below "stomach distention";

Nausea C 2: see "inner throat, nausea, choking";

Vomiting in general C 1:

Vomiting with nausea C 2:

Vomiting without nausea C 1:

Seizures C 2:

vomiting diarrhea C 2:

Suffocation attacks + vomiting C 3:

Eating, drinking gets into the nose when vomiting C 2:

explosive, violent, sudden vomiting BCA 3/><:

Fever + vomiting C 2:

Cough; Vomiting (gagging) at C2:

phlegm when coughing ; vomits C2:

cannot vomit C3: see below "difficult vomiting" and "impossible to vomit":

Headache + vomiting C 2:

Weakness after vomiting C 2:

painful vomiting, pain when vomiting BC 2:

difficult vomiting with much retching C2:

Headache better after vomiting C 2:

Symptoms worse after vomiting C 2:

Nausea not better from vomiting C2: see "Symptoms worse after vomiting"

impossible; despite nausea vomiting C 2:

vomit, type of vomit: see also above "belching";

Blood vomiting, gastric bleeding C 3:

Vinegar vomit, vinegar belching C 1: see above "Eructation, acid regurgitation, heartburn";

faecal, vomiting of faeces BCA 3/><: see below "vomiting faeces";

 Cough; Nausea with C2:  
 Pains; Nausea from C 2:  
 Vertigo with nausea C 2:  
 Digestive disorders C 1: see above "stomach inflammation, indigestion";  
 Stomach fullness C 1/<: it is very easy to be overwhelmed communicatively due to a  
 lack of willingness or ability to adapt  
 Breathing difficulties with / due to feeling of fullness C 2: Anpassungsdruck nimmt  
 den Atem  
 upset stomach C 1: see "stomach inflammation" above;  
 Constriction, contraction of stomach C 3  
 \* **ABDOMEN**: Conflict of proving oneself socially useful, having to meet  
 performance conditions in order to be accepted socially.  
 \* **Diaphragm**: Conflict between social duty, which impairs free breathing, and free  
 communication, unencumbered by conditions (breathing deeply).  
 \* **Hypochondria**: Feeling of not being communicatively integrated or respected  
 despite efforts to meet the performance requirements, to prove oneself useful.  
 \* **Duodenum**: Conflict of having to fit into the framework of familiar conditions of  
 social reciprocity, usefulness, so to have to connect, integrate to the usual.  
 \* **Liver, liver problems**: Conflict of having to invest more in the social community  
 than experiencing retroactively, i.e. having to let oneself be used for the benefit of  
 the social community.

- \* **Bile, gallbladder:** Conflict of having to submit to social pressures (bitter), but not openly expressing yourself against it but only being able to emotionally distance yourself (calm down) in order not to be socially excluded
- \* **Groin area, groin problems:** Conflict, on the one hand, living out one's dynamism, on the other hand, being prevented from doing so by reservations.
- \* **Navel:** Conflict, not independent and therefore overwhelmed by the conditions of social benefit, tied to the security of social relationships, being dependent.
- \* **Solar plexus:** Conflict between the ego claim, i.e. free breathing, and social narrowness, i.e. compelling conditions, which prevent to breath deeply.
- \* **Pancreas:** Conflict of not being able to adjust one's idea of social reciprocity to the reality prevailing in the social environment, to subordinate therefore to this reality only on the outside, but not being able to create any consensus on the inside.

### **Code A/AB/AC**

**anger, anger, annoyance; Abdominal pain with AC 2/<:**

**Anger; Liver pain in AC 2/<:**

**umbilical region with anger, anger; Abdominal pain in AC 2/<:**

**Excitement; Abdominal pain with AC 2/<:**

**Abdominal pain suddenly AC 3/<:**

**Stomach cramps C 2:** feels committed to the conditions of social reciprocity, but despite more and more effort, he is unable to create reciprocity is ultimately only able to tense up himself

**hysterical cramps of the abdomen, abdominal colic AC 2/><:**

**Fainting with intestinal colic CA 3/><:**

**writhing abdominal cramps CA 2/><:**

**Laugh; Abdominal pain worse from AC 2/><:**

**fright; Abdominal pain BAC 2/><:**

**Flatulence, bloating:** is only partially able to meet the performance conditions and can only dam up or derive their demands as excess pressure

**hysterical flatulence AC 3/><:**

**gushing discharge BCA 3/><:**

## **Code BC/CB**

**Abdomen enlarged after childbirth BC 3:**

## Stomach ache:

In the morning; Abdominal pain BC 2:

- Breakfast; Abdominal pain, abdominal pain after BC 2:

at night; Abdominal pain, abdominal pain BC 2:

Effort; Abdominal pain, abdominal pain after BC 2

Exhale; Abdominal pain problems with BC 2:

Bending, bending forward creates abdominal pain BC 2:

bending, hunching improves, hunches in abdominal pain BC 2:

bending, hunching aggravates abdominal pain, stretching improves BC 2:

Bread; Abdominal problems after BC 2:

Eating aggravates abdominal pain, abdominal pain BC 2:

Drinks; Abdominal discomfort better after cold BC 2:

Drinks, drinking aggravates abdomen BC 2:

Drinks; Abdominal discomfort worse after cold BC 2:

urinary urgency is relieved (urination worse); Abdominal pain when BC 2:

Urge to urinate is not given in (urination improves); Abdominal pain when BC 2:

Coffee; Abdominal problems after BC 2:

clothing printing, belt; Abdominal pain from BC 2: abdominal

Lay; Stomach pain, stomach pain better with BC 2:

Lay; Abdominal pain, abdominal pain worse from BC 2:

menses; Colic, abdominal cramps at BC 3:

menses, menses agg; Abdominal pain BEFORE BC 3:

menses, menses agg; Abdominal pain DURING / AT BC 3:

Milk; Abdominal problems, abdominal pain, abdominal pain after BC 2:

Fruit; Abdominal problems caused by BC 2:

Rest aggravates abdominal discomfort BC 2:

Sit; Stomach pain, stomach ache in BC 2:

stretches for abdominal cramps BC 2:

Bowel movement; Abdominal pain worse BEFORE bowel movement BC 2: see "Beleration relieves abdominal pain":

bowel movement relieves abdominal pain, abdominal pain, conditions BC 2:

Bowel movement relieves abdominal cramps BC 2:

Bowel movement; Abdominal pain worse AFTER bowel movement BC 2:

Bowel movement aggravates abdominal pain, abdominal pain, conditions BC 2:

candy; Abdominal pain after BC 2:

Heat relieves abdominal pain, abdominal pain BC 2:

Waves; Abdominal pain increasing and decreasing in C 2:

## flatulence:

Babies with trapped gas BC 3: see above "trapped gas";

flatulence colic

at evening; Flatulence colic BC 2:

In the morning; Flatulence colic BC 2:

Eat; Flatulence after BC 2:

flatus improves shortness of breath; Departure of BC 2:

flatus relieves flatulence; Departure of BC 2:

Exit, flatus does not relieve BC 2:

Children; Bloating, bloating, tympany (hunger bellies) BC 3:

Menses; Bloat from suppressed BC 3:

## Diarrhea,

In the morning; Diarrhea BC 2:

- Bed; Morning diarrhea upon awakening, in BC 2:

- in the morning after getting up; Diarrhea BC 2:

morning; Diarrhea BC 2:

afternoon; Diarrhea BC 2:

at night; Diarrhea BC 2:

oysters, mussels; Diarrhea after BC 2:

heat, hot weather conditions; Diarrhea in BC 2:

Summer diarrhea BC 2: same topic as "Heat; diarrhea in";

Menses + diarrhea BC 3: see "Menses" above;

traveling, driving (passive); Diarrhea in BC 2:

Pregnancy; Diarrhea in BAC 3/><:

summer diarrhea BC 2:

Eating modalities + diarrhea BC 2: see "Eating modalities + diarrhea" above;

Teething diarrhea, cholera BC 3:

Eat:

- Eating improves diarrhea BC 2:
- Eat; Diarrhea after BC 2:
- Diarrhoea, diarrhea after solid food BC 2:
- Breakfast; Diarrhea after BC 2:
- irregular eating, diet errors; Diarrhea on each BC 2:

Alcohol; Diarrhea after BC 2/>:

pears; Diarrhea from BC 2:

Bread; Diarrhoea, diarrhea after BC 2

eggs; Diarrhea after BC 2:

Vinegar causes diarrhea BC 2:

solid foods; Diarrhea after BC 2:

fat; Diarrhea after BC 2:

Fish; Diarrhea after BC 2:

Meat; Diarrhea from BC 2:

Vegetables; Diarrhea after BC 2:

beverages, drinking; Diarrhea after BC 2:

Spices; Diarrhea from BC 2:

lowest food/liquid intake produces diarrhea BC 2:

cucumbers; Diarrhea after BC 2:

Skin rash; Diarrhoea, diarrhea during / with C 2:

Coffee; Diarrhea after BC 2:

cold drinks, ice cream; Diarrhea after BC 2:

cold dishes; Diarrhea after BC 2:

Cold, cold weather, freezing weather, frost produce diarrhea BC 2:

cabbage; Diarrhea after BC 2:

Lying improves diarrhea, diarrhea BC 2:

flour foods, starchy foods; Diarrhea after BC 2:

Lying down worsens diarrhea BC 2: Potatoes; Diarrhea after BC 2:

melons; Diarrhea BC 2:

Milk; Diarrhea after BC 2:

breast milk; Diarrhea after BC 3:

shellfish, oysters; Diarrhea after BC 2:

Fruit; Diarrhea after BC 2:

. sour fruit; Diarrhea after BC 2:

. unripe fruit; Diarrhea after BC 2:

smoking, tobacco; Diarrhea after BC 2:

Sauerkraut; Diarrhea after BC 2:

acids; Diarrhea after BC 2:

sharp; Diarrhea after BC 2:

Chocolate; Diarrhea after BC 2:

Pork meat; Diarrhea after BC 2:

Sweets; Diarrhea after BC 2:

onions; Diarrhea after B2:

Belt feeling, feeling of constriction Abdomen, belly BC 2:

covers abdomen, heat abdomen covering improves, covering aggravates BC 2:

clothing tightness; sensitive to BC 2: see "General, feelings, tight clothing";

liver problems:

Go; Groin pain better with BC 2:  
 Go; Groin pain worse from BC 2:  
 Coffee/ liver pain after BC 2:  
 Standing up while sitting aggravates groin pain; from BC 2:  
menses appear; Feeling like BC 3:  
 navel problem:  
 - In the morning; Umbilical pain BC 2:  
 - at evening; Umbilical pain BC 2:  
 - at night upon awakening; Umbilical pain BC 2:  
 Go; Navel pain worse from BC 2:  
Bowel movement; Navel pain, navel pain worse BEFORE (better AFTER) BC 2:  
stool relieves navel pain; Pain of the navel defecation improves BC 2:  
Bowel movement; Navel pain, navel pain worse AFTER (better BEFORE) BC 2:  
defecation worse umbilical pain; Pain navel BC 2:  
 Worm infestation, worm complaints, worms BC 3:  
 Tapeworm infestation, tapeworms BC 3:  
 Skin itching (rectum) extreme with worm infestation BC 3:  
 Itchy nose from worms BC 3:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

Abscess of the abdominal wall C 3:  
 Peritonitis C 3:  
 abdominal pain, abdominal pain C 1:  
   attacks of abdominal pain C 1:  
   extends down to the pelvis; Abdominal pain C 2:  
   extends to chest; abdominal pain, abdominal pain C 2:

 Abdominal weakness C 1:  
 Solar plexus, solar plexus C 2:  
   Aura emanates from the solar plexus C 3:  
 Typhus C 3:  
 Feeling of constriction Abdomen, belly C 2: see "belt feeling" above;  
 Diaphragm C 1:  
   Hiccups, singultus C 2:  
   Elevated diaphragm C 2:  
 Duodenum, duodenum C 1:  
   Duodenal ulcer, duodenal ulcer C 3:

\* **RECTUM, ENDDARM:** conflict of not being able to correspond to all communication partners in the sense of mutual usefulness and therefore being secreted by them as socially useless;

\* **Anus, Anus:** Feeling of not being able to find a consensus between the willingness to isolate yourself from what is inappropriate and the rejection of being isolated as inappropriate.

\* **Perineum, perineum C 1:** Conflict between wanting and being not allowed, not being allowed to make instinctual demands without being questioned as socially inappropriat.

## Code A/AB/AC

**Excitement; Rectal problems with AC 2/<:**

**Pain in rectum when excited, annoyed, angry AC 2/<:**

**anxious urge to defecate AC 2/><:**

**Excitement; involuntary urge to defecate, bowel movement at AB 3/<:**

**pressing has stopped; involuntary stool when going to BCA 3/<:** not being able to deal with a complete lack of reference, i.e. not being able to detach yourself, just only involuntarily fall through

**Water noise causes urge to defecate AB 2/><: .**

**Sudden urge to defecate BCA 3/><:**

**involuntary, unnoticed bowel movements CA 3/><:** to be without any connection to the completely contradictory conditions of social reciprocity and therefore without any control over the course of the confrontation

**Anxiety, fear of involuntary bowel movements AB 1/>:**

**Movement; involuntary stool, at BCA 3/><:**

**Vomiting + involuntary bowel movements BCA 3/><:**

**Excitement; Stool, urge to stool from AB 2/<:**

**solid, involuntary bowel movements BCA 3/><:**

**Flatulence + involuntary bowel movements BCA 3/><:**

**Numbness + unnoticed passage of stool BCA 3/><:**

**cough, sneeze; involuntary bowel movement through BCA 3/<:**

**spasms, convulsions; involuntary bowel movements at BCA 3/><:**

**Sleep; involuntary bowel movements in BAC 3/>:**

**fright; involuntary stool after BAC 3/><:**

Stand; involuntary bowel movements in BCA 3/<:  
Urinate; involuntary stool when urinating BCA 3/>:  
involuntary bowel movements CA 3/><: see above "involuntary bowel movements";  
 anger, annoyance, excitement; Constipation after AC 2/<:  
 Retention of stools, does not go to the toilet in the presence of others, constipation  
 in the company of other people AC 2/<: thinks to be not allowed to expose oneself, i.s.  
 not to admit that one is just separated as inferior  
 home; Constipation when not at AC 2/<:  
 sequence of operations; Constipation as BAC 3/><:  
 Travel constipation AC 2/>:  
 fright, shock; Constipation after BAC 2/><:  
 Diaper rash BAC 3/><:  
 Cancer:  
Cancer of the colon, colon cancer, transverse colon BCA 3/><:  
Cancer of the rectum, rectal cancer Cancer of the colon, colon cancer, transverse  
colon BCA 3/><:  
Polyps of the rectum, rectum polyps BCA 3/><:  
Women; Constipation in women BCA 3/><:  
children; Constipation at BCA 3/><:  
infants; Constipation at BCA 3/><: see above "Children; constipation at";  
Change in diet to bottles, bottles, artificial food; Constipation in BCA 3/><:  
newborn; Constipation at BAC 3/><:  
Pregnancy; Constipation, constipation in BAC 3/><:  
Stool retention, conscious restraint of the stool in children or generally BCA 3/><:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

#### Anal complaints C 1:

discharge, dampness of the anus; smelly C 3:  
 Abscess at the anus C 3:  
 anal bleeding; Bleeding from anus after defecation BC 3:  
 during bowel movements; Anal bleeding: see "Anal bleeding" above;  
 Hemorrhoidal bleeding C 3:  
 Afterburn C 1: see below "After pain";  
 Anal fissure C 3:  
 Anal fistula, rectal fistula, fistula after C 3:  
 Anal itching C 2:  
 - at night; Anal itching BC 2:  
 Constipation + anal itching C 2:  
 Anal cancer BCA 3/><:  
 Anal pain, pain anus C 1:  
 After burning, inflamed after C 3:  
 Splinter pain of the anus C 3:  
 Constriction painful: see Constriction below;  
 Anal prolapse BCA 3/><: see "Prolapse" below;  
 Distension of the anus C 1:  
 Sensitivity anus C 1:  
 Hemorrhoids in general C 3:  
 alcoholics; Hemorrhoids in BAC 3/<:  
 blind hemorrhoids C 3:  
 bleeding hemorrhoids C 3: see above "anus bleeding";  
 blood-filled, swollen hemorrhoids C 3:  
 chronic hemorrhoids C 3:  
 Diarrhoea, diarrhea causes hemorrhoids or prolapse BCA 3/><:  
 Itching; Hemorrhoids with strong C 3:

- Constipation + hemorrhoids C 2:**  
**mucous hemorrhoids: mucus oozes out C 3:**  
**painful hemorrhoids C 3:**
- Hemorrhoids, pain, rectum itching, hot application relieves, cold aggravates BC 2:
  - Hemorrhoids, rectal pain relieve cold applications, warm worse BC 2:
  - Splinter pain with hemorrhoids C 3:
  - Stick pain with haemorrhoids: see above "splinter pain";
- bowel movement, hemorrhoids protrude BC 3:**  
**grape-shaped hemorrhoids C 3:**  
**Hemorrhoids + accompanying organ complaints:**  
**Heart, complaints, heart problems, heart problems + hemorrhoids C 3:**  
**Back pain with hemorrhoids C 3:**
- Lumbar region pain. Lumbar pain with hemorrhoids C 3:
  - Sacral pain, pain in sacral region, sacrum with hemorrhoids C 3:
- Pneumonia + hemorrhoids C 3:**  
**Rashes around the anus, after C 1:**  
**Soreness of the anus, excoriation C 3:**  
**Prolapse - anal prolapse, anal prolapse BCA 3/><:**  
**Diarrhea + anal prolapse BCA 3/><:**  
**Constriction of the anus + prolapse BCA 3/><:**  
**Feeling of weakness, weakness rectum C 3:**  
**Dryness of the anus C 1:**  
**Condylomas on the anus C 3:**  
**Constriction, after C 2:**
- Bowel movement; Constriction anus at BC 2:
- Perineum, perineum C 1:**  
**Abscess on the perineum C 3:**  
**Excoriation, skin abrasion on the perineum C 3:**  
**Ball, lump feeling in the perineum C 2:**  
**Fissure on perineum C 3:**
- Diarrhea C 2: see "Abdomen, diarrhea, diarrhea";**  
**Fistula, rectal fistula, rectal fistula C 3:**  
**Fissure, anal fissure C 3: see above "Anal complaints, anal fissure";**  
**Feelings, sensations of the rectum, the anus:**  
**feces in the rectum, insufficient bowel movements; Feeling C 2:**  
**itching of the anus C 2: see above "anus itching";**  
**Lumpy feeling in the rectum C 2:**  
**Spasm of the anus C 2: see above "Anal complaints, constriction";**  
**Urge to defecate C 2: see below "urge to defecate";**  
**insufficient bowel movements; feeling of faeces in the rectum C 2: see above "faeces in the rectum, feeling";**  
**receding stool; Feeling of stool slipping back C 2:**
- Skin rashes around the anus C 1: see above "Anal complaints, skin rashes";**  
**Colon, large intestine C 1:**  
**Ulcers of the large intestine C 3:**  
**Colitis, inflammation of the colon C 3:**  
**Ulcerative colitis, aggressive colon inflammation BCA 3/><:**
- Itching of the anus C 2:**  
**Spasm of the anus C 2: see above "Anal complaints, constriction";**  
**Pressing to stool B 1: see below "urge to stool";**  
**Cracks in the anus C 3: see above "Anal complaints, anal fissure";**  
**Sphincter weakness, relaxation, feeling of weakness of the anal sphincter BCA 3/><:**  
**Pain rectum, rectum pain C 1:**  
**Pain rectum, rectum pain + constipation C 2:**  
**stabbing pain rectum, rectum C 1:**

**Desire to defecate C2:**

**Persistent urge to defecate C2:**

**frequent urge to defecate, bowel movements C 2:**

**frequent bowel movements but scanty C 2:**

**Bowel movement; painful urge to defecate, tenesmus at C 2:**

**futile urge to defecate, constipation despite urge to defecate C2: see below**

**“Constipation,**

**futile urge to defecate”;**

**Feelings of stool: see above “Feelings, sensations of the rectum”;**

**Tumors of the rectum, rectum C 3:**

**Constipation, constipation, constipation C 2**

**Emaciation + constipation BAC 3/><:**

**Flatulent colic, spasmodic distension, tympanic constipation, constipation C 2:**

**Urge; Constipation with futile C2: see below “futile urge to defecate”;**

**diarrhea alternating with constipation C 2: see below “Constipation; diarrhea alternating with”;**

**paralyzed rectum; Stool must be removed mechanically C 3:**

**Peristalsis; Constipation due to reduced C3: see above “lame rectum; stool must be removed mechanically”;**

**painful constipation C 2:**

**Difficult bowel movement with soft stool C 2:**

**urge to defecate; Constipation despite C2: see below “futile urge to defecate”;**

**Constipation; Diarrhea alternating with C 2:**

**receding stool; Difficult bowel movement C 2:**

**Diaper rash C 3: see above “rashes around the anus”;**

**constriction, anus C 2: see above “anus complaints, constriction, anus”;**

\* **STOOL:** Conflict of not being recognized by the communication partners in terms of mutual benefit, thus being not accepted from them as worthy, but separated as stinking.

## Code A/AB/AC

Disgust at his stool A 1/>: self-criticism  
undigested; stool, lientery CA 3/<:  
does not stink, odorless; stool CA 1:

## Code BC/CB

**Bowel movement:**

improves; bowel movement B 1: see "rectum, bowel movement, better through/after";

aggravates; owel movement B 1: see "rectum, stool, worse after";

Menses; Bloody stool in the BCA 3/><:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

stool nature of:

bloody stool C 3:

stripes; bloody stool in C 3:

greasy stool C 1:

fermented; stool C 1:

odorless stool C 3: see below "does not stink; stool";

large, voluminous stool, also like ball C 2:

hard stool C 1:

soft, liquid stool followed by hard stool C 1:

frequent stool C 1: see "rectum, urging to stool, frequent urging to stool, stool";

slimy stool C 1:

black stool C 1:

smelly stool C 1:

foul smelling; Stool: see "smelly stool" above;

watery stool C 1:

soft stool C 1:

white stool C 1:

sore, sharp, caustic stool C 3:

- \* **BLADDER: Conflict, having to suppress disturbing events in favor of social consensus, distancing oneself emotionally from it for this reason.**
- \* **Urethra (bladder - exit), ureter (kidney - bladder): Conflict, not to be allowed to express what arouses him, but to have to repress it, cannot overcome his displeasure about it but is caught emotionally between contradiction and acceptance.**

## Code A/AB/AC

**babies, toddlers, small children; Cystitis at BAC 3/><:**

**Excitement; Bladder problems due to AC 2/<:**

**think about; Urge to urinate when AC 2/<:**

**Fear of darkness + urge to urinate or defecate ABC 2/>:**

**Coitus; Urge to urinate after ABC 2/>:**

**nervous; nervous, frequent urination, urinates frequently when nervous AC 2/><:**

**urinary retention**

**old men; Urinary retention BAC 3/><: see "urinary retention" above;**

**children; Urinary retention at BAC 3/><:**

**newborn, infant; Urinary retention BAC 3/><:**

**Pregnancy; Urinary retention in and after BAC 3/><:**

**retention of urine; Paralysis of the bladder by BAC 3/><:**

**sudden urge to urinate, must hurry, otherwise urine will come out BCA 3/><:** having to repeatedly release the accumulated resentment in order to continue to fulfill the rejected conditions

**Surgery; Urinary retention according to BAC 3/><:** injury shock

**presence of others, strangers; Urinary retention, unable to urinate AC 1/<:** thinks to be not allowed to signal that one does not agree with all conditions in the social environment and therefore has to derive pent-up resentment

**uraemic coma CA 3/<:** see "General, coma";

**dribbling, involuntary urination BAC 3/><:** see below "involuntary urination, dribbling after";

**involuntary urination, incontinence, bladder weakness generally BAC 3/><:** to no longer hold back the pent-up resentment, just to be able to let it go

**daytime; involuntary urination BCA 3/<:**

**during the day + at night; involuntary urination, incontinence BCA 3/><:** be in agreement neither with the conditions of the day nor with oneself (night).

**Cooling down; involuntary urination due to BCA 3/<:**

**old people; Bladder weakness BCA 3/><:**

**Bedwetting at night, nighttime BCA 3/>:** Problem of being on your own without social connections

- . **falling asleep phase; Bedwetting BCA 3/><:** Indifference between wakefulness and sleep.

- . **wake-up phase; Bedwetting (towards morning) BCA 3/><:** Indifference

**Pressure to perform, exertion as a cause of incontinence BCA 3/<:**

**straining to defecate; Involuntary urination with BCA 3/><:** Indifference between letting go and not wanting to separate (fezes)

**Prostate; involuntary urination of old man with increased BCA 3/><:** being exposed to impossible challenges and, despite his best efforts, he is only able to resign and involuntarily let them go

**fright; involuntary urination BCA 3/><:**

**Pregnancy incontinence BCA 3/><:****Stand; Involuntary urination in BCA 3/<:****Bowel movement; involuntary urination, incontinence with BCA 3/<:** to be separated as inferior and to only be able to let go of one's displeasure about it involuntarily**dribbling after urination; dribbling; involuntary BCA 3/<:**. **deep sleep, difficult to wake up; Involuntary urination, bedwetting in BCA 3/>:**. **Transitional phases Bedwetting, involuntary urination on falling asleep and waking up, awakening BCA 3/><:** Indifference between wakefulness and sleep.**Ejaculation, Orgasm; Involuntary urination in BCA 3/><:** on the one hand, letting go of control, but at the same time maintaining it, not wanting to expose yourself, to give yourself away**Excitement; Involuntary urination by BCA 3/<:**    **outdoors; Involuntary urination in BCA 3/<:****urinary urgency is not immediately given in; involuntary urination, incontinence, bladder weakness if the BCA 3/><:** see above " sudden urge to urinate..."    **cough, sneeze; Incontinence with BCA 3/<:****Children; Bedwetting BCA 3/><:** development problem**Coitus; involuntary urination after BCA 3/><:** see above "ejaculation...";**Spasms, convulsions with involuntary urination BCA 3/><:****Laugh; Incontinence at BCA 3/><:****walking; Incontinence when BCA 3/<:****Water noise causes urination BAC 2/><:** this noise means loss of reference**Bladder tumor BCA 3/><:**    **Bladder polyps BCA 3/><:****Bladder cancer BCA 3/><:****Bladder prolapse, bladder prolapse, bladder prolapse BCA 3/><:****Incontinence - Weak bladder sphincters, unable to hold urine BAC 3/><:** see "Urine, involuntary urination";    **Child cries before urinating BCA 3/><:****Bladder stones BCA 3/><:**    **stones; Pain from stuck in the urethra BCA 3/><:****Bladder paralysis BCA 3/><:****Stricture, narrowing of the urethra BCA 3/><:****Bladder weakness BCA 3/><:****Urinary retention, urinary blockage, urinary retention BCA 3/><:**    **Urinary retention due to inflammation BCA 3/><:**    **Fever + urinary retention BCA 3/><:**    **Prostate enlargement + urinary obstruction, delayed urination BCA 3/><:**    **painful, cramping (spastic) urinary retention BCA 3/><:**    **Urinary retention due to bladder pain BCA 3/><:**    **Urethral caruncle (tumor, external urethral opening, mostly climacteric women) BCA 3/>< :**    **Urethral caruncle (tumor, external urethral opening, mostly climacteric women) BCA 3/><:**    **stones; Pain from stuck in the urethra BCA 3/><:**    **Stricture, narrowing of the urethra BCA 3/><:**    **retention of urine; Bladder paralysis due to BCA 3/><:** see "Bladder paralysis" below;**Code BC/CB****Menses; Bladder pain at BCA 3/><:****Bladder pain urinating**    **improves bladder pain; urination BC 2:**

aggravates bladder pain; urination BC 2:  
when urinating; Burn BC 2:  
Beginning to urinate aggravates BC 2:  
cessation of urination; Bladder pain to BC 2:  
after urination; Bladder pain BC 2:  
before urinating; Bladder pain BC 2:  
full bladder; bladder pain better at; worse after urination BC 2:  
behavioral pain; urinary urgency with; Bladder pain when urge to urinate not  
given BC 2

Urge to urinate:

urge to urinate in the morning BC 2:  
urge to urinate in the evening BC 2:  
nocturnal urge to urinate BC 2:  
walking aggravated ; Urge to urinate with BC 2:  
Coffee; Urge to urinate BC 2:  
Urinate; Urge to urinate after BC 2:

urethral pain:

Sit; Urethral pain worse from BC 2:  
Pain of the urethra when urinating BC 2:  
Burning pain when not urinating BC 2:

urinary retention

Cooling down, cold + urinary retention, delayed urination BC 2:  
palpitations; Urinating improves BC 2:  
back pain; Urinating improves BC 2:  
at night; frequent urination, irritable bladder BC 2:

Bladder spasms when urinating BC 2:

Stand; Urine runs only in BC 2:

Stand; Urine runs worse in BC 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

Bladder infection, cystitis C 3:

acute cystitis C 3:

Beginning of cystitis + little urine C 3:

recurrent, recurring cystitis, cystitis C 3:

chronic cystitis C 3:

Vaginitis, inflammation of female genitalia + cystitis C3:

Bladder Feelings:

coldness in bladder ; Feeling of C 1:

Sloshing, uncertainty in the bladder C 2:

Heaviness of the bladder C 1:

Bladder ulcer C 3:

Bladder pain C 1:

burning bladder pain C 1:

pressing pain of bladder C 1:

Urinate; Bladder pain associated with:

Persistent urge with little urine (few leaking drops) + bladder pain C 2:

constriction when urinating; spasmodic; spasmodic dysuria C 2:

Persistent urge to urinate, frequently C 1:

Urge to urinate frequently day and night C 2:

unsuccessful, futile urge to urinate, tenesmus C 2:

scanty discharge; Urge to urinate with C2:

Absent urge to urinate, missing C 2: There is no urge to urinate despite a full bladder: thematically such as "absent urge to urinate";

suppression of urination, urination; Bladder pain from B 3:

Urethra:

- Secretion from the urethra C 1:
- Bleeding of the urethra C 3:
- Inflammation of the urethra C 3
- Numbness of the urethra, not feeling urination CA 1/<
- Gonorrhoeic discharge from the urethra C 3:
- Itching, tingling in urethra C 2:
  - Tingling, biting, pressing on the perineum rubbing against objects C 2:
- voluptuous itching in urethra C 2:
- Growths of the urethra BCA 3/><: see "urethral caruncle";

Meatus, ureteral opening C 1:

- Inflammation of the opening of the ureter, meatus C 3:
- Itching of the ureteral opening, meatus C 2:
- Urinate; Pain in the ureteral orifice, meatus after C1: see "Inflammation of the ureteral orifice" above;

Irritable bladder C 1: see "Frequent urge to urinate, irritable bladder";

Stones BCA 3/><: see "Bladder stones" above;

Urinate:

- improves urination B 1:
- aggravated; urination B 1:
- bifurcated ray C 2:
- frequent urination, irritable bladder C2:
- residual urine remains after urination; Feeling, incomplete urination C 3:
- copious urine C 1: up "frequent urination";
- weak stream of urine, slow emptying when urinating C 2:
- difficult urination, dysuria C 2:
- scanty urine C 2:
- interrupted (intermittent) beam C 2:
- delayed urination, dripping, must wait or strain until urine begins to flow C 2:

Constriction of bladder C 2:

\* **KIDNEYS:** Conflict, should tolerate social demands from the environment, suppress one's displeasure without being tolerated by the environment in one's own claims and conditions.

**Code A/AB/AC**

uraemic coma CA 3/<: not letting go of one's displeasure, thus only radically distancing oneself from oneself, only being able to let go of oneself

Kidney inflammation, nephritis caused by scarlet fever BCA 3/><:

Kidney problems + dropsy, edema BCA 3/><:

filtration of the kidneys; incomplete; Kidney failure BCA 3/><:

Adrenal mark complaints BCA 3/><:

Adrenal cortex complaints BCA 3/><:

Addison's disease, insufficiency of the adrenal cortex BCA 3/><:

Kidney degeneration, nephrosis, atrophy Kidneys BCA 3/><:

polycystic kidney degeneration BCA 3/><:

Kidney stones, kidney stones BCA 3/><:

stuck kidney stones, kidney sand BCA 3/><:

Kidney failure BCA 3/><:

Wander kidney BCA 3/><:

Kidney cysts, kidney cysts BCA 3/><:

sclerosis, calcification of the kidneys BCA 3/><:

Congestion kidney BCA 3/><

## Code BC/CB

Exercise worsens kidney pain BC 2:

stoop; Kidney pain worse from BC 2:

Breathe in; Kidney pain with BC 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

Kidney abscess, kidney abscess C 3:

Kidney sensations:

Bubbling sensation in kidneys, goes from one point in all directions C 2:

Kidney cold C 1:

Inflammation of the kidneys, kidney inflammation, nephritis C 3:

Inflammation of the kidneys, kidney inflammation with blood in the urine, uraemia C 3:

hemorrhage; Kidney inflammation with C 3:

chronic kidney inflammation C 3:

Inflammation of the renal pelvis C 3:

Kidney pain C 1:

Belly; Kidney pain extends to C 2:

Cramping kidney pain, renal coliC 3:

Renal colic with pain in the limbs C 3:

Lumbar pain + kidney pain C 2:

Weakness of the kidneys C 3:

Rashes + kidney problems C 3:

Heaviness kidneys C 1:

\* URINE, URINE: Willingness to repress emotions to maintain social agreement.

## Code A, AB, AC

Blood in the urine BCA 3/><:

cough; Blood in the urine after BCA 3/><:

Sediment solid, sediment BCA 3/><:

sandy sediment BCA 3/><:

Protein in urine BCA 3/><:  
Epithelial casts in urine BCA 3/><:  
black urine BCA 3/><:

## Code BC/CB

Pregnancy; Urine containing protein during BCA 3/><:

**Code C: All C symptoms are considered an internal system process and should therefore be considered underlined.**

**bifurcated ray C 2:** see "Bladder, urination, bifurcated ray"; texture of urine: type of emotional expression;

**acid, corrosive, wound-eating urine C 3:**

**dark urine C 1:**

**hot, burning urine C 1:**

**milky urine C 3:**

**copious urine C 1:**

**foamy urine, foamy C 2:**

**Mucus in the urine C 2:**

**cloudy urine C 3:**

**smell of urine:**

**smelly, foul-smelling urine C 3:**

**Horse urine, fetid as from a horse C 3:**

**Violet smell of urine C 3:**

\* **GENITALIA MALE + FEMALE:** conflict of not only being the object of sexual desire but also of being fertile, that is, not only having to perform one's sexual role, but also having to cope with the consequences.

\* **Sterility:** Conflict about having to accept the role of mother means being overwhelmed by the condition of having to provide support and care

## Code A/AB/AC

abhorrence of sexuality, being a man, being a woman A 3/><:

**touches genitals:**

men; touches genitals at A 1/>: Problem of being present as a man, having to fulfill his role and having to deal with contradiction

- **Child touches genitals (penis) AB 3/><**

- **tears at his genitals A 3/<**

**female genitalia, vulva; touches A 1/<**: Problem of feeling delivered as a woman so having to protect herself

**Genital infantilism, underdeveloped infantile genitalia BAC 3/<**

**male genitals; Infantilism BAC 3/<**

**female genitals; infantilism BAC 3/<**

**Genital atrophy, genital atrophy: Atrophy of BAC 3/>**: sexual identity crisis; male genitals;

**female genitals; Atrophy of BAC 3/<**

**Sterility, infertility BAC 3/<**

**male genitals; Sterility BAC 3/<**

**low sperm count, oligospermia BAC 3/<**

**female genitals; Sterility BAC 3/<**

**tendency to sterilize BAC 3/<**

**Coitus (A 1):**

**Aversion to coitus (woman) AB 1/<**: Feeling of only being used, but not seen in terms of value and therefore to be emotionally unconnected

**Aversion coitus (male) AB 1/<**: Rejection of having to face the expectations and challenges to one's masculinity

**coitus aggravates discomfort; while, at AB 2/<**: see above

**aggravated AFTER coitus; Complaints AB 2/>**: see above

**Pleasure absent during coitus AB 1/<**

**Coitus interruptus causes problems AB 2/>**: to be torn from emotional engagement and faced with sudden cooling down

**Back weakness AFTER coitus ABC 2/>**: Feeling as if he had now decreased in his value and lost support

**Women; painful coitus in ABC 1/<**: lack of emotional reciprocity

**Burning of the vagina during/after coitus ABC 2/<**

**men; painful coitus in ABC 1/<**: lack of emotional reciprocity

**Burning of the penis during/after coitus ABC 2/<**

**Tendency to masturbate, onanism A 1/<**: to experience fulfillment without having to expose yourself emotionally, having to meet conditions of sexual reciprocity

**Children; Tendency to masturbate, onanism BA 3/><**: development problem

**Masturbation; Complaints by BA 1/<**

**Problems with orgasm, lack of orgasm (weak sexual ability) BAC 3/<**: Problem with letting go oneself emotionally, being held back by moral concerns

**orgasm difficulties, lack of orgasm BAC 3/<**: see above "orgasm";

**Ejaculation, semen discharge, ejaculation, orgasm prematurely, too quickly, too quickly, praecox BAC 2/<**: only wanting to get sexually involved superficially, but not actually wanting to expose themselves to emotional closeness

**Menses; Tendency to masturbate in BAC 3/><**

**desire absent, weak; sexual; Frigidity A 1/<**

**Ovulation; sexual desire absent at BA 3/><**

**desire increased; sexual A 1/>**

**insatiable sexual desire A 3/>**

**desire increased in men; sexual A 1/>**

**Excitability of genitals in men A 1/>**

**suppressed sexuality in men BA 3/>**

**desire increased in women; sexual A 1/>**

**suppressed sexuality in women BA 3/>**

- **Excitability genitals in women BA 1/>**

**Coitus does not eliminate desire BAC 2/><**: being emotionally unrelated to sexual partners, therefore not being able to fulfill one's sexual desire, only being able to deal with it mechanically

**menses, menses; strong sexual desire in the BA 3/><**: wishes to counteract the perceived loss of social value during menstruation through sex

strong sexual desire at night BA 2/>: counteract the lack of connection at night through sex

flaccid genitals with strong desire ABC 3/><:

Atrophy of the genitals C 3:

Pushing down the genitals:

male genitals; Pushing the down: BCA 3/><:

female genitals; pain pressing down the BCA 3/><:

## Code BC/CB

suppressed gonorrhoea BC 3:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

Discharge: see below "female genitalia, discharge

Sensitivity genitals BA 1/>:

genital skin rashes: in women C 1:

genital skin rashes: in men C 1:

Venereal diseases C 3: see below "Sexual sphere – venereal diseases";

Ulcers of the genitals C 3: see below "Sexual sphere – rashes; genital, ulcers;"

Gonorrhoea, gonorrhoea C 3:

Gonorrhoeal discharge: see "Bladder, urethra, gonorrhoeal discharge";

hair loss; genital C 3:

rashes; genital C 1: see below "Sexual sphere, skin rashes";

Erysipelas in the genital area C 3:

male genital area; erysipelas-like rash in C 3:

female genital area; Erysipelas in C 3:

Genital ulcers C 3:

male genitals; Ulcers of the C 3:

female genitals; Ulcers of the C 3:

Oral and vaginal ulcers C 3:

genital herpes:

genital herpes; Men C 2:

genital herpes; Women C 2:

scrotum; Rash C 1: see "male genitals, testicles, rash scrotum";

Itching in the male and female genital area C 2:

voluptuous genital itching in men C 2:

voluptuous genital itching in women C :

Condylomas on genitals C 3: see below "Warts on genitals";

Cracks, fissures in the genital area:

Cracks of male genitals C 3:

Tears of female genitals C 3:

Foreskin; Rash of: see "male genitalia, foreskin, rashes";

Sweat of the genitals C 1:

Sweat of the male genitals C 1:

Sweat of female genitals C 1:

Discharges, foul-smelling perspiration of the genitals:

malodorous male genitals 3C:

foul-smelling female genitals 3C:

see above "Discharges, sweat; foul-smelling";

swelling genitals:

male C1:

**female C 1:**  
**warts on genitals; Condylomas C 3:**

- \* **GENITALIA MALE:** Conflict, as a man, having to impress through presence as well as providing support through his assertiveness, but at the same time having to accept that this role exposes him to contradiction and prevents him from asserting himself.
- \* **Penis:** conflict, to impress as a man, having to both stand up for yourself and meet social challenges in order to be respected.
- \* **Testicles:** Conflict to unfold fruitfully as a man, to be special through social dynamics and thereby respected.
- \* **Prostate:** Conflict of having to accept that one can no longer live up to one's demands for presence as a man, and that one can only suppress one's displeasure about this inability.
- \* **Ejaculation:** Conflict not to be able to fulfil one's potential, one's special being, one's fertility and thus being not able to confirm oneself as a man.

## **Code A/AB/AC**

**Ejaculation BA 1:**

**bloody ejaculation BCA 2/><:** sexual desire can only be fulfilled in conflict with unfulfillable social norms, meaning that one stands with one's urges against them

**Involuntary discharge of semen, pollution AB 3/><**: see below "involuntary effusions, pollutions";

**painful ejaculation BCA 2/><**: see above "bloody..."

**Weakness after ejaculation, ejaculation BAC 2/>**:

- . **Back weakness AFTER ejaculation, ejaculation BAC 2/>**: Feeling as if he had now decreased in his value and lost support

- . **Weakness in the lumbar region after ejaculation, ejaculation BA 2/>**: see above **failing coitus; Ejaculation ABC 2><**:

- **orgasm without ejaculation ABC 3/><**: see above "**failed coitus, ejaculation**";

**premature, too rapid ejaculation, praecox BAC 2/><**: only wanting to get involved superficially, but not actually wanting to expose themselves to emotional closeness

**Pollutions, involuntary effusions AB 3/><**: just repressing his unfulfilled urge <

**Erection; Pollutions without AB 3/><**: see above "Pollutions, involuntary effusions";

**Excitement; Pollutions through sexual AB 1/><**:

**mental exhaustion after pollution AB 1/><**:

**Sleep; Pollution in BA 2/>**:

**Dream; Pollutions at night while sleeping with AB 2/>**:

**urination, defecation; involuntary ejaculation in BAC 3/><**: Despite efforts to convince in his sexual role, he cannot convince as a man and can only experience himself as inferior

**Erection problem A 3/<**: lack of sexual selfconfidence, not being able to rely within oneself:

**persistent erection, priapism A 3/><**: thinks being exposed as a man to competition from others, not being allowed to back away, having to face up, be present

**at night; Erections BA 2/>**:

**spinal disease; Erections at CA 3/><**: being not sufficiently consolidated within himself as a man but he has to convince without being able

**Erection without sexual desire A 3/><**: he only wants to emphasize his presence as a man but doesn't want to prove himself sexually

**lack of erection A 3/<**:

**lack of erection with sexual desire A 3/><**:

**fright during coitus ; lack of erection after/due to BAC 3/><**:

**Burning urethral pain with erection CA 2/><**: On the one hand, wanting to be sexually present, on the other hand, not wanting to get involved emotionally, therefore not finding fulfillment, only being able to heat up and rub yourself inside

**urge to urinate causes erections BA 2/><**: on the one hand, you want to prove yourself, want to impress as a man, but being not able to fulfill this claim and instead have to let go and repress it

**reasonless, involuntary erection A 3/><**:

**severe erection or no erection at all A 3/><**:

**painful erection AC 1/<**:

**Bowel movement; Erection at BA 2/><**: wanting to compensate for the unpleasant fact of not being socially accepted but rather separated as inferior

**incomplete, flabby during coitus; Erection AB 3/><**:

**futile erection BA 3/><**;

**testicles**

**children; Testicle rupture, hydrocele (hydrocele) at BCA 3/><**:

**Bruise; Testicular inflammation after BCA 3/><**:

**Undescended testicles, testicular retraction BCA 3/><**:

**Testicular atrophy, but also underdeveloped, atrophied testicles BCA 3/><**:

**testicular hernia, hydrocele, water testicles (hydrocele) BCA 3/><**:

**Varicocele (varicose vein hernia scrotum) BCA 3/><**:

**Injury; Testicular swelling after BAC 3/><**:

**Impotence A 3/<**:

**Wake up; Impotence after (potency, erection during sleep) BA 2/><**:

**debauchery, masturbation; Impotence after sexual BA 3/><**:

**sexual desire with impotence A 3/><**: wanting to prove yourself but not wanting to face the challenge

**Despair + impotence A 3/<**:

**Coitus; Problems with AB 2/<**: see above "erection", "impotence" and "sexual sphere in general, coitus";

**stiffening of the penis, painful; Priapism A 3/><**: see above "erection, persistent";

**Coitus; Penis pain, penis burning during/after AC 2**

**Penile atrophy, atrophy of the penis BAC 3/><**:

**Phimosis, narrowing, constriction of the foreskin BCA 3/><**: see "Foreskin" below;  
see "Female genitalia, labia adhesions";

**phimosis; Tendency to gangrene in BAC 3/><**

**Adhesions of the foreskin BAC 3/><**:

**Paraphimosis BCA 3/><**:

**Pollutions AB 3/><**: see above "Ejaculation, involuntary";

**prostate problems C 3/<**: has to accept that ultimately he can only suppress the fact that as a man he is no longer able to meet his demands for presence

**Prostate problems after coitus, coitus agg. ABC2/<**:

**discharge of prostate secretion; involuntary BCA 3/><**:

**Bowel movement; Prostate secretion in BCA 3/<**:

**dribbling prostate C 3:** see above "Prostate secretion discharge; more involuntary";

**Urinate; Prostate secretion in BCA 3/>**: see B file

**involuntary urination with enlarged prostate BCA 3/><**: being exposed to impossible challenges and, despite his best efforts, he is only able to resign and involuntarily let them go

**old people; Swelling prostate, prostate swelling BAC 3/><**:

**Testicular cancer BCA 3/><**:

**lumps of the testicles; Testicular node BCA 3/><**:

**Tumor of the testicles, testicular tumor BCA 3/><**:

**Hydrocele BCA 3/><**: "Testicles, testicular hernia";

**Inflammation of the epididymis BCA 3/><**:

**Penis chorda BCA 3/><**: see below "Penis curvature";

**Penis curvature BCA 3/><**:

**Cancer of the penis, Penile cancer BCA 3/><**:

**Acorn cancer BCA 3/><**:

**Penis retraction, penis pulled up BCA 3/><**:

**Prostate cancer BCA 3/><**:

**tumor of the prostate; Prostate tumor BCA 3/><**:

**Tumors of male genitals BCA 3/><**: see "Testicles, testicular tumor" above;

**thighs and scrotum; Tumor between BCA 3/><**: see below "female genitals, tumors, thighs and vulva, tumor between";

**underdeveloped testicles BCA 3/><**:

## Code BC/CB

testicles:

Gonorrhea; Testicular inflammation after suppressed BC 3:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

. Secretion of the male genitalia 3C:

Secretion of mucus and pus from the glans (glans) C 3:

smegma; increased C3:

Rashes C 1: see above "Genitals, rashes" and below "Testicles, rash scrotum" and "Foreskin, rash";

testicles:

in the crotch between the scrotum and inner thigh; Complaints in the C 2:

Rash on the scrotum, scrotum C 1

Testicular inflammation, orchitis C 3

Inflammation of the salivary glands + testicles: see "mouth, inflammation of the salivary glands";

Testicular pain C 1:

Testicular swelling C 1:

Coldness of the testicles C 1:

flaccid testicular sac C 1:

scrotum, scrotum; Complaints of the C 1:

Hardening of the testicles C 3:

Penis:

Abscess penis C 3:

Penile atrophy BC 3: see "Penile atrophy" below;

Complaints of the penis, inflammation of the penis C 3:

Inflammation of the penis due to coitus ABC 2/><:

Acorn; Complaints of the C 1

Glans ulcer C 3:

Cancer of the glans C 3: see below "cancer of the penis, cancer of the glans";

suppuration under the foreskin C 3: see "Foreskin" below;

Inflammation of the penis C 3: see "Penile disorders" above;

Numbness, numbness of the penis CA 1/<:

Ulcers of the penis C 3:

Rashes of the penis C 1:

Acorn; Rash of the C 1:

Cold of the penis C 1:

Condylomas of the penis C 3:

Penile ulcer C 3:

Glans ulcer C 3:

Penile gangrene C 3:

syphilitic chancre BCA 3/><:

Cracks, dryness of the penis C 3:

Pain of the penis, penis pain C 1

Swelling of the penis, penis swelling C 1:

Dryness of the glans: see above "Cracks of the glans";

Prostate problems, prostatitis, prostate inflammation C 3:

Urinary blockage due to enlarged prostate C 3: see "Bladder, urinary retention, prostate enlargement + urinary blockage";

Swelling of the prostate, prostate swelling C 1:

Sperm cords, vas deferens C 1:

Pain in the spermatic cords C 1:

- Spasms of the spermatic cords C 2:

- Neuralgia of the vas deferens, spermatic cord neuralgia C 3:

- Pain in the spermatic cords after exertion BC 2:

Sweat of the male genitals C 1:

Foreskin C 1:

Suppuration under the foreskin C 3: see below "ulcer of the foreskin, suppuration";

Inflammation of the foreskin C 3:

inner surface of the foreskin; Inflammation C 3:

Ulcer of the foreskin, foreskin ulcer C 3:

Suppuration under the foreskin C 3:

inner surface of the foreskin; Ulcer on the: see above "Inner surface of the foreskin; Inflammation";

Rash of the foreskin C 1:

Foreskin herpes C2:

- \* **GENITAL FEMALE:** Conflict of having to appear attractive as a woman and impressing through social actions, while at the same time having to accept that her caring role prevents her from developing.
- \* **Ovaries:** Conflict, to emerge fertile as a woman through creativity, to want to position yourself socially, but on the other hand she should fulfill her family role in order to be accepted.
- \* **Fallopian tubes:** conflict of not wanting to engage in motherhood.
- \* **Uterus, Uterus C 1:** Conflict to adopt the mother role or caregiver and therefore to be social indispensable on the one hand, but in the other to feel restricted in that role without experience reciprocity.
- \* **Cervix (incl. portio and ostium):** conflict of being accepted only through sexual devotion but not as a woman (in her social indispensability).
- \* **Vagina C 1:** Conflict of being ready to indulge emotionally, but ultimately to experience no emotional reciprocity, so to be without fulfillment.

## **Code A/AB/AC**

### **Abortion BAC 3/><:**

**congenital tendency to abortion, tendency to abortion BAC 3/><:**  
**Excitement; Abortion by BAC 3/><:**

- Fluorine, discharge at abortion BAC 3/><:**  
**Mental symptoms, sadness after abortion CA 3/><:** see "Mind, children; ailments from death of', and 'mind, abortion; sadness, melancholy after";  
**Cough; Abortion through BAC 3/><:**  
**easy conception, rapid abortion BAC 3/><:** development problem  
**News; Abortion after bad BAC 3/><:**  
 shock, fright; **Abortion by BAC 2/><:**  
**Stillbirth; Tendency to (foetus dead) BAC 3/><:**  
**Infertility of the uterus BAC 3/><:** see below "underdeveloped uterus";  
 - vibration; **Uterine pain in BAC 3/><:**  
**underdeveloped, infantile uterus BAC 3/><:**  
**Complaints during childbirth, tendency to complications BAC 3/><:**  
**cervix, cervix; more rigid at delivery BAC 3:**  
**uterine tone weak, flaccid; Atony at delivery BAC 3/><:**  
**slow delivery BAC 3/<:**  
**Placenta praevia, the placenta blocks the birth canal BAC 3/><:**  
**Placenta retained, placenta retained, not released BAC 3/><:**  
**labor pains BAC 3/><:** see below "Birth problems, labor";  
**Complaints after childbirth, consequences of childbirth BAC 3/><:**  
**abdomen after birth; flabby Pot belly BAC 3/><:**  
**Abdomen enlarged after childbirth BAC 3/><:**  
**bleeding, metrorrhagia after childbirth; strong BAC 3/><:**  
**stretching of the pelvic ligaments; Pubic symphysis, symphysis BAC 3/><:**  
**Exhaustion, weakness, burn out after childbirth BAC 3/><:**  
**Uterine inflammation after childbirth BAC 37><:**  
**Urinary retention, urinary retention after childbirth BAC 3/><:**  
**Hemorrhoids from childbirth BAC 3/><:**  
**Childbed Fever BAC 3/><:**  
**Cramps, postpartum convulsions BAC 3/><:**  
**Lochia long lasting, dragging on BAC 3/><:**  
**After-pains BAC 3/><:** see below "Pain, after-pains";  
**Menses after childbirth, abortion increased BAC 3/><:**  
**labor pain BAC 3/><:**  
**extends to thigh; Labor Pain BAC 3/><:**  
**excessive, too painful contractions BAC 3/><:**  
**false labor BAC 3/><:**  
**Cramps begin, contractions stop on BAC 3/><:**  
**cramping, spasmodic contractions BAC 3/><:**  
**weak, suppressed, insufficient contractions BAC 3/><:**  
**futile labor pains BAC 3/><:**  
**Menstrual disorders BAC 3/><:** see below "Menstrual disorders";  
**writhing in uterine pain CB 2:**  
**fetus retained dead BCA 3/><:** see below "Delivery problems, fetus...";  
**Fluorine C 3/<:** not to be socially indispensable but to be separated as superfluous  
**Excitement; Fluorine at AC 2/<:**  
**hysterical women; Fluorine AC 3/><:**  
**Ovulation pain BAC 3/><:**  
**Operation sequences: Removal of ovaries BAC 3/><:** reduced by an external intervention and to be no longer able to social develop;  
**Discharge:**  
**old women; Discharge BAC 3/><:**  
**Girl; Discharge in young BAC 3/><:**  
**Uterine prolapse, uterine prolapse C 3/><:** as a woman, her social role is questioned, and therefore she feels to lose support and to fall  
**Aphasia, speech loss + uterine prolapse, uterine prolapse CA 3/><:**

**complaints AFTER childbirth BAC 3/><** feeling of being rejected from the close relationship with the child and abandoned

**Mental symptoms DURING childbirth BA 3/><**: afraid of not being able to cope with the role of mother

**Postpartum depression, postpartum depression BA 3/><**:

**childbirth; Uterine inflammation after BAC 3/><**:

**irritability, hysteria DURING childbirth BA 3/><**:

**childbirth; Incontinence, involuntary urination AFTER BCA 3/><**:

**Madness in childbirth BA 3/><**:

**menarche; early; Normal entry before normal age BAC 3/><**:

**menarche delayed; late regular entry BAC 3/><**:

**menses BA 3/><**: Problem of accepting that her social value has fallen

**Anxiety during menses BA 3/><**:

**Missing menses in nervous women, caused by emotional excitement AB 3/><**: to be easily shaken as a woman and mother, feels that she is not valued, worthless and unsuitable

**Mental symptoms BEFORE menses BA 3/><**:

**Anger BEFORE menses, Menses BA 3/><**:

**Mental symptoms DURING menses BA 3/><**:

**Anger DURING menses BA 3/><**:

**Mental symptoms AFTER the menses BA 3/><**: having to accept the social pressure of expectations as a woman in order to be accepted

**coitus, anger, anger, annoyance; Menses after BAC 3/>**:

**Fainting from menstrual pain, pain Menses ABC 3/><**:

**suppressed menses B 3/<**: feels unable to fulfill the woman's role and the conditions associated with it (fertility, care).

**hysterical women; Menses suppressed in ABC 3/><**:

**nervous women, suppressed menses from emotional excitement ABC 3/><**:

**fright, shock; suppressed menses according to BAC 3/><**:

**Sadness; suppressed menses by ABC 3/<**:

**suppressed menses; Anxiety, fear after/with suppressed menses BCA 3/<**:

**Girl; Menses problems young BC 3/><**:

**Metrorrhagia, bleeding between periods, bleeding from the uterus BCA 3/><**: signals that as a woman she is constantly exposed to demands beyond her ability to adapt

**emotions, excitement; Metrorrhagia due to AC 3/<**:

**pregnancy problems BA 3/><**: to be exposed to social pressure of expectation, of being harassed by the child as well as by the social environment

**Emotional symptoms, arousal during pregnancy BA 3/><**:

**Psychosis in pregnancy, pregnancy psychosis BA 3/><**:

**Hysteria during pregnancy BA 3/><**:

**Insomnia in pregnancy BAC 3/><**:

**False pregnancy AB 3/><**:

**Urinary retention during pregnancy BAC 3/><**:

**Coitus; Vaginal pain DURING ABC 2/<**: not being able to bring yourself to emotional devotion, not being able to allow emotional closeness

**aching; Vaginal pain AFTER coitus AC 2/>**: to be rejected from the close relationship with the partner, to be abandoned

**coitus; Vaginal inflammation due to ABC 2/>**:

**loss of sensation in the vagina during coitus ABC 2/<**: emotional restrain

**Change, climacteric, menopause BA 3/><**: to be as a woman, no longer fully fledged and therefore exposed to changed social integration and validity conditions

**Hysteria during menopause BA 3/><**:

**Sadness during menopause BA 3/><**:

**Uterine prolapse, uterine prolapse BCA 3/><**:

**Pressing on vulva, pressing against hands relieves ; Uterus, uterus, pushing down, prolapse BCA 3/><**:

- Bowel movement; Uterine prolapse during BCA 3/><  
urge to defecate; Uterine prolapse with persistent BCA 3/><  
constipation; Uterine prolapse with BCA 3/><
- Bleeding in fibroids BCA 3/><  
life-threatening severity of metrorrhagia, profuse bleeding BCA 3/><
- stillbirth BAC 3/><: see above "abortion, stillbirth";
- Tumors, cancer of the female genital organs BCA 3/><  
Ovarian cancer, ovarian cancer BCA 3/><  
Ovarian tumors BCA 3/><  
Ovarian cysts, ovarian cysts, wind eggs BCA 3/><  
Uterine cancer BCA 3/><  
Uterine myoma, tumor uterus, uterus BCA 3/><  
Bladder; Uterine myoma presses on BCA 3/><  
Uterine polyp BCA 3/><  
Uterine tumors BCA 3/><: see above "uterine myoma";  
Polyps of the uterus BCA 3/><: see "Tumors, uterine polyp";  
Uterine cysts BCA 3/><  
thigh and vulva, in crotch; Tumor between BCA 3/><
- vaginal problems:  
Labia Bonding Babies BAC 3/><  
vaginal cancer BCA 3/><  
Vaginal polyps BCA 3/><  
Vaginal cysts BCA 3/><  
Cervical cancer – cervical cancer BCA 3/><  
prolapse, prolapse of the vagina, vaginal prolapse BCA 3/><  
Efforts such as lifting, straining to defecate, etc. cause vaginal prolapse BCA 3/><  
Pregnancy; Vaginal prolapse in BBCA 3/><  
Bowel movement; Vaginal prolapse at BCA 3/><  
Cysts in the vagina BCA 3/><: see "Tumors of the female genital organs" above;
- breastfeeding; Menses during BAC 3/><: see "breast, mammae, breast milk production"
- Girl; missing menses in young BAC 3/><  
plethoric women (prone to full blood); missing menses at BCA 3/><  
life-threatening strength of the menstrual period BCA 3/><  
young girls; scanty menstrual bleeding with BCA 3/><  
Girl; suppressed menses in young BCA 3/><: see "suppressed menses" above;  
Visual disturbance, vision loss with suppressed menses BCA 3/><
- Pregnancy problems BCA 3/><  
abortion, birth; increased menstrual bleeding after BCA 3/><  
Complaints during pregnancy BCA 3/><  
Pregnancy; worse afterwards, worse after pregnancy, after childbirth BCA 3/><  
Pregnancy improves conditions Complaints BCA 3/><  
Shortness of breath during pregnancy BCA 3/><: see "Breathing, shortness of breath, pregnancy";  
Bleeding, metrorrhagia during pregnancy BCA 3/><  
Vomiting, nausea during pregnancy BCA 3/><  
Cough in pregnancy BCA 3/><  
Cramps in pregnancy, eclampsia BCA 3/><  
Pregnancy; Menses during BC 3:  
Heartburn in pregnancy BCA 3/><  
Salivation in pregnancy BCA 3/><: see "mouth, salivation, pregnancy in";  
Toxoplasmosis BCA 3/><  
Nausea in pregnancy BCA 3/><: see "Stomach, vomiting, pregnancy in";
- climacteric change, menopause BCA 3/><  
uterine myoma after change; BCA 3/><

Alternating hot flashes, climacteric BCA 3/><:  
premature; Change, climacteric, menopause BCA 3/><:  
switch back on; Menstrual bleeding after cessation of the normal cycle, set after  
BCA 3/><:  
climacteric change, menopause; Rule according to BCA 3/><:  
alternation, menopause; heavy menstrual bleeding before BCA 3/><:  
menopause, change; Metrorrhagia BCA 3/><:

**Menses; the heavier the bleeding, the less menorrhagia, the less bleeding the greater the pain BAC 3/><:**

standing aggravated ; heavy menstrual periods BAC 3/><:

**Nausea + profuse menstrual bleeding BAC 3/><:**

**foul smelling menses BAC 3/><:**

**irregular menses, menses BAC 3/><:**

suppressed menses, Menses BAC 3/><:

bathing, cooling off; suppressed menses after BAC 3/><:

**vicarious menses, menses, menstrual bleeding elsewhere BAC 3/><:**

**bill of exchange; Menses according to BAC 3/><:**

**Female genital pain**

**during menses, pain in female genitals BAC 3/><:**

- **ovaries, ovaries; Pain during menses, menses BAC 3/><:**

- **Uterus, womb, pain during menses, menses BAC 3/><:**

**after menses; Female genital pain BAC 3/><:**

**before menses: female genitalia pain BAC 3/><:**

**womb, uterus**

**menses, menses; Feelings of sagging of the uterus with the BAC 3/><:**

**Menses; Lowering feelings with the BAC 3/><:**

**ovaries:**

**ovulation pain; Ovulation; Pain with BAC 3/><:**

**vagina:**

**menses; Symptoms of the vagina before the period BAC 3/><:**

**menses; Discomfort of the vagina during BAC 3/><:**

**menses, menses; Discomfort, pain of the vagina during BAC 3/><:**

## **Code BC/CB**

**ovaries**

**Bending, curling up relieves ovarian pain BC 2:**

**Go; Ovarian pain with BC 2:**

**Urinating, ovarian pain on BC 2:**

**vagina**

**urination; Itching of the vagina with BC 2:**

**metrorrhagia**

**Effort; Intermenstrual bleeding, metrorrhagia at BC 3:**

**childbirth; heavy bleeding, metrorrhagia according to BCA 3/><:**

**vagina**

**menses, rule; Discomfort, pain of the vagina during BAC 3/><:**

**Urinate; Vaginal burning after BC 2:**

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

**Discharge, fluorine C 2:**

**caustic, sharp discharge C 3:**

**bloody discharge C 3:**

**Bladder irritation + bloody discharge C 3:**

**chronic discharge C 3:**

**dyes laundry; Fluorine CA 3/>:**

**itchy discharge, fluorine C 2:**

- Lumpy, curdled discharge, like cooked starch C 3:
- sharp, galling discharge C 3: see above "corrosive discharge";
- mucous discharge, fluorine C 2:
- foul-smelling discharge C 3:
  - fish brine; Discharge smelly like C 3:
  - sour smelling discharge C 3:
- Bleeding C 3: see below "Menstrual disorders" and below "Pregnancy, bleeding";
- Fallopian tube C 1:
  - Fallopian tube inflammation, salpingitis C 3:
  - Hydrosalpinx, swelling, accumulation of fluid in the fallopian tubes C 3:
- Ovaries, ovaries C 1:
  - Ovarian inflammation, oophoritis C 3:
  - Ovarian pain C 1:
    - extends to the knee; Ovarian pain C 2:
    - extends to thigh; Ovarian pain C 2:
    - Menses; Ovarian pain during B 3:
  - Ovarian neuralgia C 3:
- womb, uterus C 1:
  - Bleeding from the uterus, metrorrhagia: see below "Menstrual problems, intermenstrual bleeding, metrorrhagia";
  - Cervix – Cervix: see "Cervix" below;
  - Uterine sensations:
    - conscious feeling of the uterus C 1:
    - Heaviness of the uterus, uterus is heavy like a stone C 3:
    - constriction of the uterus; Feeling of the C 2:
      - iron band, wire around uterus; Feeling of a C 3:
  - Uterine inflammation, metritis C 3:
    - Endometritis, inflammation of the lining of the uterus C 3:
  - Uterine gangrene C 3:
  - Uterine cramps C 2: see below "pain of the uterus";
  - Uterine neuralgia C 3:
  - Hardening of the uterus C 3:
  - Hot flashes from the uterus to the head, neck C 2:
  - Sciatica problems caused by uterine problems C 3:
  - Uterine pain C 1:
    - extends to the thigh; Uterine pain C 2:
    - Cramps, uterine cramps C 2:
      - Neuralgia of the uterus C 3: see above "uterine neuralgia";
  - Swelling, uterine swelling C 1:
  - Cervix, cervix (incl. portio and ostium - cervix) C 1:
    - Cervical inflammation C 3:
    - Cervical ulcer, cervical ulcer C 3:
      - Cervical ulcer C 3: see "cervical ulcer" above;
    - Portioerosion, erosion of cervix C 3:
  - Skin rashes C 1: see above "Genitals, skin rashes";
  - Ovaries C 1: see "Ovaries" above;
- Menstrual disorders – bleeding B 3:
  - Intermenstrual bleeding, bleeding from the uterus, metrorrhagia C 3:
    - Anemia due to metrorrhagia C 3:
    - Clotted bleeding between periods, metrorrhagia C 3:
    - slow, persistent metrorrhagia (spotting bleeding) C 3:
    - sparse metrorrhagia (spotting?) C 3: see above "slow metrorrhagia";
- Menstrual disorders – pain BC 3:
- Labia problems C 1: see "Vagina" below;
- Pain in female genitals C 1:
  - Pubic bone pain C 1:

- extends to the pubic region, pubis; Sacral pain C 2:
- Sweat of female genitals C 1:
- Vagina C 1:
  - in the crotch between the vagina and inner thigh; Complaints in the C 2:
  - Abscess of the female genitalia (vagina, vulva) C 3:
  - Inflammation of the vagina C 3: see "Vaginal inflammation" below;
  - Ulcer of the vagina C 3:
  - Heat of the vagina:
  - Itching of the vagina, vulva C 2:
    - Itching between labia C 2:
  - Spasm of the vagina, vaginal spasm C 2:
  - Irritation of the vagina C 1:
  - Cracks vagina, vulva C 3:
  - Pain, inflammation of the vagina, vaginitis C 3:
    - burning pain of vagina C 1:
    - sore pain of vagina C 1:
  - Swelling of the labia (labia) C 1:
    - Swelling of the labia + itching C 2
  - Swelling of the vagina C 1:
  - Dryness vagina C 1:
  - Vaginal inflammation, vaginitis, vaginal problems C 3:
    - chronic vaginal inflammation C 3: see above "vaginal inflammation";
  - Vaginismus, painful vaginal tightness C 2:
  - Vaginal itching C 2: see "Itching of the vagina" above;
  - Growths, warts, condylomas of the vaginal area C 3:
  - Constriction of the vagina C 2:

\* LARYNX, LARYNX C 1: Conflict of not having a voice in his environment, i.e. to be in the impressiveness of what he says, without resonance.

## Code A/AB/AC

inhalation of cold air; Larynx sensitive to BC 2/>:

To sing; Larynx aggravated by AC 2/<: is afraid to expose himself emotionally

Speak; Laryngeal irritation from AC 2/<: to be emotionally without consensus due to a lack of communicative agreement

Throat cancer BCA 3/><:

Laryngeal paralysis, paralysis of vocal cords BCA 3/><:

Laryngeal necrosis BCA 3/><:

Laryngeal spasms, laryngism stridulus, glottal spasm BCA 2/><:

Laryngeal tuberculosis BCA 3/><:

## Code BC/CB

Cough; Clearing the throat aggravates BC 2:

Gagging, contraction of inner throat when clearing throat BC 2:

Swallow; Laryngeal pain with BC 2:

Sleep; Laryngeal constriction in BC 2: must limit the communicative connection in order to let go of control

**Code C: All C symptoms are considered an internal system process and should therefore be considered underlined.**

Foreign body sensation in the larynx C 3:

Laryngitis, laryngeal catarrh, laryngitis C 3:

Laryngeal irritation C 2:

clear your throat; Inclination to C 2:

Clear phlegm, remove by clearing C 2:

Laryngeal pain, Laryngeal pain C 1:

vocal cords C 1:

Glottis (glottis) and vocal cord swelling, edema C 2:

- Suffocating vocal cord edema BCA 3/><:

Condylomas of the larynx, the vocal cords C 3:

Constriction of the larynx C 2:

**Shortness of breath + laryngeal constriction C:**  
**Cough + laryngeal constriction C 2:**

\* **VOICE:** Problem of vocal presence as a result of a lack of certainty regarding social resonance (strong voice > certainty, weak voice > uncertainty, hoarseness > wavering certainty)

## Code A, AB, AC

**affected, mannered language A 1/>:** feels not heard, therefore has to attract attention through the contrast of unusual effects

**Articulation problems A 1/><:** emotionally distant and therefore also communicatively fuzzy, difficult to understand in his statements

**uses wrong words A 3/<:**

**monosyllabic; answers A 1/<:**

**strange language A 3/>:** see above "affected, mannered language"

**hasty speaking A 1/<:** wishes to communicate quickly and only want to briefly present themselves to the attention of the social environment

**loquacity, fluency, talkativeness A 1/>:**

**the topic keeps changing; Talkativeness A 1/>:**

**Fever; Talkativeness during CA 2/<:**

**silence; Talkativeness changes with A 1/><:**

**Desire to speak regardless of whether anyone is listening A 3/>:**

**slow language A 1/>:** to communicate clearly and want to convince the social environment through clarity

**loud voice, tendency to make noise A 1/>:**

**quiet voice, whispers, whispering A 1/<:**

**hoarseness C 2:**

**Speaking improves hoarseness AC 2/>:**

**Speak; Hoarseness due to AC 2/<:**

**Mucus in the larynx prevents speaking; Hoarseness due to CA 2/<:**

**anger, annoyance; Hoarseness, voice discomfort, loss of voice AC 2/<:**

**learns to speak late, learning to speak late BAC 3/><:** development problem

**Language, speech disorder, unclear, incomprehensible, inarticulate speech A 3/><:**

see above "articulation problems"

**Shortness of breath when speaking AC 2/><:** wants both to express himself and hold back

**intoxicated, slurring speech A 3/><:** not following the communicative norms and therefore not being able to express themselves appropriately

**obscene language A 1/><:** having to violate social norms in his statements in order to be noticed

**Stroke, apoplexy (brain stroke, blood vessel burst); Speech disorder according to BCA 3/<:**

**mispronounces words A 1/<:** see "strange expression" above;

incoherent speech, makes mistakes when speaking, promises A 1/><:  
Language loss, aphasia A 3/<: to be without connection with the conditions of communicative reciprocity and therefore without the possibility of understanding  
apoplexy; Language loss after BAC 3/<:  
Fever; Language loss in CA 3/<:  
Paralysis; Speech loss, aphasia, speech paralysis CA 3/<:  
 shock, trauma, injuries (including mental ones); Language loss after BAC 3/><:  
 exhaustion, exhaustion; Language loss due to BA 2/<:  
tongue paralysis; Language loss due to CA 3:  
Selftalk, speaking to yourself A 1/><: of being thrown back on yourself as a communication partner  
Desire to speak regardless of whether anyone is listening A 3/>:  
itself in society; always speaks of A 1/>:  
 Speak:  
 Speaking, conversations improve A 1/>:  
 Speaking, conversations aggravated A 1/<: in the feeling of a lack of social approval, communicative without connection, of being emotional isolated  
Loss of voice A 3/<: to be in dissonance with the environment, without having social harmony  
Stomach pain with loss of voice CA 3/<:  
nervous aphonia; Loss of voice nervously, when nervous, excited; Voice lost, nervous hoarseness AC 3/<:  
 shock, fright; Loss of voice due to AC 2/><:  
 strain of voice; Loss of voice due to BCA 2/<:  
stuttering, speech stuttering A 2/><: wants both to express himself and hold back  
 Excitement; stutters at A 2/<:  
 Strangers; stutters when speaking with A 2/<: corresponds to excitement  
 Coitus; stutters after A 2/>:  
 failing, intermittent voice when singing AC 2/<:  
 verses, poems; makes A 1/>:  
repeats the same over and over again A 1/>:  
repeats words and gestures A 1/>: see above "repeats the same thing over and over again";  
 Read; Hoarseness according to AC 2/<:  
thick voice; occupied CA 2/<:  
Paralysis; Speech problems due to BCA 3/<:  
failing, intermittent voice CA 3/<:  
scream; want, can't CA 3/<:

## Code B, B.C

### hoarseness

Hoarseness in the morning BC 2  
 Wind; Hoarseness when walking against the BC 2:  
 Wind; Loss of voice in cold BC 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

### Hoarseness C 2:

Chest pain with hoarseness C 2:  
 chronic hoarseness C 3: constant moodiness: see "hoarseness" above;  
 Heartache with hoarseness C 2:  
 Stomach pain with loss of voice C 2: see below "Loss of voice; stomach pain with"  
 Pleural pain with hoarseness C 2:

Runny nose + hoarseness C 2:  
 Voice, vocal peculiarity:  
 childlike, squeaky voice C 1:  
 shrill voice C 1:  
 weak; Voice C 1:

\* **BREATHING:** Conflict of being communicatively voted to the environment, i.e. being able to agree with the convincing statements of others or receiving approval from others for one's own convincing statements.

## Code A, AB, AC

**Breath holding:** communicatively, suddenly being thrown back on oneself without reciprocity, so to be unrelated, unconnected

Fall asleep; Breath holding with BAC 2/><:

shock, fright, after fall; Breath held by BAC 2/><:

Speak; Breathing stopped at AC 2/<: only being able to express oneself against one's own reservations, communicatively as if cut off, being thrown back on oneself

Anger; Breath held at AC 2/<:

**Shortness of breath:** to be exposed to social non-commitment, so to be thrown back on oneself

alcoholics; Asthma, shortness of breath with BAC 3/><:

Asthma allergic, allergy, allergy tendency + asthma BA 3/><:

old people; Asthma BAC 3/><:

shortness of breath, congenital asthma BAC 3/><:

anger; aggravation; Shortness of breath due to AC 3/<:

fear causes shortness of breath AC 3/<:

mental effort; Shortness of breath AC 2/<:

Fall asleep; Shortness of breath in BAC 2/><:

Excitement; Shortness of breath, asthma with AC 2/<:

Fear of suffocation BAC 3/>: see "Mind, anxiety, fear of suffocation";

Awakening; Shortness of breath upon awakening BAC 2/><:

wheezing when awakening BAC 2/><:

Awakening due to shortness of breath; Shortness of breath awakens from sleep BAC 3/><:

Hay asthma without hay fever; Asthma caused by pollen, hay BAC 2/><:

hysterical shortness of breath AC 3/><:

coitus; Asthma, shortness of breath after BAC 2/>:

children; Asthma in BAC 3/><:

small children; Asthma in BAC 3/><:

children; Breathing rattling BAC 3/><:

grief; Shortness of breath, asthma due to AC 2/<:

Laughing with shortness of breath, asthma; Breathing worse when laughing AC 2/><:

nervous; Shortness of breath AC 2/><:

newborns; Threatening suffocation at BAC 3/><:

sudden shortness of breath BAC 3/><:

fright; Shortness of breath, asthma due to BAC 2/><:

write; Shortness of breath in AC 2/<:

To sing; Shortness of breath AC 2/<:

Speak; Shortness of breath in AC 2/<:

**Anger; Shortness of breath due to AC 2/<:**

**Anxiety due to shortness of breath, obstructed breathing with anxiety;**

**Shortness of breath causes anxiety CA 3/>:**

**Yawning B 2:** on the one hand, wanting to open up and engage in communication, but at the same time being held back by reservations

**Sigh; Yawning with C BA 2/><:**

**Conscious (attentive) breathing; Feeling (delusion) A 3/><:** to be completely alienated from the world, to be neither able to express claims as a matter of course nor to agree to the claims of others

**sleep; noisy breathing, breathing noises in the BC 2:**

**Snoring while sleeping BC 2:**

**Hyperventilation, accelerated breathing AC 3/>:** wanting to avoid being exposed in any way at all costs, so neither getting involved communicatively nor holding back, only being able to get more and more panic

**Status asthmaticus BCA 3/><:**

**pulmonary edema; Asthma due to BCA 3/><:**

**dropsy; Asthma from BCA 3/><:** see "Chest, chest – heart, cardiac asthma";

**groaning breathing BA 2/>:**

## **CodeB, BC**

**Breath holding:**

**Sleep; breath held in; Sleep apnea BC 2:**

**Exhale; Breathing interrupted on BC 2:**

**Sleep; pausing, intermittent breathing in BC 2:**

**Drink; Breathing stopped at BC 2:**

**Shortness of breath times of day**

**waking up in the morning (in bed); Shortness of breath in BC 2:**

**at evening; Shortness of breath, asthma BC 2:**

- **Shortness of breath, asthma in bed in the evening BC 2:**

- **Sleep; Shortness of breath in BC 2:**

**at night; Shortness of breath BC 2:**

**Effort; Shortness of breath with low BC 3:**

**Effort; Shortness of breath according to BC 2:**

worsens shortness of breath; Running BC 2: see "Running" below. shortness of breath";

**Work; Shortness of breath in BC 2:**

**inhale, exhale:**

**Exhale; Shortness of breath in BC 2:**

**Inhale, Breathe in; Shortness of breath in BC 2:**

**miners, miners; Asthma from BC 3:**

**prevent, improve shortness of breath BC 2:**

**prevent worsens shortness of breath BC 2:**

**Exercise improves shortness of breath BC 2:**

**arms; Shortness of breath when moves BC 2**

**Vomiting improves asthma BC 2:**

**Eat; Shortness of breath according to BC 2:**

**Eat; Shortness of breath better after BC 2:**

**driving (passive); Shortness of breath in BC 2:**

**window (= better outdoors); opens in case of shortness of breath BC 2:**

**dampness, wetness; Asthma in BC 2:**

**Yawning; common B 1:**

**Yawning improves B 1:**

**Yawning makes B 1 worse:**

**spasmodic, convulsive; Yawn BC 2:**

**Walking aggravated; Shortness of breath, asthma (rapid) BC 2:**

Thunderstorm intensifies, causes shortness of breath BC 2:  
 Skin rash; Asthma after suppressed BC 3:  
at night; spastic cough, suffocating cough BC 2:  
 Coffee; Shortness of breath according to BC 2:  
 Cold, cold, fresh air worsens shortness of breath (= worse outdoors) BC 2:  
 coals, coal dust; Asthma caused by BC 2:  
 Position in bed + breathing BC 2:  
   Lay; Shortness of breath better in BC 2:  
   Lay; Shortness of breath in (sitting in bed) BC 2:  
   Lying down worsens/causes shortness of breath BC 2:  
   Lying on your back causes shortness of breath BC 2:  
 Run; Shortness of breath:  
   Running improves shortness of breath BC 2:  
   Running worsens shortness of breath BC 2:  
 wet, cold weather; Asthma in BC 2:  
 Fog; Asthma in BC 2:  
 Smoke; Breathing problems according to BC 2:  
 Rest worsens breathing problems BC 2:  
 Swallow; Shortness of breath in BC 2:  
Pregnancy; Shortness of breath in BC 3:  
 Dust causes shortness of breath BC 2:  
 climbing, climbing stairs; Shortness of breath in BC 2:  
Bowel movement; Shortness of breath in BC 2:  
Sleep; Shortness of breath in BC 2:  
   Sleep; pausing, intermittent breathing in BC 2:  
   Sleep; Noisy breathing, breathing noises in BC 2:  
   Snoring while sleeping BC 2:  
 smoking tobacco; Breathing problems after BC 2:  
 Drink; Shortness of breath in BC 2:  
   impossible due to shortness of breath; Drink BCA 3/><:  
 warm room; Shortness of breath in BC 2:  
 Wind; Asthma, shortness of breath in BC 2: see below "Wind, asthma when walking  
 against";  
 Wind; Asthma, shortness of breath while walking vs BC 2:  
 Eat; Yawning after BC 2:  
 outdoors; Yawning in B 2:  
 Cold, feeling of ice in chest when inhaling cold air BC 2:  
 Cold, feeling of ice in the throat when inhaling cold air BC 2:  
exhalation aggravated; Breathing sounds BC 2:  
inhalation, breathe in; Breathing noises on BC 2:  
Constriction of cervical pit and intercostal muscles in shortness of breath, asthma BC  
3:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

stopped breathing, breath holding, breathing interruption C 3:

  forgets to breathe; Breathing stopped C 3:

Shortness of breath.

  Asthma C 3: see "shortness of breath" below;

  Asphyxia, impending suffocation C 3:

  crackling breathing C 2:

  shortness of breath, asthma C 3:

  pausing, intermittent breathing C 3:

  flatulence; Shortness of breath with C 2:

  emphysema; Shortness of breath with a C 3: see "Chest, Lungs, Emphysema";

Vomit; Asthma alternating with C 3:  
 Attacks of suffocation, impaired breathing + vomiting C 3:  
 extreme shortness of breath C 3:  
 Skin rashes alternating with asthma, shortness of breath C 2:  
 Heart palpitations with shortness of breath C 3:  
 Cough + shortness of breath, spastic cough, suffocating cough C 2:  
 asthma accompanied by cough; Shortness of breath before coughing or  
 coughing caused by shortness of breath C 3:  
 Empty feeling in chest/stomach; Shortness of breath with C 3:  
 stomach outgoing; Shortness of breath like from C 2:  
 Nasal congestion with asthma C 2:  
 Sneezing worsens shortness of breath C 2:  
 mucus in the chest; Shortness of breath due to C 3:  
 Runny nose with shortness of breath, asthma C 2:  
 Pain; Shortness of breath, breath holding due to C 2:  
 sweat; Shortness of breath with C 3:  
 Respiratory paralysis C 3: see above "held breathing";  
 Respiratory arrest C 3: see above "stopped, breathing";  
 Abdominal breathing C 2:  
 impossible to breathe through, obstructed breathing, shallow superficial breathing  
 C 2:  
 Abdomen with difficulty breathing; Problems of C 2: see below "Flat, distention,  
 obstructed breathing due to";  
 flatulence, distention; impaired breathing due to C 2:  
 chest with difficulty breathing; Problems of the C 2:  
 Cheyne-Stokes breathing; increasing and decreasing breathing frequency with long  
 breathing pauses in between C 3:  
 suffocation attacks C 3: see above "shortness of breath, suffocation attacks";  
 Yawning; frequent B 1:  
 Yawning improves B 1/>:  
 Yawning aggravates B 1/<:  
 spasmodic, convulsive; Yawning BC 2:  
 wheezing, wheezing, wheezing; Breathing sounds C 2:  
 wheezing C 2: see "wheezing" above;  
 rattling breathing C 2:  
 larynx and trachea; rattling breathing of C 2:  
 Mucous membrane of the respiratory tract C 1:  
 Snoring C 2:  
 painful breathing C 1:  
 Gasping for air C 2:

\* **COUGH:** Conflict, to be socially isolated having no consensus, but can neither suppress nor openly express his displeasure about this but can only being able to make it audible indirectly.

## Code A, AB, AC

sudden cough BAC 3/><:

alcoholics; Cough with AC 3/<:

Think; Coughing on it AC 2/<:

Excitement; Cough due to AC 2/>:

mental effort; Cough with AC 2/<:

hysterical cough AC 3/><:

Laugh; Cough worse from AC 2/><:

Read; Cough with loud AC 2/<:

Measles; Cough after BAC 3/><:

nervous cough AC 2/><:

Fainting + cough CA 2/<: see "Mind, unconsciousness, fainting, cough; fainting during";

Sleep

Cough; Sleep; startle, drive up with BAC 3/>:

To sing; Cough with AC 2/<:

Speak; Cough with AC/<:

prevents speaking; Cough CA 2/<:

Quarrelsomeness before and during coughing attacks CA 2/><:

Cry; Cough with AC 2/<:

Anger; Cough due to AC 2/<:

old people; Cough BCA 3/><:

smoking tobacco; cough through; Smoker's cough BCA 3/><:

Perforation; Cough at BCA 3/><:

Cystic fibrosis BCA 3/><:

## Code B, BC

Expectoration improves; Mucus expectoration facilitates BC 2:

Hemoptysis C 3:

Hemorrhoids; Coughing up blood after suppressed BC 3:

Menses; Coughing up blood after suppressed BC 3:

Accompanying circumstances, modalities:

Cough improves BC 2:

Cough aggravates BC 2:

Fall asleep; Cough with BC 2:

awakening after sleep (morning); Cough with BC 2:

Awakening; Cough with BC 2:

Awakening; Cough after BC 2:

Sleep; Cough in BC 2:

does not disturb sleep; Cough BC 2:

awakens from sleep; Cough BC 2:

Daily rhythm: see "General, times of day, daily rhythm":

during the day; Cough only BC 2:

day and night; Cough BCA 3/><:

In the morning; Cough BC 2:

getting up in the morning; Cough after BC 2:

awakening in the morning; Cough worse when (after sleep) BC 2:

at evening; Cough BC 2:

coughing in bed in the evening BC 2:

at night; Cough BC 2:

at night; Paroxysmal cough BC 2:  
at night; Pseudocroup - inflammation of the larynx mucosa BC 2:  
at night; spastic cough, suffocating cough BC 2:  
 Covering, uncovering worsens cough BC 2:  
     cooling down, getting cold; Cough after BC 1: see above "Covering makes cough worse";  
     Exertion improves cough; physical BC 2:  
     Exertion worsens cough; physical BC 2:  
         Climb stairs; Cough at BC 2:  
     Applications (wet wipes, bath) improve cough; warm, wet BC 2:  
     sitting up when coughing; CB 1 must: see below "Situation criteria, setting up improves  
     Cough";  
breathe in, inhalation; Cough worse due to BC 2:  
     Eat; Coughing gets better with BC 2:  
     Eat; Cough gets worse with BC 2:  
 cold dishes; Cough after BC 2:  
     driving (passive); Coughing with BC 2:  
     Beverages; Cough due to BC 2: see "Drinking" below; Cough modalities when";  
 Coffee; Cough after BC 2:  
     Cold improves cough BC 2:  
     Cold aggravates cough BC 2:  
 Air, being outdoors, improves cough; fresh BC 2:  
 Cough worse outdoors BC 2:  
 Menses; Cough due to suppressed BC 3:  
 Fog; Cough through BC 2:  
 smoke, exhaust fumes; Cough through BC 3:  
 Rest worsens cough BC 2:  
Pregnancy; Cough in BAC/><:  
 Dust; Cough through BC 2:  
 dust (also house dust allergy); Cough as by BC 2:  
     temperature change; Cough at BC 2:  
         cold to warm; Cough when switching from BC 2:  
         warm into cold; Cough when switching from BC 2:  
     Drink; Coughing with BC 2: see "General, Drinking";  
 Drinking improves cough BC 2:  
 Drinking worsens cough BC 2:  
 Drinking warm improves cough BC 2:  
     Drinking warm worsens cough BC 2:  
     Drinking cold, cold drinks improve cough BC 2:  
 Drinking cold, cold drinks worsen cough BC 2:  
 Milk; Cough after BC 2:  
     warm rooms; Cough in: see above "Cold improves cough";  
     Wind (draft) worsens cough BC 2:  
     cigarette smoke; Cough due to BC 2: see above "Smoking tobacco; Cough"  
 Positional criteria that influence cough: see "General, Body Modalities";  
 Sitting up improves cough BC 2:  
 Getting up from bed, sitting up from lying down worsens cough BC 2:  
 Bending, preventing improves cough BC 2:  
     Bending, bending forward worsens cough BC 2:  
     Lying down improves cough BC 2:  
 Lying with your head elevated improves BC 2:  
     Lying down worsens cough BC 2:  
     Lying down makes cough worse (then it calms down again) BC 2:  
 Lying on your back is impossible, you have to cough BC 2:  
 Side position impossible; Cough BC 2:

- Side position on the left impossible; Cough BC 2:
- Right side position impossible; Cough BC 2:
- Sitting, coughing better in: see above "Sitting up improves coughing";

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

**Type of cough:**

- paroxysmal cough C 2:
- follow each other quickly; Coughing attacks C 2:
- Recovers quickly after attacks C 2:
- persistent cough (for hours) C 3:
- barking cough C 1:
- detonation; Cough like C2:
- choking cough C 3: see "Breathing, shortness of breath, cough + shortness of breath";
- hard cough C 1:
- hoarse cough, hoarseness when coughing C 2:
- wheezing cough until suffocating C 3: see "whooping cough" below;
- Whooping cough, pertussis C 3:
- during the day; Whooping cough only BC 3:
- Tickling cough, dry cough, cough C 2:
- Breast; Cough due to tickling in the C2:
- pit of the throat; Cough caused by tickling in C 2:
- larynx; Cough due to tickling in the C 2:
- Throat; Cough due to tickling in the C 2:
- Thyroid; Cough irritation in the C 2 area:
- trachea, trachea; Cough due to tickling in the C 2:
- spasmodic, spastic cough C 2:
- Croup cough:
- membranous croup cough C 3:
- Pseudocroup – inflammation of the larynx mucosa C 2:
- Croup cough painful C 2:
- wheezing cough C 2:
- rattling cough C 2:
- Irritable cough C 2: see "Tickling cough" above;
- painful cough C 2:
- Stomach, coughing pain, holding C2:
- Breast; Coughing pain, the C 2 persists:
- Sternum pain when coughing C 2:
- Neck; When coughing, internal C 2 hurts:
- Headache when coughing C 2:
- relaxed; Cough painful even though C 1:
- Throat pain when coughing C 2:
- unable to cough due to pain BCA 3/><:

     Vomit; Cough with C 2:  
     heating; Physical cough: see above "Exertion aggravates cough; physical";  
     holds himself, grabs himself while coughing...  
     belly, abdomen; persists when coughing C 2:  
 Breast; Cough pain, persists C 2:  
     Neck; attacks when coughing C 2:  
     larynx; attacks when coughing C 2:  
     Headache Cough, holding head while coughing C2:  
     Liver; maintains C 2 when coughing: see below "Pain in the liver when  
 coughing";  
     Stomach; persists when coughing C 2:  
 generally; Cough irritation C2:  
 Breast; Cough irritation in the C 2:  
 pit of the throat; Cough irritation in C 2:  
 larynx; Cough irritation in C 2:  
 Cough caused by irritation of the cough: Cough is made worse by coughing C3:  
 cough aggravated C 1: see above "Concomitant circumstances, modalities, cough  
 aggravated";  
 Liver pain when coughing C 2:  
 Bronchitis C 3: see "Chest, Lungs";

- \* **CHEST:** Conflict of not being able to close the gap between his demand for presence and his actual social presence against the demands of the environment
- \* **Armpit, axilla C 1:** Conflict of having opened up socially, of being close, but now being rejected, of being without reciprocity.
- \* **Sternum, Sternum C 1:** Conflict, being able to protect and defend one's social presence, one's communicative demands against external presence.
- \* **Clavicle C 1:** Conflict of neither being sufficiently established as a presence nor sufficiently maintained in the supporting backcourt in order to be able to maintain one's freedom of action against that of others.
- \* **Chest side:** Conflict, to be exposed in its communicative presence to compelling influences, being aligned with someone else's will
- \* **Heart:** Conflict, to be emotionally not in tune with the social environment, becoming more and more involved but not being able to gain appreciation.
- \* **Lung:** Conflict of not being able to create a balance between one's own demands and those of others within the framework of the conditions of communicative reciprocity, i.e. not being in agreement.

\* **Mammae, female breasts:** As a woman, she feels that she has only to provide social care, that means, only to be used and being exposed to overwhelming pressure of expectations.

### **Code A, AB, AC**

excitement, excitement; Chest pain due to AC 2/<:

Laugh; Chest pain worse from AC 2/><:

Write; Chest pain in AC 2/<:

To sing; Chest worse with AC 2/<:

Speak; Chest pain in AC 2/<:

Sensitivity to light touch, pressure; Breast BCA />: to be very easily affected by questions of mutual social consent

### **Sensations in the chest**

Fear in the chest A 1/><:

Life in the chest; Feeling; Feelings of movement in the chest AC 2/><:

impossible to speak; Chest constriction AC 3/>:

**Angina pectoris:** feeling of being pressured by unfulfillable demands in one's efforts for appreciation so having to accept not to be valued;

Fainting with angina pectoris CA 3/<:

restless, nervous with angina pectoris CA 3/><:

Fear of death in angina pectoris CA 3/>:

### **Aortic aneurysm (aneurysm, bulging of the aorta) ABC 3/><:**

. Bulging of the arteries, aneurysms of the chest ABC 3/><:

. Aortic coarctation (narrowing after the vessels for the upper half of the body) ABC 3/><:

. Aortic valve insufficiency (blood flows back into the left ventricle) C 3:

. Aortic stenosis (aortic narrowing) ABC 3/><:

. cardiac vessels; Stenosis of ABC 3/><: see below "Cardiac vessels; Stenosis of the":

### **congenital heart problems, heart defects BAC 3/><:**

**Heart palpitations:** thinks to be not valued and therefore having the feeling being asked to make more and more effort to be valued

- Fall asleep; Heart palpitations in BAC 2/><:

- at night when awakening; Heart palpitations BAC 2/><:

Fear; Heart palpitations with CA 2/<:

Think; Heart palpitations when playing AC 2/<:

Excitement; Heart palpitations due to AC 2/<:

tension of expectations; Heart palpitations due to AC 2/><:

mental effort; Heart palpitations due to AC 2/<:

hysterical heart palpitations AC 3/><:

grief; Heart palpitations due to AC 2/<:

neurotic, nervous heart AC 2/><: see "neurotic heart" below;

## CodeB, BC

Sternum:

Pressure worsens pain of the breastbone, sternum BC 2:

Sternum pain, pain of the sternum, sternum extends to the back, spine C 2:

Breathe; Chest pain in BC 2:

Feelings of ice when inhaling BC 2: see “Sensations” below; Feeling cold when inhaling”;

Eat; Chest pain after BC 2:

lifting a load; Chest pain in BC 2:

Cough; burning chest pain in BC 2: “;

cold drinks; Breast worse due to BC 2:

smoking, tobacco; Chest problems, lung problems due to BC 3:

Rest worsens breast problems BC 2:

Sitting worsens chest, chest pain BC 2:

Feeling cold when breathing cold air BC 2:

hot iron in the chest C 3:

at night; Breast sweat BC 2:

heart palpitations

In the morning; Heart palpitations BC 2:

at evening; Heart palpitations, heart palpitations BC 2:

at night; Heart palpitations, heart palpitations BC 2:

- Sleep; Heart palpitations, heart palpitations in the BC 2:

Effort; Heart palpitations at BC 2:

- Shortness of breath with palpitations when climbing BC 2:

Stand up; Heart palpitations after BC 2:

Movement worsens palpitations; each BC 2:

Flatulence, bloating causes palpitations BC 2:

Inhaling improves palpitations, palpitations BC 2:

Eat; Heart palpitations after BC 2:

Lying down worsens heart palpitations BC 2:

Hunger with palpitations BC 2:

Coffee; Heart palpitations BC 2:

Lay; Heart palpitations at BC 2:

- supine position; Heart palpitations when lying on your back BC 2:

- lateral position; Heart palpitations in BC 2:

. lying on the left; Heart palpitations at BC 2:

. lying on the right; Heart palpitations at BC 2:

Bowel movement; Heart palpitations when there is an urge to defecate BC 2:

Climb stairs; Heart palpitations, heart palpitations BC 2:

Turning over, turning in bed; Heart palpitations BC 2:

Urination improves heart palpitations BC 2:

urine + heart palpitations; abundant BC 2:

Urination improves pain in the heart region BC 2: see below “Heart pain, urination improves”;

Cardiac arrhythmias

Movement worsens cardiac arrhythmias, walking around impossible BC 3:

Tight clothing worsens cardiac arrhythmias BC 2:

heartache

Effort; Pain of the heart, heartbreak at BC 2:

Left position heartbreak BC 2:  
 right position Heartbreak BC 2:  
Urinate; Heartbreak at BC 2:  
Urinate; Heartbreak made better by BC 2:

Lung:

Exhaling aggravates BC 2:  
Inhalation aggravates BC 2:

Pain in the lungs when tapping, percussion BC 2:

Mammary glands - Mammae

Breast and mammary gland swelling before menses BAC 3/><:  
Breast and mammary gland swelling during menses BAC 3/><:  
Breast and mammary gland swelling after menses BAC 3/><:

mammae pain

- at night; breast pain Mammae BC 2: at night, Breast pain Mammae:  
Menses; mammae pain before the BAC 3/><:  
menses; mammae pain in BAC 3/><:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

Armpit abscess, armpit abscess; Boil C 3

Armpit hair loss C 3:

Armpit rashes C 1:

Herpes of the armpit C 2:

Pain of the axillary glands C 1:

Armpit, axilla, armpit sweat, armpit sweat C 1:

smelly armpit sweat C 3:

Swelling of the axillary glands C 1:

Mammary gland swelling + armpit swelling C 2: see "mammary gland swelling" below;

painful swelling of the axillary glands C1:

Tightness of the chest C 2: see "constriction" below; C1

Congestion of blood in the chest C 2: thematically similar to "constriction, oppression";

Mammary gland swelling C 1: see below "Breast - Mammae", mammary gland swelling;

Sternum:

Pain in the sternum, sternum C 1:

Pain behind/under breastbone, sternum C 1:

Sternocleidomastoid pain (head nodding) C 1:

Chest tightness C 2: see "constriction" below;

Chest pain C 1:

chest pain at night BC 2:

armpit; Chest pain extends to C 2:

Armpit, axilla, armpit pain Pain extends to chest / mammae C 2:

arms; Chest pain extends to C 2:

burning chest pain C 1:

weight on chest; Pain pressing like C 1:

Cough; Chest pain with C 2:

Knife pain on the sides of the chest C 3:

needles; Chest pain like from C 1:

Neuralgia of the chest C 3: see "Intercostal neuralgia" below;

Ribs, pain C 1:

Ribs false, short, asternal ribs in front C 1:

ribs lower front; Pain C 1:

ribs lower back; Pain short ribs, free ribs (back) C 1: ):

between lower left ribs; Pain: see below "Intercostal neuralgia, Left";  
 Back; Chest pain extends to C 2:  
 Shoulder blade; Chest pain extends to C 2:  
 Pages; Chest pain C 1:  
 Sensations, feelings in the chest:  
 Band feeling around the chest C 2: see below "Constriction; Band like through";  
 moves under the sternum; Feeling something C 2:  
 weight on chest; Pain pressing like C 1: see above "Chest pain, weight; Pain pressing as if through";  
 Void in chest C 3:  
 obstructed breathing + feeling of emptiness in the chest/stomach C 3: see "Breathing, obstructed, inhibited, feeling of emptiness, chest/stomach";  
 open; Chest, feeling like C 3:  
 Armored feeling around chest C 2: see below "constriction, oppression";  
 Feeling of fullness in the chest C 1:  
 Suppressing the urge to urinate causes a feeling of fullness in the chest, urination improves BC 3:  
 Chest rashes C 1:  
 Acne, breast pustules, skin rashes C 3:  
 breastbone, sternum; Rashes over C 1:  
 Herpes of the breast C 2:  
 herpes zoster; Chest C 3:  
 Breast rashes C 1:  
 Nipple rashes C 1:  
 Pustular rash of the chest, pus-filled blisters, hair follicle inflammation C 3:  
 Heat, hot flashes of the chest C 1:  
 Heat, hot flashes from chest to head C 2:  
 tingling heat in the upper body with itchy heat rash C 2  
 Itching of the chest C 2:  
 Clavicle C 1:  
 Clavicle pain C 1:  
 Swelling collarbone C 1:  
 Swelling, pain of the clavicle joint C 1:  
 Chest pain C 1: see "Chest pain" above;  
 Chest sweat C 1:  
 Mammae, female breast sweat, sweating C 1:  
 Constriction of the chest, general oppression C 2:  
 breathing difficulties, asthma; Chest constriction accompanied by C 3:  
 Breathe in; Lacing at BC 2:  
 band around the chest; Constriction like a C2:  
 Squeezed, squeezed Heart presses on chest, doesn't have enough space:  
 Heart; Chest, oppression, constriction C 2:  
 Armor; Constriction of the chest as caused by C 2  
 Intercostal neuralgia C 3  
 left side of chest; Intercostal neuralgia C 3:  
 lower left ribs; Pain between C 3:  
 right side of chest; Intercostal neuralgia C 3:  
 herpes zoster; Intercostal pain after C 3:  
 Heart problems C 1:  
 Aortic problems C 3:  
 Aortic inflammation C 3:  
 Asthma with cardiac involvement: see "cardiac asthma" below;  
 Bulge, aneurysm of cardiac arteries C 3:  
 Congestion of blood, hyperemia to the heart C 2:  
 Feelings at heart: immediate expression of social value;

stop, stop hitting; Feeling heart would C 3:  
 stopped, would have stopped beating; Feeling like the heart is C 3:  
 Tightness of the heart C 2: see above "Angina pectoris";  
 Flames; Heart region is in C 3:  
 Hot flashes in heart region C 2:  
 Swelling of the heart, feeling that the heart is enlarged C 2:  
 to swim; Feeling like heart would be in water C 3:  
 vibrating feeling in the heart C 2:  
 Heart palpitations, racing heart C 2:  
 Shortness of breath accompanied by palpitations C 3:  
 chronic palpitations C 3:  
 Extrasystoles C 2:  
 felt, is audible; Heart palpitations become throughout the chest C 3:  
 Turning around in bed causes heart palpitations: see "Turning over in bed"  
 below;  
 heart palpitations";  
 Cardiac arrhythmias: see "irregular heart palpitations" below;  
 Stomach problems; Heart palpitations with stomach problems C 2:  
 Sweat + palpitations, racing heart C 2:  
 Dizziness with palpitations C 2:  
 visible heart palpitations C 2:  
 Nausea + palpitations C 2:  
 irregular heart palpitations C 2: see "cardiac arrhythmias" below;  
 Flushes with palpitations C2: see "Hot flashes in the heart region" above;  
 organ problems; Heart problems + accompanying:  
 Flatulence, tympanitis, distention + heart problems C 2: see above "Heart  
 palpitations, flatulence, distention caused";  
 Gout + heart problems C 3:  
 Liver problems + heart problems C 3:  
 Nausea; Heart failure accompanied by C 3: see "Heart failure, nausea" below;  
 Rheumatism + heart problems C 3:  
 Rhythm disturbances, heart palpitations, irregular heart palpitations C 2:  
 tumultuous individual beats C 2:  
 Pain of the heart, heartbreak C 1  
 extends to left shoulder, arm, hand; Heartbreak C 2:  
 Enlargement of the heart; Heart enlargement, heart dilatation C 3:  
 Heart failure, heart failure, heart failure, heart failure C 3:  
 Nausea; Heart failure accompanied by C 3:  
 Constriction of the heart, cardiac oppression C 3:  
 Lung problems C 1: see "Chest, Lungs" above;  
 Bleeding from the lungs, pulmonary hemorrhage C 3:  
 Bronchitis C 3:  
 chronic bronchitis C 3:  
 painful bronchitis C 1: see "cough; type of cough, more painful";  
 thick mucus in bronchitis C 2: see "cough, sputum, more viscous";:  
 Pneumonia, pneumonia C 3:  
 eye inflammation + pneumonia C 3:  
 rolled eyes with pneumonia C 3:  
 Mucus, sputum C 1: see "Cough, sputum, phlegm";  
 Mucus in the chest C 2:  
 Pain in the lungs C 1:  
 Constriction of the bronchi C 2:  
 Mammae, female breasts:  
 Breast abscess, mammae C 3:  
 Breast swelling C 1:  
 Breast pain, breast pain + armpit swelling C 2:

**Breast inflammation, mastitis C 3:**  
**Breast pain Mammae C 1:**  
   stabbing, boring pain Mammae C 1:  
**Nipple C 1:**  
   inverted nipples C 3:  
   sensitive nipple C 1:  
**Nipple inflammation C 3:**  
   - Cystitis + nipple pain C 3:  
   swelling of the nipples; Nipple swelling C 1:  
**Rashes under breast C 2: see "Skin, intertrigo, under breast"**  
**Heat, hot flashes Mammae C 1:**  
**Breast hypertrophy, breast swelling C 1:**  
**oversized breast C 1: see "breast hypertrophy" above;**  
**Erysipelas, mammary erysipelas C 3:**

\* **BACK C 1: Conflict of not being in agreement with the conditions of social backing from behind, of not being able to establish a lasting relationship and therefore not being hold reliably.**

\* **Intervertebral discs: Conflict, has to give in due to a lack of sufficient emotional support being therefore not able to withstand the prevailing pressure to conform to.**

\* **Thoracic spine, dorsal spine; Problems of the C1: Problem of not being able to maintain one's demand for presence because having no appropriate support.**

\* **Lumbar, lumbar region: Conflict of having to meet overwhelming performance conditions in order not to be questioned in getting support.**

\* **Cross, sacral region: Conflict, not being able to stand up for one's own demands, only being able to bend in order to be supported.**

\* **Sacroiliac joint: Conflict, neither being able to adapt to the conditions of the seat nor releasing from it, contrary to its dynamics, only being able to endure under unsuitable conditions**

\* **Neck problems, cervical region: Conflict of renouncing one's demands in favor of the environment, of bowing to pressure to conform to be socially supported**

\* **Shoulder blades: Problem of relying on reliable support in one's actions, i.e. being in harmony with one's own and the supporting principles of the backcourt in order to be able to act convincingly and assert one's demands.**

\* **Coccyx, coccygeal region: Problem of not being able to come to terms with the conditions of support of the seat;**

## **Code A, AB, AC**

**excitement, excitement; Back worse due to AC 2/<:**

**Coitus; Back pain after ABC 2/>:**

**Laugh; Back pain worse due to AC 2/><:**

**Lay; Sacral pain improved in BC 2:**

**Lay; Sacral pain worsens BC 2:**

**- lie down; Sacral pain worsens BC 2:**

**sitting aggravates: lower back pain, sacral pain BC 2:**

### Lumbar pain

**- morning (problem getting up); Lumbar pain, lumbar pain BC 2:**

**- at night; Lumbar pain BC 2:**

**Breathe; Pain in the lumbar region hinders CB 2:**

Getting up from sitting worsens lumbar pain (you have to bend over when getting up!?) BC 2:

Bending improves pain in the lumbar region BC 2:

Bending over worsens pain in the lumbar region BC 2:

turning in bed; Pain in the lumbar region in BC 2:

Awakening due to lumbar pain BC 2:

Driving in the car (active); Lumbar pain due to BC 2:

Go; Lumbar pain better with BC 2:

- hunched walking due to lumbar pain BC 2:

Go; Lumbar pain worse with BC 2:

Bending, curving forward worsens, bending backwards improves BC 2:

Lay; Lumbar pain worse due to BC 2:

Lumbago, shooting back pain after incorrect movement, Lumbago BC 2:

Lay; Lumbar pain better with BC 2:

Menses; Lumbar, lumbar pain before BAC 3/><

Menses; Lumbar, lumbar pain during BAC 3/><

sudden movement causes stabbing lumbar pain BC 3:

Sit; Lumbar pain better with BC 2:

Sit; Lumbar pain worse with BC 2:

- Getting up from sitting worsens lumbar pain BC 2:

- Sitting bent forward; Lumbar pain in BC 2:

Stand; Lumbar pain due to BC 2:

- In the morning; Neck pain, neck pain, neck rheumatism BC 2:

bending backwards worsens neck pain; Pain in the neck BC 2:

bending forward worsens neck pain; Pain in the neck BC 2:

Movement improves neck pain BC 2:

Movement worsens neck pain BC 2:

Turning the head worsens neck pain BC 2:

- right; Neck pain when turning the head; cannot turn head to the right BC 2:

- Left; Neck pain when turning the head; cannot turn head to the left BC 2:

Lay; Neck pain better in BC 2:

- Lay; Neck pain worse in BC 2:

nodding worsens neck pain; Pain in the neck BC 2: see above "bending forward worsens neck pain";

at night; Sweat of the cervical region, neck BC 2:

drafts; Stiffness of the neck due to BC 2:

Back pain - general modalities:

In the morning; Back pain BC 2:

- Getting up from bed in the morning; Back, pain, back pain with BC 2:

- morning; Back pain BC 2:

- midday; Back pain BC 2:

- afternoon; Back pain BC 2:

- at evening; Back pain BC 2:

- at night; Back pain BC 2:

Leaning improves back pain BC 2:

Breathe; Pain in the spine hinders CB 2:

Movement; Back pain BC 2:

- Exercise improves back pain BC 2:

- Back, pain, back pain movement worsens BC 2:

- turning in bed; Back pain with BC 2:

- Twisting, turning over in bed aggravates lumbar region, pain

Spine:

Awakening with back pain BC 2:

In the morning; Back pain BC 2:

Driving in the car (active); Spinal pain caused by BC 2:

continued exercise improves back problems BC 2:

Lay; Back, pain, back pain better in BC 2:  
 Lay; Back, pain, back pain worse in BC 2:  
Menses + back pain BAC 3/><  
 Rest worsens back problems BC 2:  
 Spinal irritation (sore aching) C 1:  
 Stand; Back pain worse BC 2  
Bowel movement; Back pain during BC 2:  
Urination improves back pain BC 2:  
 Prevention improves back pain BC 2:  
 Bending forward, stooping worsens back pain BC 2:  
 Bending back improves back pain BC 2:  
 Back sweat  
Sweat of the back at night ; strong BC 2:  
 stiffness  
In the morning; Stiffness of the back BC 2:  
 stooping; Stiffness of the back on BC 2:  
 Coccyx pain  
Menses, coccyx pain, coccyx pain during BAC 3/><  
 Sit; Coccyx pain, coccyx pain during BC 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

thoracic spine, dorsal spine; Problems with C 1  
 Dorsal spine, dorsal region; Pain of C 1:  
 Breast; Pain dorsal spine extends to C 2:  
 Boils on the back C 3:  
 Boil, abscess in the neck C 3:  
 Feelings, sensations in the back:  
 Cold of the back C 1:  
 Feeling of ice, cold in the back C 1:  
 - Back cold radiating into body C 2:  
 - Legs; Cold, shivering moves from the back into the C2  
 Cold of the spine C 1:  
 Buttocks C 1: see "Extremities – Legs; Buttocks";  
 Rashes of the back C 1:  
 Acne of the back C 3:  
 Herpes zoster, shingles of the back C 3:  
 itchy rashes of the back C 2:  
 Lumbar region rashes C 1:  
 neck rash; Rash cervical region C 1:  
 Abscess, neck, cervical region C 3  
 Neck, neck rash itchy, rash cervical region itchy C 2:  
 Morning and evening red spotty neck rash BC 2:  
 Nettle rash, urticaria of the back C 2:  
 Lumbago, lumbago, shooting back pain after "wrong" movement BC 2:  
 Itching of the back C 2:  
 Itching back, lumbar region, lumbar area C 2:  
 Coldness of the back C 1: see "Feelings, sensations in the back, coldness";  
 Cracking of the spine C 2:  
 Cracking of the cervical region, in the neck C 2:  
 Cross, sacral region C 1:  
 Lower back pain, sacral pain C 1:  
 broken; Sacral pain like C 3:  
 pieces fall apart; Cross as in C 3:

sacral joint, sacroiliac joint; C 1 pain:

Sacroiliac region, lumbosacral region Pain C 1:

Stiffness; Cruciate and sacral region C 2:

Lower back weakness C 1: see "Weakness of the back" below;

Lumbar, lumbar region C 1:

lumbar pain, rheumatism; Lumbar pain, pain lumbar region C 1:

- burning pain in the lumbar region, lumbar pain C 1:
- abdomen; Pain lumbar region extends to C 2:
- Pool; Lumbar pain extends to C 2:
- Legs, hips, thighs, feet; Pain in the lumbar region, lumbar pain extends into the C 2:
- genitals; Lumbar pain extends to C 2:
- Thigh; Lumbar pain extends into C 2:
- rectum; Lumbar pain, lumbar pain extends to C 2:
- shoulder blades; Lumbar pain, pain lumbar region extends to C 2:

Hemorrhoids + lumbar pain C 2:

Lumbosacral pain C 1:

extends downward; Lumbosacral pain C 2:

divided into two; Lumbosacral pain like C 3:

Neck problems, cervical region C 1:

Heat cervical region, neck heat C 1:

Lymph node swelling in the neck, swelling of the neck glands C 1:

paralysis of the neck; Feeling of paralysis C 2:

Pain in the neck, neck pain, neck rheumatism, pain in the cervical region C 1:

- at evening; Neck pain:
- at night; Neck pain, neck pain, neck rheumatism:

Eyes; Headache extends from the neck over the head to the C 2:

Headache + pain of the neck C 2:

back of head; Neck pain extends to the back of the head C 2:

spasmodic neck pain C 2:

shoulder (also upper arm); Neck pain extends to C 2:

Vice; Neck pain as in C 2:

Forehead; Neck pain, pain cervical region extends to forehead C 2:

Weakness of the cervical region C 1:

Sweat of the cervical region, neck C 1:

Stiffness of the neck, stiff neck, neck stiffness, neck tension C 2:

retracted neck, opisthotonus C 2:

Torticollis, torticollis C 2:

Back pain:

broken off, broken; Back pain like C 3:

Cough; Back pain with C 2:

wandering; Back pain C 2:

spine; Pain: from base of brain to coccyx C 2:

Back weakness C 1: see "Weakness of the back" below;

sacrum; Problems of C 1: see "Sacral and sacral problems" above;

Shoulder blades:

Rash on shoulder blades C 1:

Coldness of the shoulder blades C 1:

Knot feeling shoulder blades C 2:

Pain shoulder blades C 1:

shoulder blades; Pain under/behind C 1:

scapula angle; Angle of shoulder blades C 1:

between shoulder blades pain C 1:

Sweat of the back C 1:

Stiffness of the back C 2:

Stiffness; Cross, sacral region C 2:

**Coccyx, coccygeal region C 1:**

**Coccyx pain C 1:**

**Warts on the back C 3:**

**Feelings of constriction in the back C 2:**

- \* **EXTREMITIES: Conflict, not being able to articulate oneself appropriately as a person, not being able to adapt one's attitude to the social conditions in order to be accepted in the social environment.**
- \* **Extremities - arms: Conflict of not being able to coordinate one's freedom of action with the given scope of action, i.e. with the demands of the environment.**
  - \* **Shoulders: Conflict, being challenged as a presence, having to face social pressures without actually being able to cope with them.**
  - \* **Shoulder joints: Conflict, wanting to unfold, to act, but being limited in your freedom of action by internal or external reservations.**
  - \* **Upper arms: Conflict, not being able to unfold against social restrictions, not being able to use your room for maneuver dynamically.**
  - \* **Elbow C 1: Conflict despite social consideration to have collided with the circumstances, thus being unfairly restricted in one's scope of action**
  - \* **Forearms: Conflict of not being able to coordinate one's own range with the conditions of the social framework of action, so not being free to act.**
- \* **Extremities - Hands: Willingness to welcome others, in order to be welcomed within the framework of social reciprocity and thus socially connected.**
  - \* **Wrist C 1: Conflict of being restricted in one's freedom of action by a narrow social framework of action, i.e. not being socially connected but rather tied up.**
  - \* **Palm: Conflict of being strangers to one another in one's environment, not experience an open encounter yourself and therefore of not being able to meet the others openly.**
  - \* **Back of hand C 1: Conflict of wanting to keep your distance without being distant;**
  - \* **Finger: Conflict, getting involved with things, details, peculiarities, to try to understand, to grasp them, but conversely being not understand, but socially disconnected.**
  - \* **Forefinger: Conflict of wanting something specific but not committing to it, not wanting to openly show your demands so as not to be contradicted.**
  - \* **Middle finger: Conflict, always trying to deal to the prevailing conditions in a binding manner but only experiencing contradiction, being neither understood nor accepted.**
  - \* **Ring finger: Conflict despite efforts to accept and fulfill unwelcoming conditions of not experiencing any commitment, being not understand, being not accepted.**

- \*Little finger: Conflict, being confronted with conditions that deviate from one's own ideas, but not being able to socially detach oneself, only being able to distance oneself emotionally.**
- \* Thumb: Conflict, not taking an opposing position and therefore not being able to grasp things, so not being able to make yourself understandable**
- \* Extremities - Legs: Conflict of not being able to adapt one's standpoint to the given site conditions and therefore not being able to take a socially appropriate position.**
  - \* Buttocks: Conflict, not being able to coordinate with the seat and its conditions, not being able to adapt one's posture to it without contradiction.**
  - \* Hip joints: Conflict of not being able to develop dynamically in one's own need for movement and drive, of being limited to narrow limits and a narrow radius due to internal reservations.**
  - \* Thigh: Conflict of experiencing one's dynamics limited to a narrow radius within the framework of internal and external circumstances, of being held in place by them.**
  - \* Knee: Conflict of bowing to local conditions for the demands of social integration, of giving in to them without being accepted in one's own demands.**
  - \* Lower leg: Conflict, to be limited in its movement potential by internal and external obstacles, and so also to be limited in its radius of action, its reach.**
  - \* Ankle: Conflict, wanting to break away from the given location but being held back by internal or external reservations, therefore not being able to move forward, not being able to change.**
  - \* Feet: Conflict, to be not able to adapt to adverse or changing site conditions, and therefore also not being able to gain secure footing or support.**
  - \* Heel: Conflict with harsh local conditions make it impossible to take a firm stand and so to take a position of one's own.**
  - \* Sole of the foot C 1: Conflict, not being able to establish a relationship between yourself and the site conditions, not being able to gain a foothold under the adverse pressure to adapt.**
  - \* Toes: Conflict, not being able to adapt to location conditions and so not being able to establish a connection, thus neither being able to gain a foothold nor move forward naturally.**
  - \* Big toe: Conflict, not to be able to adjust to the adverse environmental conditions and therefore also not to be able to set a safe direction for one's steps and so to move forward as a matter of course.**
- \* Joints: Conflict, not being able to articulate oneself appropriately under the prevailing conditions, i.e. not being able to take a position, but only being able to give in against internal resistance or finally to block oneself.**
- \* Joint flexion: Conflict of wanting to unfold, of wanting to appear by extending, but being prevented from doing so by one's own reservations or adverse conditions.**

\* **Nails:** Conflict between one's own demand for freedom of action and the demands of the social environment..

\* **Nail bed:** Conflict at the basis of action, i.e. the self-confidence to stand by one's own demands even in the face of external resistance.

\* **tendons:** conflict, not being able to connect with the prevailing social conditions and so not being able to find social reciprocity or references.

## Code A, AB, AC

**Fingertips sensitive BA 2/>:**

**Sensitivity of the soles of the feet BA 2/>:**

**Elephantiasis BAC 3/><**

**Movement, moving extremities while sleeping BC 2:**

**Excitement; Complaints of the extremities due to AC 2/<:**

**Touch-sensitive joints BCA 1/>:** to be sensitive in questions of mutual coordination of attitudes or viewpoints

**Insensibility, numbness of extremities CA 2/<:**

**Numbness, numbness of the arm CA 2/<:**

**Numbness, numbness of the upper arms CA 2/<:**

**Pressure improves joint sensitivity BCA 2/>:**

**Numbness forearm CA 2/<:**

**Numbness of legs CA 2/<:**

**Numbness of feet CA 2/<:**

**Numbness of the soles of the feet CA 2/<:**

**Numbness buttocks CA 2/<:**

**numbness, numbness; Sciatica pain with CA 3/><:**

**Ankle; Insensibility, numbness of the CA 2/<:**

**inner thigh; Complaints from CA 2/<:**

**Numbness, numbness of the thighs CA 2/<:**

**Numbness, numbness of the legs CA 2/<:**

**see "General, insensibility CA 2/<;**

**Numbness, numbness of the toes CA 2/<:**

**Numbness of fingers CA 2/<:**

**fingertips; Numbness of CA 2/<:**

**little finger; Numbness of CA 2/<:**

**thumb; Insensibility of CA 2/<:**

**index finger; Insensibility, numbness of CA 2/<:**

**Numbness of the hands CA 2/<:** see "numbness" below;

**Numbness, numbness hands CA 2/<:**

**Loss of feeling in hip joints, hips, numbness CA 2/<:**

**Ankle; Insensibility, numbness of the CA 2/<:**

**headache; Numbness of extremities before C 2:**

**Hallux valgus BAC 3/><**: see below "Toes, toe problems, big toe";

**learning to walk; late BC 3/><**:

**Mouth; puts Faust in the A 1/<**: having to withdraw sensually into oneself, without contact, on one's own, only kept within oneself

**Hangnail (traumatic crack in the nail wall), cracks around nails BAC 3/><**:

**Tendency to crack fingers A 1/><** tries to relax his tension between commitment and reserve, to be unbiased

**mental effort; cold feet at AC 2/<:**

**Sensitivity to touch, sensitivity to touch toes BCA 2/>:** is very sensitive when it comes to questions of location conditions in order to gain a foothold, and is therefore very easily affected negatively

**coordination problems, clumsiness A 1/><**: having no internal agreement with the conditions in the environment being only able to adapt to a limited extent

**haste, haste; Clumsiness from A 2/><**

**write, writes illegibly A 1/><**: impatient to be only superficially connected to the messiness of social communication

**Write; Cramp of the hands in AC 2/<**

**Write; Loss of feeling in the arms in CA 2/<**

**Write; Finger pain in AC 2/<**

**Write; Thumb pain AC 2/<**

**Write; Shaking hands with AC 2/<**

**anger, wrath, annoyance; Leg pain due to AC 2/<**

**Restlessness feet CA 1/><**

**Lying, in bed, in the evening, at night in bed; Restlessness of the legs/lower legs/feet in BAC 2/>**: having to constantly to correct his position in bed, because feeling not comfortable under terms and conditions of the location

**Sit; Restlessness of the legs/lower legs/feet in BAC 2/<**

**anger, annoyance; Weakness of the legs after AC 2/<**

**Gait, walking, peculiarity of moving forward or up BA 1:** considered as gestures

**turned outwards; Feet are when walking BAC 2/>**: does not directly address the world and its conditionality, evades its conflicts in favor of consensus

**inwards, turned inwards; Feet are when walking BAC 2/<**: not wanting to face the world head-on, thinks not being welcome and therefore better introverted:

**heels; goes to the BAC 2/>**: thinks that you have to emphasize your points of view again and again and express them so that they are noticed

**Heels do not touch the ground BAC 2/<**: not being able to assert his point of view and therefore also not being able to face to the ground and his conditions

**Haste when walking A 1/<**: see "temper, haste";

**lifts feet too high when walking BAC 2/<**: thinks that you constantly have to overcome obstacles and difficulties

**climb; Urge to A 1/>**

**dignified, slow gait, rigid posture A 1/<**

**Toe walking BAC 3/<**: see above "heels do not touch.."..."

**anger, annoyance; Sciatica pain worse with AC 2/<**

**Flat feet BC 3:**

**Restlessness of the legs/feet CA 1/><**: see above "Legs; restlessness of the";

**Restlessness of the hands CA 1/><**

**Restlessness of the lower legs CA 1/><**

**lower leg; Restlessness in bed in the evening BAC 2/><**

**Tendon injury BAC 3/><**: injury shock

**Tennis elbow, epicondylitis, tennis elbow BAC 3/><**

**Tumors:**

**Exostoses (overlegs) BAC 3/><**

**feet; Overleg BAC 2/><**

**palm; Overleg BAC 2/><**

**Wrist; Overleg BAC 2/><**

**kneecap; Overleg BAC 2/><**

**Ankle; Exostoses (overlegs) BAC 2/><**

**lower leg, shinbone; Overleg BAC 2/><**

**toes; Overleg BAC 2/><**

**Ganglion wrists BAC 2/><**: see "Extremities – hands, wrist, ganglion

**Gout nodules wrists BCA 3/><**

**Ulcus cruris BCA 3/><**: see below "Ulcers, lower leg ulcers, open leg";

**Rheumatism:**

**deforming arthritis; Arthritis deformans BAC 3/><**

**Lifting the foot is impossible BCA 3/><**

**Growing Pains BCA 3/><**

Growing pains lower leg BC 3/><: see “Growing pains” above;  
 Intermittent claudication, intermittent claudication BCA 3/><:  
 legs, coordination problems; stumble, clumsy A 2/><:  
 Walking, gait:

Hobbling, limping BA 2/><:  
 small, waddling steps BA 2/><:  
 unsteady walking BA 2/><:  
 difficult gait, walks like Stone Age man BA 2/><:  
 Stumbling while walking BA 2/><:

emaciated, weak extremities BCA 3/><:

Acromegaly BCA 3/><: see “General, Acromegaly”;

falling nails BCA 3/><:

Paralysis of the feet BCA 3/><:

It is not possible to bend or bend the foot (ankle) while sitting BCA 2/><:

Paralysis, knee paralysis BCA 3/><:

Splayed foot, arched foot BCA 3/><:

contortion; Kneecap light, spontaneous BAC 3/><:

Caries of the lower leg, shin caries C 3:

flexed toes, contraction muscles and tendons of the toes C 3:

Hallux valgus (X position of the big toe, X big toe) BCA 3/><:

Ganglion wrist BCA 3/><:

Ganglion in tendons C 3:

Upper leg, exostosis of the wrist BCA 3/><:

## **Code B, BC**

**Effort; Pain in extremities after low physical activity BC 2:**

**Movement, moving extremities while sleeping BC 2:**

**Rheumatism:**

Diarrhea improves rheumatism BC 2:

Diarrhea; Rheumatism after suppressed BC 3:

Diarrhea; Rheumatism alternating with BC 3:

cold applications; Arthritis better with BC 3:

children; Arthritis, pain rheumatic with BC 3:

Menses; Extremity pain during BAC 3/><

Weather + Rheumatism BC 3:

damp wet weather; Rheumatism BC 3:

cold, wet weather, rheumatism in BC 3: see “damp, wet weather” above;

heat application, heat; Arthritis, pain in the extremities better with BC 3:

heat application, heat; Arthritis, pain in extremities worse due to BC 3:

Joint pain movement improves, pain joints BC 2:

Joint pain movement aggravated, pain joints BC 2:

Joints, pain at night, joint pain at night BC 2:

Back of the knee pain sitting, bending BC 2:

Sit; Joint swelling after prolonged BC 2:

Knee swelling after prolonged sitting BC 2:

**Lifting the extremities:**

**Raising the arm aggravates BC 2:**

raising the arm; Shoulder joint pain caused by BC 2: see “Raising arm aggravated”;

**Raising the leg aggravated, dragging leg, foot BC 2:**

**Lifting the affected limb improves BC 2:**

**Lifting the affected limb worsens BC 2:**

**Legs, feet:**

in bed at night; Heat of feet BC 2:

burning, exposing them; Feet heat at night, stretches them out from under the blanket BC 2:

- at night; Heat of hands BC 2:

Bed; cold feet in BC 2:

- Getting your feet wet makes BC 2 worse:
- Cramps in legs, calves:
- at night; Leg cramps BC 2:
  - at night; Toe cramps BC 2:
  - at night; Leg cramps BC 2:
  - at night when awakening; Leg cramps BC 2:
  - leg cramps at night after overexertion BC 2: see above “at night: leg cramps”;
- Lying in bed aggravates extremities BC 1:
- Lying in bed makes arms worse BC 2:
  - Lying in bed makes legs worse BC 2:
  - Lay; Lower leg pain in BC 2:
  - Cold improves rheumatism pain BC 3:
  - Heat improves rheumatism pain BC 3:
  - worse in cold, wet weather; Rheumatism in BC 3:
- Tendons
- Prepatellar bursitis (knee bursa), housemaid's knee BC 3:
  - Stiffness of extremities in cold, when cooling down BC 2:
  - Movement of the arms improves BC 2:
  - Movement; Arm pain movement worsens BC 2:
  - Twisting, bending the arms backwards BC 2:
  - Rest worsens arm problems BC 2:
  - Skin rash in the crook of the elbow, crook of the arm, face in newborns, small children BC 3: see above “Extremities – General, Skin Rashes”;
- elbow
- Movement: Elbow pain at BC 2:
  - bending; Elbow pain during BC 2:
  - Stretching, extending the arms worsens elbow pain BC 2:
  - raising the arm; Upper arm pain due to BC 2:
- Shoulders
- at evening; Shoulder pain BC 2:
  - at night; Shoulder pain BC 2:
  - at night; Shoulder, shoulder joint pain BC 2:
  - Exercise improves shoulder pain, shoulder joints BC 2:
  - Movement worsens pain in the shoulders, shoulder joints BC 2:
  - raising the arm; Shoulder joint pain due to BC 2:
  - Raising the arm improves shoulder joint pain BC 2:
  - Rear; Pain shoulders, shoulder joints when moving backwards, behind back BC 2:
- Buckling, giving way legs BC 3:
- Paralysis of the legs BAC 3/><:
- getting cold, wet; Paralysis of the legs in BC 3:
  - wet, cold weather; Paralysis of the legs in BC 3:
- Rest worsens leg problems BC 2:
- Lifting the foot is difficult or impossible BC 3:
- Sole of foot
- Burning soles of the feet in bed BC 2:
  - Go; Sole of foot pain better with BC 2:
  - Walking hurts, worsens sole pain BC 2:
  - stabbing pain on the sole of the foot when walking BC 2:
- Standing worsens sole pain BC 2:
- buttocks
- Sitting improves buttock pain BC 2:
  - Sitting worsens buttock pain BC 2:
- hip joints
- Hip pain in the morning, hip pain BC 2:
  - at night; Hip pain especially BC 2:
  - Exercise improves hip pain BC 2:

Exercise worsens hip pain BC 2:  
 stooping; Hip pain in BC 2:  
 continued exercise improves hip pain BC 2:  
 Walking improves hip pain BC 2:  
 Walking worsens hip pain BC 2:  
 Limping, hobbling due to hip pain, hip pain BAC 2/><:  
Menses; Hip, pain, hip pain during BAC 3/><:

#### isciatca

Bending the leg improves sciatica pain BC 2:  
 Exercise improves sciatica pain BC 2:  
 Exercise worsens sciatic pain BC 2:  
 Bending improves sciatica pain BC 2:  
 Bending over makes sciatica pain worse BC 2:  
 Walking aggravated; Sciatica, sciatica BC 2:  
 Walking improves sciatica pain BC 2:  
 Lying down improves sciatica pain BC 2:  
 Lying down makes sciatica pain worse BC 2:  
 Sitting improves sciatica pain BC 2:  
 Sitting worsens sciatica pain BC 2:

#### Knee

at night, in bed, lying down; Pain, knee pain rheumatic BC 3:  
 Bending and bending the knees improves (stretching worsens) knee pain, knee pain BC 2:  
 Exercise improves pain, knee pain, knee pain BC 2:  
 Exercise worsens pain, knee pain, pain knee BC 2:  
 Go; Knee pain better with BC 2:  
 Go; Pain, knee pain worse due to BC 2:  
 Sit; Pain, knee pain during BC 2:  
 Stretching, extending the knees, legs improved (bending worsened) Knee pain BC 2:  
 to climb stairs; Knee pain moving down BC 2:  
 Climb stairs; Knee pain due to BC 2:

#### Back of the knee

Stand up; Pain in the back of the knee during BC 2:  
 sitting, bending; Back of the knee pain BC 2:

#### Knee weakness

getting up from sitting; Knee weakness at BC 2:  
 Go; Weakness, knee weakness at BC 2:  
 Descending a staircase; Knee weakness at BC 2:  
 Climb stairs; Weakness of the knees after BC 2:

#### ankle

at night; Pain ankle BC 2:  
 Walking worsens ankle pain BC 2:  
 Walking improves ankle pain BC 2:

#### Thigh

Walking improves thigh pain BC 2:  
 Walking worsens thigh pain BC 2:

#### lower leg

at evening; Lower leg, itching, itchy skin BC 2:  
at night, in bed; Itching of the lower legs BC 2:  
at night; Lower leg pain BC 2:  
 Walking improves lower leg pain, lower leg pain BC 2:  
 Walking aggravated; Lower leg pain BC 2:  
 Sit; Pain in the lower legs during BC 2:  
 Walking aggravates lower leg weakness BC 2:

#### Hands:

Closing of fists makes BC 1 worse:  
 Pain when closing the hands, making a fist BC 2: see below "Pain of the hands, making a fist";  
 Palm pain hinders flexion of fingers: see "Palm, pain" below  
 Closing of fists improves BC 1:  
 Movement; Hand cramps in BC 2:  
 Stretching fingers difficult, impossible BC 2:  
 Gripping, touching with hands aggravates BC 2:  
 Palm pain hinders flexion of fingers BC 2:  
 rotating the wrist; Pain when twisting BC 2:  
 supported hands; numbness BCA 2/<:  
 driving a car, cycling; Loss of feeling in the hands with BCA 2/<:  
 Awakening; Hand numbness in BCA 2/<:  
 Dropping objects when grasping, weakness of the finger causes things to fall BC 3/<:  
 grasping, grasping, holding; Numbness, numbness of hands, fingers during BCA 2/<:  
 Grab; Hand cramps during BC 2:  
 at night; Callousness, numbness hands BCA 2/<:  
 Effort; Shaking hands at BC 2:  
 Grasping, grasping, holding objects; Trembling hands, fingers during BC 2:  
 Numbness legs  
 Walking worsens leg numbness BC 2:  
 Sit; Leg numbness in BC 2:  
 crossed legs numbness BC 2:  
 Go; Heel pain, heel bone pain with BC 2:  
 Effort; Pain in extremities after low physical activity BC 2:  
 Walking aggravated; Numbness, numbness of the legs BC 2:  
 Sit; Numbness, numbness of the thighs BC 2:  
Sleep; Loss of sensation in the extremities in BA 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

#### Extremities - General:

Arthritis C 3: see below "Joints, arthritis – joint inflammation";  
 Sensations, feelings in the extremities C 1: see "General, Feelings";  
 Relaxation of the joints C 3:  
 Feelings in extremities: see "General, Feelings";  
 Joints:  
 Arthritis, joint inflammation, polyarthritis, rheumatism C 3:  
     several joints; Arthritis (polyarticular) C 3: see "Arthritis" above;  
     respiratory catarrhs; Rheumatism before or after C 2:  
     Diarrhea, diarrhea during rheumatism C 3:  
     Fever; subthreshold + rheumatism C 3:  
         - Rheumatism, arthritis + intermittent fever C 3:  
     Rashes + Rheumatism C 2:  
         - alternating with rheumatism; Rashes C 3:  
         - after skin rashes; Rheumatism C 3:  
         - Hives, urticaria + rheumatism C 3:  
     tonsillitis; Rheumatism follows C 3:  
 Osteoarthritis C 3  
     Osteoarthritis hips, hip joints C 3:  
 Joint bends, discomfort, pain in the elbow bend, back of the knee C 1:  
 Joint pain, joint pain in general C 1:

**Joints, pain small, joint pain small; Complaints of the small joints C 1:**  
 Joint swelling (knees, ankles, finger joints, etc.) C 1: see “General, Allergy, Edematic Swellings” and “General, Dropsy”;  
 chronic joint swelling C 3:  
 dropsy joint swelling C 1:  
 - red joint swelling C 1:  
   . painful red joint swelling C 1:  
     - white, pale joint swelling C 1:  
   . painful white joint swelling C 1:  
     painless swelling (knee) C 1:  
**Rashes of the joints C 1:**  
**joints; Cracks C 3:**  
**joint bends; Cracks C 3:**  
   Cracking, tension joints C 2:  
**elbow; Cracking the C 2:**  
   Finger; Cracking the C 2:  
   wrists; Cracking the C 2: “;  
**Knee; Cracking the C 2:**  
**Ankle; Cracking the C 2:**  
**Shoulders; Cracking the C 2:**  
   Stiffness of the joints: see “Stiffness” below;

**\* SLEEP: Being able to let go of control requires that you are connected to your**  
**immediate social environment and that your social positioning is sufficiently**  
**confirmed.**

## Code A, AB. AC

**improves; Sleep BA 1/<:** Desire to be isolated and thus detached from social problems

**Falling asleep spontaneously, suddenly BA 3/><:** see above "improves; sleep"

**Effort; Falling asleep with mental AB 2/<:** avoids the challenge

**aggravated; Sleep BA 1/>:** Rejection of being socially isolated through sleep and only being focused on oneself

**comatose sleep BA 3/><:**

**Position, sleeping position BA 1:**

**Prone position BA 1/<:** keeping yourself covered, having to take cover in order to be able to withdraw, to let go

**Knee-elbow position BA 1/><:** half releases control, half maintains it

**Lying with legs drawn up, curled up like a dog improves BA 1/<:**

**supine position; Inclination BA 1/>:** is willing to rely on the location

**Supine position impossible BA 1/<:**

**unable to free oneself from the supine position, to turn BA 2/><:** unable to leave oneself or distance oneself, only able to freeze.

**lateral position; Tendency BA 1/><:** not wanting to completely rely on the environment or the location, but also not wanting to choose one or the other

**Side position impossible BA 1/><:** either relying on the environment or the location, not wanting to make a compromise under any circumstances

Left side improved, right worse; Lying on the BA 1/<: under no circumstances wants to let go of control over the environment  
right side improves, left worse; Lying on the BA 1/>: doesn't want to let go of control of the location

Sit; Tendency to lie in bed BA 1/>: maintains position, is on guard  
stretching, bending the head backwards while sleeping (side lying position) BA 1/>:

is afraid to get involved in the position, cannot gain confidence, only tenses up  
often changes sleeping position BA 1/<: is afraid to get involved in the location, cannot gain confidence and therefore cannot find a positio

alcoholics; Insomnia with BA 3/<:

Fear; Insomnia from AC 3/<:

anger, annoyance, rage; Insomnia after AC 2/<:

old people; Insomnia BAC 3/><:

Effort; Insomnia after mental AC 2/<:

physical exertion; Insomnia according to BC 2:

comatose sleep BA 3/><:

Babies, toddlers Insomnia day and night BAC 3/><: developmental problem

Excitement; Insomnia in AC 2/<:

exhaustion, weakness, tiredness; Insomnia despite C 2:

tension of expectations; Insomnia caused by AC 2/><:

Eat; Insomnia according to BC 2:

rush of thoughts; Insomnia caused by AC 2/<:

mentally ill; Insomnia in AC 3/><:

Sounds; Awakening, awakened by low BA 2/>:

Conversations, reflection improve insomnia AC 2/>:

recovery from debilitating illness; Insomnia after convalescence BC 2:

Half asleep, sleep light, not deep BA 1/><:

Sleep lightly, half asleep; hears everything BA 2/><:

children; Insomnia from BAC 3/><: developmental problem

Babies insomnia day and night BAC 3/><:

Child needs to be rocked, rocked; Insomnia BAC 2/><:

nervous toddlers, don't sleep, want to play BAC 3/><:

Newborn, insomnia BAC 3/><:

no situation is right; Insomnia due to restlessness AC 2/><:

grief; Insomnia A 2/<: worsened

grief; Drowsiness due to A 2/>: improves

nervous insomnia, sleepless due to nervousness AC 2/><:

Restlessness; Insomnia caused by AC 2/><:

fright; Insomnia after BAC 3/><:

Pregnancy; Insomnia in BAC 3/><:

Sadness; Insomnia caused by AC 2/<:

Perforation; Insomnia in BAC 3/><:

Desire for sleep, need for sleep is great, "sleep addiction", sleep is prolonged BA 3/<:

not having to submit to the social pressure to adapt, only being focused on oneself

Sleepwalking, lunatism BA 2/><: Basic feeling of being without references, like the night, and thus searching for secure references between waking and sleeping

difficult awakening in the morning BA 2/<:

## B, B.C

Insomnia at night BC 2:

Daytime insomnia BC 2:

Sleep; Conditions worse after BC 1:

Lack of sleep worsens conditions BC 1:

Falling asleep B 1:

**Difficult to fall asleep, difficulty falling asleep B 2:** cannot let go of control, feels that he has to stay present and be on his guard

**Difficulty falling asleep, insomnia before midnight BC 2:** see "Difficult falling asleep" above;

**Difficult to fall asleep + wakes up too early as if well rested BC 2/>:**

**Difficult to fall asleep B 1:** see "Falling asleep" above;

**Work; Falling asleep spontaneously on the B 2: avoids the challenge**

**Eat; Falling asleep, tired after BC 2: avoids the challenge**

**Read; Drowsiness, exhaustion at AC 2/<: avoids the challenge**

**Sit; Falling asleep at B 2: being able to let go of control under controlled conditions**

**Sweat when falling asleep BC 2:** Problem with letting go of control, only being able to release yourself emotionally (through sweat) from your excitement

**Awakening:**

**Awakening improves B 1:**

**awakening at night; worse with/in B 1:** indifference between wakefulness and sleep

**awakening in the morning; worse with (after sleep) B 1:** does not want to face the conditions of social presence

**awakening from sleep (day and night); worse after sleep B 1:**

**wakes up too early as if well rested, falls asleep normally CB 1:**

**1 o'clock (0-2): Awakening B 1:**

**3 o'clock (2-4) awakening; Insomnia after awakening BC 1**

**5 a.m. (4-6): Awakening B 1:**

- **5 a.m. awakening + urge to defecate BC 2:**

**Awakening; frequent CB 1:** it is a routine of social control that can only be let go to a limited extent

**children; Awakenings common with BAC 3/><:**

**Nap; worse according to BC 1:** being a prisoner of your duties, not being able to let go of them

**Pain awakens; Sleep disturbed, interrupted, awakening with/by CB 3:**

**Yawning B 1:** see "Breathing, yawning";

**Nap; worse after BC 1:**

**open in sleep; Mouth is BC 2:**

**Code C: All C symptoms are considered an internal system process and should therefore be considered underlined.**

palpitations, racing hearts; Insomnia due to C 3:

Hunger; Insomnia caused by BC 2:

Itch; Insomnia due to C2

Tiredness, sleepiness C 1:

Insomnia C 3: Problem, trusting in the certainty of one's social value and the security of one's social connections, letting go of control

Complaints, physical problems cause insomnia C 2:

Fatigue; Insomnia despite C 2:

Night work, conditions, complaints worse due to lack of sleep C 2:

Pain; Insomnia due to C 2:

\* **DREAMS:** Feeling of being detached from the social superstructure, its social rules, norms, relationships through sleep, but thereby being confronted with your inner emotional landscape, i.e. being at the mercy of yourself, your inner attitude, beyond conscious control.

More than 50% of mood symptoms are uncertain in their interpretation due to vagueness in colloquial language; this proportion is significantly higher in dreams. So I won't go into the dreams.

\* **FROST:** Conflict, being exposed to adverse social conditions, not being able to escape them, only being able to withdraw emotionally, and to keep a distance.

### Code A, AB, AC

anger, annoyance; Frost after AC 2/<:

Unconsciousness, fainting + frost CA 3/<:

Excitement; Frost after C 2/<:

mental effort; Frost after AC 2/<:

Restlessness, nervous in frost, chilliness CA 2/><:

Chills, involuntary shaking, startling when urinating BCA 2/><: Having to repress emotions (urinate), but only to be able to do so against an inner threshold

### Code B, B.C

to cover, to expose despite the cold, frost of the body; Rejection of heat despite frost BC 2:

sticking your hand out from under the blanket; Frost at BC 2:

overheating; Frost caused by physical BC 2:

Warmth; Frost no better with BC 2:

Wind; Frost in/through BC 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

Thirst during frost CA 2/<:

Fever alternating with frost C 2:

Itch; Frost aggravates C 2:

spreading to body parts; Freeze from certain C 2:  
 arm spreads; spreading frost, from C 2:  
 feet; spreading frost, from C 2:  
 back spreads; spreading frost, from C 2:  
 Chills C 2:

\* **FEVER: Conflict, to be only able to bottle up your emotions, having to accept to be helpless, not being able to solve the cause, and therefore not being able to vent your excitement.**

## Code A, AB, AC

appearing paroxysmal, sudden fever: BCA 3/><

Unconsciousness, fainting with fever BCA 3/><: flight in consciousness

Delirium with fever CA 3/<: flees from social relationships and is therefore without social orientation

Fantasizing in a fever, fever fantasies CA 3/<: see above "Delirium with .."

Thirst with fever CA 2/<: wanting to resolve the emotions

Thirst for cold things with fever AC 2/<: see "Thirst with fever" above;

Thirstlessness during fever CA 2/>: Feeling excited, but not wanting to detach socially, being emotionally dependent, attached

Excitement causes fever AC 2/<:

Awakening; Fever in AC 2/><:

Hearing loss with fever CA 3/<: Escape from belonging

Yellow fever (mosquito transmission, liver and kidney involvement) BAC 3/><:

Sensitivity to noise in fever BCA 2/>: being upset and therefore sensitive to criticism, dissonance,

catheter; Fever after BAC 3/><:

Childbed fever BAC 3/><:

Collapse with fever CA 3/<: flight in consciousness

Read; Fever in AC 2/<:

Photosensitivity with fever BCA 2/>: refuses to show yourselves, to come into the light

Fantasizing in fever, fever fantasies CA 3/<: see above "Deliria in fever";

Sleep; Fever in BC 2:

Sleep; Fever after BC 2:

Fainting with fever AC 3/<: see above "Unconsciousness, fainting with fever";

fright; Fever after BAC 3/><:

breastfeeding; Fever, milk fever due to BAC 3/><:

**traumatic fever, injury fever BAC 3/><**: being due to the shock of the accident unable to express oneself or react in a targeted manner, only being helplessly agitated  
**Tropical fever, tropical fever: BAC 3/><**

## Code B, B.C

Fever as a modality

Improvement of symptoms caused by fever BC 2:

Worsening of symptoms due to fever BC 2:

Fever exertion BC 2:

Eat; Fever after BC 2:

Eat; Fever better after BC 2:

Glow of parts of the body on which one lies in fever BC 2:

Skin rashes with fever, rash fever (measles, scarlet fever) BC 3:

Pfeiffer glandular fever, mononucleosis BC 3:

Time of day of fever:

In the morning; Fever BC 2:

morning; Fever BC 2:

afternoon; Fever BC 2:

at evening; Fever BC 2:

at night; Fever BC 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

external cold, internal heat; Fever with C2:

persistent fever, permanent fever, continua (fluctuations in the fever range not more than 1 degree) C 1:

Rash fever C 2: see "Skin rashes with fever" below;

Continua C 1: see "persistent fever" above;

Vomiting during fever C 2: see "Stomach, fever + vomiting";

lack of fever heat, fever absent C 3:

Frost alternating with fever C 2: see "Frost, fever alternating with frost"

pain in limbs; Extremities; pain of; with fever C 2:

Urticaria with fever C 3:

Hoarseness during fever C 2:

Cough aggravates fever C 2:

intermittent fever C 2: see "intermittent fever" below;

Cold within, heat without; Fever with external heat and internal cold C 2:

Cramp with fever, febrile seizure C 3:

Cramp with fever, febrile seizure (clonic = convulsively twitching) C 3:

Cramp with fever, febrile convulsions (tonic = long-lasting contractions of strong intensity) C 3:

Modalities of the outbreak of fever: see below "Circumstances of the outbreak of fever";

Urticaria with fever C 2: see above "Skin rashes with fever, nettle rash";

Pain, aching limbs with fever C 2: see above "Aching limbs with fever";

Weakness, exhaustion, tiredness with / during fever: C2 Sweat with fever C 2:

Sweat with fever C 2:

Absence of sweat with fever C 2:

septic fever BAC 3/><

Deafness, hearing loss with fever C 3:

tropical fever BC 3:

Low temperature, hypothermia C 3:

Intermittent fever, intermittent fever (alternating between fever and non-fever, fever attacks every hour: in contrast to the continua, it does not fluctuate by just 1°C) C 2:

Diarrhea + intermittent fever C 2:

Gout + intermittent fever C 3:

remittent fever (the fever fluctuates during the day from 1 to 1.5 °C) C 2:

Rheumatism, arthritis + intermittent fever C 3:

Trembling with fever C 2:

\* **SWEAT:** Conflict of wanting to escape from an oppressive social proximity, but being held tight and therefore only being able to secrete oneself emotionally (through sweat).

## Code A, AB, AC

Sweat of fear, sweat caused by fear AC 2/<:

Excitement; Sweat according to AC 2/<:

Sweat after anger, anger AC 2/<:

Awakening; Sweat according to AC 2/<:

mental effort; Sweat at AC 2/<:

nervous sweat AC 2/><:

Sleep; Sweat profusely in the BC 2:

Write; Welding problems with the AC 2/<:

Speak; Sweat worse with AC 2/<:

Type of sweat:

dyes laundry; Sweat CA 3:

blue; Sweat stains laundry CA 3/<: signals the desire to be distant, wants to avoid closeness

yellow; Sweat stains laundry CA 3/><: wishes to keep social distance without being isolated,

body odor (sweat); Dislike of one's own CA 1/>: thinks that the way he is personal he doesn't impress, so instead of impressing, he's just peculiar

## Code B, BC

Shortness of breath causes sweat, shortness of breath with sweat, sweating CB 2

Sleep; Lots of sweat in the BC 2:

Sweat, sweating aggravated; Secretion of BC 1:

Sweat, sweating improves BC 1:

Times of day

In the morning; strong welds BC 2:

at night; strong welds BC 2:

Effort; heavy sweating with low BC 2:

Eat; Sweat BC 2:

Drinks worsen sweating; warm BC 2:

Cold; Sweat, sweating aggravated in BC 2:

Menses; Sweat during BAC 3/><:

Rest worsens sweat BC 2:

suppressed sweat; Complaints caused by BC 3:

hot sweat, due to heating, exertion BC 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

lack of sweat C 1: see below “missing, absent sweat, cannot sweat”;

Foot sweat, sweaty feet C 1: see “Extremities – legs, sweat, foot sweat”;

Facial sweat C 1: see “Face, sweat, facial sweat”;

Hand sweat, sweaty hands C 1: see “Extremities – hands, sweat”;

Fever; Sweat at C 2: see “Fever, sweat at”;

Crisis sweat, sweat in critical fever phase C 3:

Pains; Sweat due to C 2:

cold sweat C 1:

    sticky sweat C 2:

stinking, foul-smelling sweat C 3:

    Foot sweat smelly C 3: see “Extremities – legs, sweat, foot sweat”;

    Genital sweat, smelly C 3: see “Genitals, sexual sphere - General, secretions, sweat of the genitals, smelly”;

    acidic smell of sweat C 3: see above “smelly sweat”;

    Urine smell of sweat C 3:

    Onion smell of sweat C 3:

missing, absent sweat, cannot sweat C 1:

hot sweat C 1: see above “Type of sweat, hot sweat”;

cold sweat C 1: see above “Type of sweat, cold sweat”;

debilitating sweat BCA 3/><

\* **SKIN:** Conflict of not being touched socially but feeling harassed, being finally unable to adapt to the conditions or to isolate from them, because of being emotionally and/or socially held.

\* **Hair:** Conflict of having to give up one's independence and autonomy in favor of social security, of having to subordinate oneself in order to be social held socially.

## Code A, AB, AC

**sensitive skin, sensitive to touch BCA 2/>:** to be very easily affected by questions of mutual social consent

**Blistering of the skin as if burned (?); blistering rash BAC 3/><:** injury shock without knowing the reason?

**Sensations, feelings of the skin: Hypersensitivity BA 1/>:**

**Numbness, numbness of the skin CA 1/<:**

**Excitement; Skin complaints with AC 2/<:**

**anger, annoyance; yellow skin color according to AC 2/<:**

**Excitement; Urticaria, skin rash in AC 2/<:**

**Excitement causes hives AC 2/<:**

**Psychoses + Psoriasis AC 3/><:**

**fright; Psoriasis due to BAC 3/><:**

**Color:**

**Age spots BCA 3/><:**

**dark skin spots, age spots BCA 3/><:**

**Skin color:**

**Blueness, cyanosis of the skin CA 1/>:**

**blue-black swellings CA 3/>:**

**brown; Skin color CA 1/>:**

**brown spots, chloasma, cafe au lait, coffee spots CA 2/>:**

**. brown pigmentation after eczematous inflammation CA 3:**

**Moles CA 1/>:**

**Freckles AC 2/>:**

**. merging freckles CA 3/>:**

**Hyperpigmentation of the skin, Addison's disease, adrenal insufficiency CA 3/>:**

**yellow skin color CA 1/><:**

**green; Skin color CA 1/<:**

**copper-colored skin, rashes CA 1/>:**

**marbled skin CA 2/><:**

**red skin color CA 1:**

**diseased parts; red discoloration CA 1/>:**

**Fire stain, nevus flammaris CA 3/>:**

circumscribed, surrounded red skin spots CA 2/>:  
dirty, dingy skin color CA 1/>:  
blackish skin color CA 3/>:  
Black discoloration of body parts, gangrene CA 3/>:  
Place; blackish skin color on individual AC 2/>:  
white skin CA 1/<:  
spot on the skin, skin spot, circumscribed, bounded areas CA 2:  
yellow spots CA 2/><:  
white spots CA 2/><: see "Vitiligo" below;  
Fish scale disease BCA 3/><:  
 Feelings of the skin A 1: see "Sensations of the skin" above;  
 sensitive to touch, skin rashes sensitive to touch BCA 2/>:  
 rashes; Mood symptoms due to suppressed BAC 3/>:  
 Skin Wolf, Intertrigo BAC 2/><: auto-aggressive  
 Breast; Skin wolf under the BC 2:  
 Insect bites, bite wounds, problems BAC 3/><: excited, to be exposed to intrusiveness,  
 having to accept to be used, being not able to defend or withdraw yourself from it  
 Scabies BAC 3/><: Feeling of being viewed as a parasite, of being harassed simply by  
 being here, of having to endure, of being dependent  
 Itching  
Sleep; Itching, itchy skin, pruritus in BC 2:  
Despair caused by itchy skin CA 2/><:  
voluptuous itching CA 2/><:  
Cancer BCA 3/><: see "skin cancer" above;  
Lichen planus, nodular lichen of unclear origin C 3:  
lupus; Autoimmune disease of the vascular connective tissue C 3:  
Lupus erythematosus (butterfly-shaped over nose and cheek) C 3:  
Lupus tuberculous, carcinomatous, ring-shaped, circular C 3:  
Leprosy BCA 3/><:  
Birthmarks, nevi BAC 3/><:  
Scar problems BAC 3/><: After the shock of injury, he cannot return to his old impartiality  
Breaking open old scars BAC 3/><: see "Rebreaking old scars" below;  
painful scars BAC 3/><:  
Burning of scars BAC 3/><:  
Veins covered, scars from BAC 3/>:  
Adhesions, wild meat, granulation, granulation tissue from ulcers (attention, not  
from injuries) BAC 3/><:  
 Adhesions, wound growths, wild meat, granulation, granulation tissue after injuries  
 (note: not due to ulcers) BAC 3/><:  
Reappearance of old scars, scar hernia BAC 3/><:  
Striae (pregnancy marks, growth marks) BAC 3/><:  
 Sunburn BAC 3/><:  
Vitiligo, white spot disease CA 2/><:  
arms; Vitiligo, white spot disease of CA 2/><:  
Tubercle BAC 3/><:  
 Injury; Gangrene according to BAC 3/><: Can't find his way back to his old form after an  
 injury shock  
 Bruises, bruises, hematoma, tendency BAC 3/><: had been subjected to an attack and  
 wants to distance himself, to distance himself emotionally  
 Purpura hemorrhagica, bruising without any noticeable effect (often a sign of  
 aging) BAC 3/><: thinks he was attacked and wants to keep his distance therefore  
 spontaneous bruising BAC 3/><: see above  
 Gangrene BAC 3/><:  
 Bedsores, pressure ulcers BAC 3/><:  
 Blood sponge, hemangioma BCA 3/>< :  
 Erysipelas, erysipelas, erysipelas CA 3/>:

Age-related erythema BCA 3/><:  
 allergic rash BCA 2/><  
 Sun allergy, skin rashes in sun BCA 2/><:  
 allergic hives BAC 2/><: see "allergic rash" above;  
 contact eczema, urticaria on food; Skin allergy BCA 2/><:  
 antibiotics; Nettle rash according to BCA 3/><:  
 shellfish (mussels, crabs, etc.); Nettle rash according to BAC 2/><:  
 Milk; rash: BAC 2/><  
Chickenpox BCA 3/><: see "Skin rash, chickenpox" above  
Perforation; Itching during BCA 3/><:  
old people; Itchy skin BAC 3/><:  
diabetic gangrene, gangrene BCA 3/><:  
Diabetes + boils BAC 3/><:  
Insensibility, numbness of the skin CA 1/<:  
Fish scale disease, ichthyosis BCA 3/><:  
 - white skin color under scales CA 3/<:  
Varicose vein ulcer of the lower leg, leg ulcer BCA 3/><:  
Skin cancer, epithelial cancer BCA 3/><:  
cancerous, eroding skin ulcers BCA 3/><:  
Melanoma BCA 3/><:  
destructive, tissue-destroying, destructive eczema BCA 3/><:  
malignant ulcer BCA 3/><:  
cancerous, eroding skin ulcers BCA 3/><:

## Code B, BC

dentable skin dented by pressure BC 2:  
 Strips after scratching, dermatography; red BC 2:  
 Soreness, excoriation after scratching, rubbing BC 3:  
 Bowel movement; Goosebumps during BC 2:  
 Rashes  
at evening; Rash BC 2:  
 Cooling, cold water worsens rash Bathing, washing worsens rash BC 2:  
 covered body parts; Rash on BC 2:  
 - Diaper rash BAC 37/><:  
sweating body parts; Rash on BC 2:  
Sweat burning, corrosive, wound-eating BC 3:  
 Scratch; BC 2 rash:  
 crusts; Scratching causes rashes with crusts BAC 2/><:  
 Urticaria  
 Cooling, bathing, cold causes hives BC 2:  
 Bathing causes hives BC 2: see "Chilling causes hives" above;  
 Heat, overheating (due to exercise) causes hives BC 2:  
 Cold causes hives BC 2:  
 Clothing pressure causes hives BC 2:  
 Scratch; Nettle rash caused by BC 2:  
 Get wet; Urticaria caused by BC 2: see above "Cooling, bathing causes urticaria";  
Summer; Rash worse in BC 2:  
 Sweets aggravate; Rash BC 2:  
 suppressed rashes; Complaints caused by BC 3:  
Chickenpox, Varicella BC 3:  
Rashes during/during menses BAC 3/><:  
 scratch becomes an ulcer; everyone; Ulcer tendency BC 3:  
 Neck: Friction from clothing causes soreness on the BC 2:  
 Itchy skin, pruritus:

In the morning; Itching, itchy skin BC 2:  
at evening; Itching, itchy skin BC 2:  
at night; Itching, itchy skin, pruritus BC 2:

taking off clothing; Itching at BC 2:

Bathing improves itching (see also below: Hot water improves, hot bath improves itching) BC 2:

Bathing makes itching worse (see also below: Hot water makes itching worse, hot bath makes itching worse) BC 2:

Touch worsens itching BC 2:

#### Temperature

Bed heat makes itching worse BC 2:

Frost cold, winter aggravates itching, skin, rashes BC 2:

Cold water makes itching worse BC 2:

Cold improves itching BC 2:

Cold makes itching worse BC 2:

Scratching until it bleeds, it's sore BC 2:

Scratch; Itching changes location to BC 2:

Scratch; Weeping rash according to BC 2:

Scratching worsens itching BC 2:

Scratching causes burning; Itching with burning after scratching BC 2:

Pregnancy; Itching in the BC 3:

Sweating worsens itching BC 2:

- worm infestation; extreme itching of the skin (of the rectum) with BC 3:

- changes location after scratching; Itching BC 2:

Hot water improves (cold water worsens) itching BC 2:

- hot bath relieves itching BC 2:

Hot water worsens (cold water improves) itching BC 2:

- hot bath worsens itching BC 2: rejection, heated expectation, being self-conscious:  
 see above "Hot water worsens itching";

Wool aggravates BC 2:

#### cracks

Wash; Cracks, skin cracks, rhagades due to BC 3:

Winter; Cracks, skin cracks, rhagades BC 3:

#### swelling

Pressure causes swelling BC 2:

suppressed rashes; Complaints caused by BC 3: see "Skin rash" above;

Varicella BC 2:

#### Warts

Condylomas suppressed, suppression BC 3:

#### Soreness

Friction from clothing causes neck soreness BC 3:

Soreness after rubbing BC 3:

is sore; must scratch until skin BC 2:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

Abscesses C 3: see "General abscess";

Connective tissue problems, weakness C 3: see "General, connective tissue problems";

#### Blow:

dark, blood-filled blisters C 3:

Bleeding of the skin C 3: see "General, bleeding tendency"

adherent skin; Feeling of skin growing together with bone C 2:  
 hair, hair (clothing) pulled; Feeling on C 2:  
 tight; Feeling skin is C 2:  
 closely; Feeling of tension in the skin as with C 2: see below "Sensation of tension in the skin";  
 sagging skin; Feeling of C 2:  
 sparks on the skin; Feeling electric C 3:  
 relaxed; Feeling like skin is hanging C 2:  
 Gnawing, eating; Sensation of C 2:  
 Tingling of the skin C 2:  
 cord under the skin; Feeling of a C 2:  
 Feeling of tension in the skin C 2:  
     closely; Feeling of tension in the skin as with C 2:  
     worms under the skin; Feeling of C 2:  
 Furuncles, carbuncles (multiple boils) C 3:  
 Goosebumps C 2:  
 Gangrene, gangrenous ulcers, gangrenous ulcers C 3:  
     Uterine gangrene C 3: see "female genitalia, uterus, uterine gangrene";  
     Pulmonary gangrene, pulmonary gangrene C 3: see "Chest, chest – lungs, pulmonary gangrene";  
     Gastric gangrene C 3: see "Stomach, gastric gangrene";  
     Oral gangrene C 3: see "Mouth, ulcers, gangrene";  
     Penile gangrene C 3: see "male genitalia, penis, penile ulcers, penile gangrene";  
     Pharyngeal gangrene C 3: see "Inner throat, pharynx, gangrene";  
     Gingival gangrene C 3: see "Mouth, gums, gingival gangrene";  
 Ulcers C 3: see "Skin ulcers" below;  
 gritty, gritty, grainy skin C 3:  
 hair loss body hair; generalized C 3:  
 hair growth; excessive C3:  
 Rash C 1:  
     Peeling of the skin, flaking, flaking C 3:  
     spreading, flowing apart; Skin rashes are BCA 3/><3:  
     hairy body parts; Rash on C 1:  
     bleeding rash C 3:  
     burning rash C 1:  
     does not break out; Rash C 2:  
     skin folds; C 2 skin rashes:  
     joint bends; Skin rashes in C 2: see "Extremities – General, Skin rashes, joint flexures";  
     Body; Rash, eczema, herpes extends throughout BCA 3/><:  
     smelly rash C 3:  
     Transitions from the skin to the mucous membrane, mucous membrane transitions C 2:  
     under the skin; Complaints C 2:  
     migratory rash C 2:  
     confluent rash BCA 3/><:  
 Acne C 3  
     Acne that does not want to mature C 3: see "General, abscesses, delayed suppuration, abscesses that do not mature";  
     Blister rash C 3: see "Blistering of the skin" above;  
     Blister rash C 3: see "Blistering of the skin" above;  
     Pustules C 3: see "acne" above and "pustular rashes" below;  
     moist rashes C 2: see "weeping rashes" below;  
     fish scale disease";  
     eeding, phagedenic skin rashes C 3:  
     Skin fungus, dermatomycosis C 3:

- Herpes C 2:**  
**Herpes zoster, shingles C 3:**  
 - Pain after herpes zoster C 3:  
 weeping, secreting herpes C 2:  
 circular, ring-shaped herpes C 2:  
**Impetigo, ringworm C 3:**  
 itchy skin rash: C 2 see below "itching skin, skin rash, more itchy";  
**granular, granular skin rashes C 3:**  
**Crusty eczema, crusty rashes C 3:**  
 Crusty eczema, crusty rashes weeping, moist C 3:  
**Lichen BCA 3/><: see below "Lichen, nodular lichen";**  
**weeping, secreting, moist skin rashes C 2:**  
 Rashes itchy, scratching aggravated, weeping, moist after scratching BC 2:  
 smelly secretions from skin rashes C 3:  
**Hives, hives, urticaria C 2:**  
 chronic hives C 3:  
 Fever with hives C 2:  
 Liver problems + hives C 2:  
 welts; Urticaria with C 2:  
**papular rash, nodular rash C 3:**  
**Pemphigus, blistering of the skin and mucous membranes C 3: see above "Blistering of the skin";**  
**Pimple C 3:**  
**Psoriasis, psoriasis C 3:**  
 chronic psoriasis C 3:  
 arms; Psoriasis of: see "Elbow" below;  
 - Elbow psoriasis C 3:  
 Hands, psoriasis of: see "Extremities – Hands, Psoriasis" above;  
 - fingers; Psoriasis C 3:  
 - palm; Psoriasis C 3:  
 - Back of Hand; Psoriasis C 3:  
 Legs; Psoriasis of:  
 - sole of foot; Psoriasis of C 3:  
 - Knee; Psoriasis of C 3:  
 - Psoriasis ankle C 3:  
 - Psoriasis lower leg C 3:  
 Joint pain + psoriasis C 3:  
**Pustular rash, pus-filled blisters, pustules C 3:**  
 itchy pustules C 3:  
 malignant pustules BCA 3/><:  
 Inflammation of hair follicles with pustules C 3:  
 Crusts on pustules, peeling pustules C 3:  
 ring-shaped, skin rashes C 2: see above "Herpes, ring-shaped";  
 cracked skin rashes C 3: see "cracks" below;  
 scaly skin rashes in general; Pityriasis C 3:  
 Urticaria C 2: see "hives" above;  
 Skin rashes, skin problems alternating with other complaints C 2:  
 Skin bleeding C 3: see "General, bleeding tendency";  
 Skin ulcers C 3:  
 Secretions from ulcers C 3: wanting to secrete but not being able to;  
 secretions; Ulcers with copious amounts of C3:  
 caustic, wound-eating secretions from the ulcer C 3:  
 bloody discharge; Ulcers with C 3:  
 foul-smelling discharge from the ulcer C 3:  
**Characteristics and appearance of the ulcers:**  
 punched out, perforating; sharp-edged ulcers such as C 3:

Ulcers heal poorly, recurrent, chronic skin ulcers C 3  
 jagged edges; Ulcers with C 3:  
 Crusts over ulcers C 3:  
 painful skin ulcers; very C 3:  
 painless ulcers C 3:  
 smelly ulcers C 3: see above "secretion, foul-smelling"  
 Location of ulcers C 3:  
 Heel ulcer C 3:  
 fingertips; Ulcers of C 3:  
 sole of foot; Ulcers of C 3:  
 Joint ulcer C 3:  
 Palm: Ulcers of the C 3:  
 Back hand ulcer C 3:  
 Lower leg ulcer C 3:  
 Shin ulcer C 3:  
 Toe ulcer C 3:  
 Itchy skin C 2: see "Itching" below;  
 Herpes zoster C 3: see "Skin rash" above;  
 Heat of the skin C 1:  
 Corns C 3:  
 inflamed corns C 3: vain attempt to adapt: see "corns" above;  
 Heel corn C 3:  
 Intertrigo C 3/><: see "skin wolf" above;  
 Itching, itchy skin, pruritus C 2:  
 burning, pain; Itching with C 2:  
 severe itching of the skin C 3: see below "unbearable itching of the skin";  
 Skin rash; itchy C 2:  
 Skin rash; Itchy skin without C 1: see "Itching" above;  
 body openings; Itching of the C 2:  
 liver problems; Itching with C 2:  
 unbearable itching skin C 3:  
 wandering itch C 2:  
 Coldness of the skin C 1:  
 Skin nodules, nodules, skin nodules, nodules under skin, papules, hardening in  
 places C 3:  
 Crusts C 3: see above "Skin rash, crusty eczema";  
 Leathery skin C 3: see "Thickening of the skin" below;  
 marbled skin C 2: see "color of skin, marbled" above;  
 Urticaria, hives C 2: see "Skin rash, hives" above;  
 Psoriasis C 3: see "Skin rash, psoriasis" above;  
 Cracks, skin cracks, rhagades C 3:  
 body openings; Cracks on C 3:  
 Skin pain C 1:  
 Swelling C 1:  
 Calluses C 3:  
 Scleroderma, skin hardening C 3:  
 Dryness of the skin C 1:  
 Overheating B 1: see "Fever, symptoms after fever";  
 Urticaria, hives C 2: see "Skin rash" above;  
 Thickening of the skin C 3:  
 Scratch; Skin thickens according to BC 3:  
 Adhesions of the skin BCA 3/><:  
 Warts in general C 3:  
 Molluscum contagiosum C 3:  
 moist warts C 3:  
 stalked warts C 3:

itchy warts C 3:  
 Condylomas, genital warts C 3:  
 - Condylomas painful C 3:  
 - painful warts C 3:  
 Growth BCA 3/><:  
 Soreness, soreness: see "skin wolf, intertrigo" above;  
 Cellulitis, orange peel C 3:

**\* GENERAL:**

- \* **Secretions, excretions:** Conflict of believing that one has been socially isolated but being not able to express one's excitement, so one can signal it only indirectly through secretions.
- \* **Abscess, tendency to suppuration** BCA 3/><: Problem of being exposed to a cross-border conflict, but not being able to resolve it, only being able to dissolve itself in order to be separated from the object of the conflict.
- \* **Autoimmune diseases:** feeling of being exposed to conditions that cannot be fulfilled but are being asked to fulfill them, thus not being able to resolve the conflict, only being able to resolve and attack oneself.
- \* **Blood vessels, circulation C 1:** Conflict, being exposed in his dynamics to social pressure to adapt, not being able to coordinate with it, and therefore being restricted or overwhelmed in his vitality.

- \* **Hypertension, high blood pressure, high blood pressure: Feeling of constantly being challenged in one's vitality, of having to be prepared to be exposed to constant pressure to adapt, distress or even threat.**
- \* **Hypotension, low blood pressure: Problem of being motivated to be vitally committed under the given social conditions.**
- \* **Bones C 1: If one's own principles and those in one's environment are incompatible, it means that one's inner and outer stability, which is based on social reciprocity, is in question.**
- \* **Childhood illnesses: BCA 3/><: Conflict of having to face one's own development, of having to grow up, of having to become independent, of having to adapt to increasing pressure to adapt.**
- \* **Cartilage C 1: Conflict of having gone beyond the scope of mutual understanding in its articulation and therefore not met with understanding but rather with harsh resistance.**
- \* **Epilepsy - Convulsions BCA 3/><: Conflict between not wanting to and having to submit to social conditions, neither giving in nor withdrawing and therefore only being able to fall into helpless cramps and faint.**
- \* **Lymph glands, lymph nodes BCA 3/><: Conflict, in social interaction with others, even for slight dissonances to think that one is rejected by the social environment, that one is socially worthless and not welcomed.**
- \* **Muscles, muscle problems, muscle problems C 1: Conflict, not being able to adapt to the surrounding conditions, not being able to find a suitable posture and therefore being socially not attuned**
- \* **Thyroid BCA 3/><: Conflict of always having to be careful with the expression of demands in order to be in resonance with the world, both present and free of conflict.**
- \* **Overactive thyroid, hyperthyroidism: Problem of not being in resonance with oneself and the world and therefore being always on guard or being called upon to be present through activity.**
- \* **Underactive thyroid, hypothyroidism: Problem of not being in resonance with oneself and the world, only suppressing one's demands, only being able to create the appearance of presence through being overweight.**
- \* **Slime C 1: Conflict, being exposed to an insoluble contradiction, neither evading it nor simply repressing it, being able to express the conflict only in the form of a viscous secretio**
- \* **Pain C 1: Conflict of not meeting the given conditions of acceptance, not being able to adapt to them despite efforts**
- \* **Food B 1: Conflict of getting involved with communicative partners, but being overwhelmed by dealing with their conditions of acceptance.**

- \* **Drinking B 1: Conflict with the dissolution of social relationships (drinking), i.e. on the one hand wanting to create emotional distance but on the other hand not wanting to distance oneself.**
- \* **Tumors BCA 3/><: Problem to pent-up excitement, because of being exposed to unmanageable social pressure to conform, neither giving up nor evading one's demands, therefore only being able to suppress one's displeasure to the point of hardening**
- \* **Cysts BCA 3/><: Conflict of suppressed resentment, not accepting the criteria of social acceptance, only being able to fulfill them externally, only in appearance**

## Code A, AB, AC

**emaciation:** avoids showing his physical presence unconditionally and so appearing weighty

children; Weight loss with BAC 3/><:

grief; Weight loss due to AC 3/<:

newborn; Emaciation, marasmus BAC 3/><:

Buttocks; Weight loss at BCA 3/><:

cravings; Weight loss with (weight loss despite sufficient food) BC 3/><:

**Overweight C 1:**

old people, after menopause; Overweight, obesity BCA 3/><:

children; Overweight, obesity from BCA 3/><:

**secretions**

involuntary secretions BAC 3/><:

. fright; involuntary secretions caused by BAC 3/><: loss of control

**Alcoholism A 3/<:** flees from a reality that seems to him to be inconvenient

Drug dependence BA 3/<:

**Addison's disease BCA 3/>:** see "Skin, color brown, hyperpigmentation, Addison's disease"

**Allergies BA 2/><**

floral scent; sensitive (allergy) BAC 2/><: exposed to sensual temptation but not to be worthy of it

Heat allergy, overheating BA 2/><: see "Skin, rashes, hives, heat causes hives";

Contact allergy BAC 2/><:

Cold allergy BA 2/><: see "Skin, rashes, urticaria, chills";

Perfume allergy BAC 2/><: exposed to sensual temptation but not to be worthy of it  
anaphylactic shock, allergic shock, joint, facial, eyelid, mouth swelling, etc. BAC 3/><:

**Allergies, allergy tendency BA 2/><:**

Antibiotic allergy BA 2/>< :

Aspirin allergy BA 2/>< :

Asthma allergic, allergy, allergy tendency + asthma BA 3/><:

Oyster and mussel allergy BA 2/>< :

Cream allergies BA 2/>< :

Fish allergy BA 2/>< : see below "Food, fish, fish aversion";

Meat allergy BA 2/>< : see below "Food, meat, rejection of meat";

House dust allergy BA 2/>< :

Hay fever, pollen allergy BA 2/>< : see "Nose, hay fever" and "Respiration, shortness of breath, hay asthma";

histamine allergy, histamines; Allergy to BA 2/>< :

Insect sting allergy BA 2/><:

Preservative BA 2/>< :  
 Metal allergies BA 2/>< :  
 Milk allergy BA 2/>< :  
 Shellfish allergy: see "Oyster allergy" above;  
 Nut allergy: see "Food, nuts, nut aversion" below;  
 edematous reactions: see below "water retention, edematous swellings";  
 Penicillin allergy, antibiotic allergy BA 2/>< : see "Antibiotic allergy" above;  
 plaster allergy; Allergy wound plaster BA 2/>< :  
 shellfish (mussels, crabs, etc.); Allergy according to BA 2/>< : see "Oyster allergy" above;  
 Mold allergy, mildew BA 2/>< :  
 Dust allergy BA 2/>< :  
 Animal hair allergy BA 2/>< :  
 Dog hair allergy BA 2/>< :  
 Cat hair allergy BA 2/>< : ;  
 Rabbit hair allergy BA 2/>< :  
 Horse allergy BA 2/>< :  
 Sun allergy BAC 2/>< :  
 Detergent allergy, cleaning agent allergy, soap allergy BA 2/>< :  
 Lemon allergy BA 2/>< : see below "Food, lemons, lemon aggravation";  
 Celiac disease, gluten allergy, gluten allergy BAC 3/>< :  
**Allergies - side effects:**  
 Cerebral edema, cerebral edema ABC 3/>< :  
 Laryngeal edema ABC 3/>< :  
 Knee swelling ABC 3/>< :  
**Age; Problems caused by: Children and the elderly: see "Mind, Age; problems caused by this; children/old people";**  
 Aging, old people BAC 3/>< :  
 aging; early, premature BAC 3/>< :  
Alternating mind and body symptoms CA 2/>< : see "Mind, Alternating";  
**Amputation neuralgia BAC 3/>< :** does not want to accept suddenly being out of touch in a functional area and without the possibility of coordination  
**Alcohol; Blood circulation problems caused by BAC 3/> :** refusal to let go of control  
Autoaggressive, autoimmune diseases BAC 3/>< : anorexia, multiple sclerosis, polio, stroke, cancer, lupus, colitis, ulcers, abscesses, etc.;  
**blood circulation:** vitality vs social confinement  
 moods, emotions, excitement; **Circulatory problems due to AC 2/< sudden, sporadic high pressure BAC 3/>< :** unknown shock situation?  
 speak; **Blood circulation worse due to AC 2/< :**  
**Bleeding after surgery BAC 3/>< :** injury shock  
**Injuries, blows, falls; Bleeding after BAC 3/>< :** injury shock  
 tooth extraction; **heavy bleeding after BAC 3/>< :**  
**Blood poisoning, sepsis BAC 3/>< :** is not prepared to adapt to a contradictory presence, arbitrariness, but contrary wants to destroy yourself  
 does not recover from septic infections, **convalescence BAC 3/>< :**  
 poisonous animals; **Bite wounds BAC 3/>< :**  
 Lyme disease BAC 3/>< : see below "Injuries, bite wounds, Lyme disease"

**infants; Complaints from BC 3:**

**Tumor on the head of newborns BAC 3/><:**

**Neuralgia BCA 3/><:** see “Pain” below;

**neurological complaints BCA 3/><:** to be more and more restricted, not to cause offense, only to be more and more resigned, to be able to give up

**yawning and sleepiness; neurological complaints with BCA 3/><:**

**Multiple sclerosis BCA 3/><:** see “neurological complaints” above;

**Parkinson's BCA 3/><:**

**Polio, polio BCA 3/><:** see “Paralysis, polio” above;

**Injury; neurological complaints after BAC 3/><:** injury shock

**Fainting A 3/><:** see “Mind, unconsciousness, fainting”;

**Pulse:** to keep the social beat, to be rhythmically attuned

**excitement, excitement; Pulse accelerated by AC 2/>:**

**Hysteria after loss of humor BA 3/><:**

**Apparent death A 3/><:** flees into a state between being here and giving up

**Sudden pain BCA 3/><:**

**sudden complaints, sudden, shooting, lightning-like BCA 3/><:**

**sudden symptoms BCA 3/><:**

**suddenly; Complaints appear and disappear BCA 3/><:**

**suddenly; Complaints appear gradually and disappear BCA 3/><:**

**suddenly and disappear gradually; Complaints appear BCA 3/><:**

**Amputation neuralgia, phantom pain BAC 3/><:** does not want to accept being suddenly out of touch in a functional area and without the possibility of coordination

**Excitement - hydrocephalus, with AC 3/><:**

**Excitement causes pain AC 2/><:**

**nerve injuries; Pain after BAC 3/><:**

**Painlessness of otherwise painful symptoms, insensitive to pain CA 3/><:** does not face the conflict, represses it

**suddenly wandering, jumping sensations CA 3/><:**

**fright; Pain caused by BAC 3/><:**

**voluptuous pain CA 1/>:** to bathe in a conflict situation and enjoy your own excitement

**Anger; Pain after AC 2/><:**

**Writing makes things worse A 1/><:** dreads having to commit to communicative norms,

**Weakness C 1:** being without success and therefore without motivation

**alcoholics; Weakness, tiredness with BAC 3/><:**

**Effort; Weakness, tiredness, exhaustion after mental AC 2/><:**

**Depression + weakness, fatigue AC 3/><:**

**Excitement; Weakness, fatigue after AC 2/><:**

**hysterical exhaustion, exhaustion AC 3/><:**

**coitus, loss of semen; Weakness, fatigue after ABC 2/>:**

**nursing; emotionally exhausted by BAC 3/><:**

**grief; Weakness, tiredness due to AC 2/><:**

**Read; Exhaustion, weakness due to AC 2/><:**

**nervous exhaustion, weakness, tiredness AC 2/><:**

**fainting-like exhaustion, fainting due to weakness, fatigue CA 3/><:**

**Sleep; Fatigue, sleep prolonged BC 2:**

**fright; Weakness, tiredness due to BAC 3/><:**

**Speaking, conversations causes weakness, tiredness AC 2/><:**

**Injury; Weakness, fatigue after BAC 3/><:**

**Anger; Exhaustion, weakness, tiredness due to AC 2/><:**

**Swelling C 1:** only being able to bottle up your excitement about negative circumstances

**Injury; Swelling after BAC 3/><:**

**Sepsis BAC 3/><:** see “Blood poisoning” above;

**Singing, laughing improves A 1/>:** wanting to hold back, but not being able to hold back, only being able to give in to one's emotional inner pressure involuntarily

**Laughter makes worse A 1/><:**

**Singing makes it worse A 1/><:**

**Singing improves A 1/>:**

**Speaking:** to connect communicatively or to engage in conflict

**Speaking improves symptoms AC 1/>:**

**Speaking aggravates, weakens AC 2/><:**

- Speaking worsens symptoms AC 1/<:  
 Sunstroke, heat stroke BAC 3/><:  
 Head reacts to sun BAC 3/><:  
 diving underwater; Complaints, anxiety, fear BA 1/>: not being able to let go of social connections without being let go  
 Fear, fear of submerging the head under water BA 1/>:  
 Desire to dive BA 1/><:  
Tumors BCA 3/><: unable to release his pent-up excitement, only able to suppress it to the point of hardening  
 Tumor after blow, injury, trauma BAC 3/><:  
Abdominal tumors BAC 3/><:  
Angioma, tumors of the blood vessels, vascular tumors BAC 3/><:  
blue discoloration of the overlying skin; Tumor with BAC 3/><:  
Ganglion BAC 3/><:  
Brain tumor BAC 3/><:  
Bone tumors BAC 3/><:  
scalp; Tumors on the BAC 3/><:  
eyelids; tumors: BAC 3/><  
Lipomas BAC 3/><:  
Neck lipoma BAC 3/><:  
Lipoma on the back BAC 3/><:  
Lymphangioma, tumor lymph glands BAC 3/><:  
Neurofibroma (growth of nerve connective tissue) BAC 3/><:  
thighs and genitals; Tumor between BAC 3/><:  
Polyyps in general BAC 3/><:  
Thyroid tumors BAC 3/><:  
toxic tumors, thyroid cancer BAC 3/><:  
cysts; Thyroid BAC 3/><:  
rock-hard, hard tumors BAC 3/><:  
Cysts BAC 3/><:  
Overleg BAC 3/><: see "Extremities – General, Exostoses";  
St. Vitus Dance, Chorea A 3/><: being emotionally unable to develop and only being able to create presence through involuntary movement discharges  
Poisonings BAC 3/ ><: being exposed to devastating insidiousness under the pretext of reciprocity  
 allopathic medications poisoning, abuse, drug poisoning BAC 3/><:  
 Antibiotic, penicillin abuse; Complaints caused by BAC 3/><:  
 Chemotherapy; Complaints caused by BAC 3/><:  
 cortisone; Complaints caused by cortisone BAC 3/><:  
 Food poisoning BAC /><3:  
 - Seafood and mussel poisoning BAC 3/><:  
 Digested sludge gas BAC 3/><:  
 Poisonous fumes BAC 3/><: see "poisonous gas" below;  
 Pill is not tolerated BAC 3/><:  
 - Pill + smoking incompatible, worsens BAC 3/><:  
 Mushroom poisoning BAC 3/><:  
 Mercury poisoning BAC 3/><:  
 Injuries – consequences of injuries, consequences of accidents in general BAC 3/ ><:  
 Impact, shock Accidental trauma: BAC 3/ ><: see "Accidental trauma" below;  
 Amputation neuralgia BAC 3/ ><: does not want to accept being suddenly out of touch in a functional area and without the possibility of coordination  
 Radiation consequences, X-ray therapy, radiation therapy BAC 3/ ><: being exposed to a compelling radiation to which one cannot adapt but can only give in or give up  
 Weakness due to radiation effects, X-ray therapy, radiation therapy BAC 3/><:  
 Bite wounds BAC 3/ ><: Shock, being exposed to cross-border aggression, hurtful force (teeth), not being respected as a presence

**poisonous snakes, snake bites; Bite wounds from BAC 3/><:**  
 - rattlesnakes; Bite wounds from BAC 3/><:  
 Be crazy; Bite wounds from BAC 3/><:  
 - tarantulas; Bite wounds from BAC 3/><:  
 rabid animals; Bite wounds BAC 3/><:  
**Lyme disease, Lyme disease BAC 3/><:** being surrounded by aggressive intrusiveness, feeling used, but only being able to get excited about it but not be able to defend yourself or withdraw  
**chronic injury consequence BAC 3/><:** shock consequence  
**festering wounds BAC 3/><:**  
**inflamed wounds BAC 3/><:**  
**Electrical accident BAC 3/><:**  
**Frostbite, chilblains BAC 3/><:** being exposed to complete non-commitment, not withdrawing, not adapting, only being able to fall into emotional paralysis  
**Foreign bodies, penetrated BAC 3/><:** see "splinter injury" below;  
**Mental illness after head injury, accident BAC 3/><:** see "Head, head injury";  
**Healing tendency, healing skin:**  
**slow healing tendency, wound healing slowly BAC 3/><:** being emotionally unsettled by a conflict situation, being able to find balance only slowly  
**every scratch becomes an ulcer BAC 3/><:**  
**unhealable wounds, lack of healing tendency; Wounds do not heal BAC 3/><:**  
**vaccinations; Complaints caused by BAC 3/><:** exposed to external influence, being asked to adapt, not being able to avoid it, only being able to react against it  
**Diphtheria vaccination BAC 3/><:**  
**Flu vaccination BAC 3/><:**  
**Whooping cough vaccination BAC 3/><:**  
**Measles vaccination BAC 3/><:**  
**Smallpox vaccination (also chickenpox) BAC 3/><:**  
 - Slimming of the arms after smallpox vaccination BAC 3/><:  
**Polio vaccination BAC 3/><:**  
**Rubella vaccination BAC 3/><:**  
**Tuberculosis vaccination BAC 3/><: (abrotanum);**  
**Insect bites BAC 3/><:** Exposed to intrusiveness but only being used, only being able to get excited but not be able to defend or withdraw from it  
**Abscesses after insect bites BAC 3/><:**  
**Bee stings BAC 3/><:**  
**Wasp stings BAC 3/><:**  
**Broken bone BAC 3/><:** exposed to incompatible environmental principles and therefore without the possibility of adapting (one's own principles).  
**brittle bones C 3/><:** see above  
**Bone healing slowly BAC 3/><:**  
**open bone fractures BAC 3/><:**  
**Convulsions, cramps after injury BAC 3/><:** Irritation, no longer able to regain social agreement after the shock of an injury  
**Cancer as a result of injury (bruising) BAC 3/><:** after an injury shock, it no longer returns to its social form and grows overgrown  
**Nerve pain after injury BAC 3/><:**  
**Neurological complaints after injury BAC 3/><:** Irritation, no longer able to regain social agreement after an injury shock  
**Convulsions after injury BAC 3/><:**  
**Consequences of the operation BAC 3/><:** not fitting in socially, i.e. one-sidedly adapted due to the intervention from outside, being restricted in one's individual presence,  
**Inflammation after surgery BAC 3/><:**  
**Vomit; postoperative BAC 3/><:**  
**Consequences of operation: Removal of ovaries BAC 3/><:**  
**Consequences of the operation: Removal of the uterus BAC 3/><:**

**Surgical shock BAC 3/ ><:**  
 - nervous shock state BAC 3/ ><:  
 Pain after surgery BAC 3/ ><:  
**Bruises BAC 3/ ><:**  
 Fingertip contusion BAC 3/ ><:  
 contusion, injury; Swelling of glands BAC 3/><:  
**Tear wounds BAC 3/ ><:** wanting to move, changing but at the same time being unable to do so, being held and therefore torn  
**painful wounds; Pain after injuries BAC 3/ ><:**  
**Cut wounds BAC 3/ ><:**  
**Shock consequences after injury BA 3/ ><: Accidental trauma**  
**Abrasions BAC 3/ ><:**  
**Swelling after injury BAC 3/ ><:** having been exposed to pent-up excitement, aggressive contradiction, unbearable pressure to conform, intolerance  
**Gunshot wounds BAC 3/ ><:**  
**Weakness, exhaustion as a result of injury BAC 3/ ><:** disappointment, having been exposed to intolerance, only being able to give in and therefore being without motivation  
**Tendon injury BAC 3/ ><:** being exposed to untenable conditions, being unable to create a social connection, having failed  
**Tendon rupture, tendon avulsion, rupture of the tendons BAC 3/ ><:**  
**Sepsis after wounds BAC 3/ ><:** to be exposed to a cross-border attack, unacceptable presence, arbitrariness, not to adapt under any circumstances, rather to want to destroy oneself  
**Splinter injury, slate BAC 3/ ><:**  
**Stab wounds BAC 3/ ><:**  
**Accidental trauma, shock, traumatic weakness, exhaustion, overstimulation after an accident (differentiated weakness due to pain) BA 3/ ><:** Injury shock  
**Blow, shock, accidental trauma BA 3/ ><:** disbelief, see above "Accidental trauma";  
**Combustion BAC 3/ ><:** cannot adapt to the blazing heat of a destructive force, cannot exist alongside it, can only dissolve in it  
**Complaints convalescence burns BAC 3/ ><:**  
**Blistering after burning BAC 3/ ><:** being shocked by the sudden heat, no longer reacting in a targeted manner, only being able to distance yourself emotionally by dissolving yourself at the point of contact  
**Eat Drink; Scalding, burns caused by hot BAC 3/ ><:**  
**extensive, severe burns BAC 3/ ><:** see "Burn" above;  
**Injuries, burns do not heal, burns that are difficult to heal,**  
**Hardening after injury BAC 3/ ><:** not being able to overcome a disappointment suffered (blow, injury), not being able to find the old composure, flexibility.  
**Dislocation, contortion BAC 3/><:** having been exposed to unsuitable conditions, unable to find a suitable posture and therefore can only over-twist his joints  
**slight dislocation BAC 3/><:**  
**Hip; slight dislocation of the BAC 3/><:**  
**kneecap; Dislocation BAC 3/><:**  
**Ankle; slight dislocation of the BAC 3/><:**  
**Sprain BAC 3/><:** conflicted with the conditions of not being accepted but being sprained  
**chronic sprain consequences BAC 3/><:**  
**Sprain wrist, ankle BAC 3/><:**  
**Soft tissue injury BAC 3 ><:** exposed to ruthless aggression in a sensitive area and exposed in his helplessness  
**lacerated wounds BAC 3/ ><:** see "lacerated wounds" above;  
**tearful, irritable after injury BA 3/ ><:**  
**Spinal injury BC 3:**  
**Coccyx trauma BAC 3/ ><:**  
**Wounds, injuries skin BAC 3/ ><:**  
**injuries; Adhesions according to BAC 3/><:**

**Scars have grown together, cannot be moved BAC 3/><:**  
**Dental treatment BAC 3/ ><:** see "Teeth, toothache, dental treatment";  
**Forceps birth, suction cup birth, cesarean section, premature birth (mother side) BAC 3 ><:**  
**Strain BAC 3/ ><:** to have experienced disconnection and separation instead of cohesion  
**Bruised BC 3/ ><:** see "Sprain" above;

**Trembling C 2:** fluctuates between wanting and not daring, action and resignation

**alcoholics; Trembling with ABC 3/<:**

**Fear; Trembling due to/after AC 2/><:**

**Excitement; Tremor with AC 2/><:** see "Excitement + Tremor" below;  
**has to be done; intention tremor; Shaking when something AC 2/<:**

**nervous trembling AC 2/><:** see above "excitement + trembling";

**fright; Tremor after BAC 3/><:**

**Accident; Tremors after BCA 3/><:**

**voluptuous sensations CA 2/>:** to bathe in a conflict situation and enjoy your own excitement

**Twitching C 2:** being emotionally charged, holding back your urge to act, only being able to discharge it in occasional involuntary outbursts

**Fall asleep; Twitching, jerking during BCA 2/><:**

**Awakening by twitching BCA 2/>:**

**Sleep with twitching, twitching, jerking of muscles, extremities in BC 2:**

**Diabetes BCA 3/><:** Problem with accepting unconditional care, closeness, relying on being worthy of care even without having achieved anything

**Diabetes, juvenile diabetes mellitus, adolescent diabetes type I BAC 3/><:**

**Diabetes, diabetes mellitus, adult diabetes, type II BAC 3/><:**

**Boils/gangrene in diabetes BAC 3/><:** see "Skin, boils" and "Skin, gangrene";

**Pregnancy; diabetes, diabetes in the; Pregnancy sugar BAC 3/><:**

**Grief + Diabetes BAC 3/<:**

**nervous origin; Diabetes, diabetes ABC 3/><:**

**Shock; Diabetes according to BAC 3/><:**

**Sugar urinary tract (diabetes insipidus) BCA 3/><:**

**Feelings of constriction when aroused AC 2/<:** being constricted by the social environment, not being allowed to expose oneself about anything, being allowed to be aroused without being questioned

**Dwarfism BAC 3/><:**

**Acromegaly, delayed growth of the ends of the body (pituitary disease) BAC 3/><:**

**climacteric change, menopause + hot flashes BAC 3/><:**

**Healing tendency BAC 3/><:** see "Injuries, healing tendency" below;

**Duvets, Blankets**

**Duvets are not tolerated (children) BA 1/><:**

**to move out (for children); Tendency to wear clothes even in the cold BA 3/><:**

**to expose, to undress; Request for A 1/<:**

**cramps:**

**childbirth; Cramps, convulsions in BCA 3/><:**

**Cramps, convulsions after childbirth, in the puerperium BCA 3/><:**

**Fever causes cramps, febrile cramps C 2:** see "Fever, cramps in";

**Birth; Convulsions of the newborn according to BCA 3/><:**

**Concussion; Convulsions caused by BCA 3/><:** see "Head trauma" below; cramps through";

**vaccinations; Cramps, convulsions according to BCA 3/><:**

**Convulsions, seizures BCA 3/><:**

**Drug sensitivity (to allopathic drugs) BCA 3/><:**

**medication abuse; Suppression of symptoms by BCA 3/><:**

**Quinine abuse, consequences of abuse of quinine BCA 3/><:**

**Painkiller; Consequences of misuse according to/with BCA 3/><:**  
**Loss of fluids (sweating, diarrhea, fever, blood loss) BCA 3/><:**

**Blood loss BCA 3/><:**

**weakness**

**old people; Weakness, fatigue with BAC 3/><:**

**childbirth; Weakness, fatigue after BAC 3/><:**

**medication; Weakness, fatigue caused by allopathic BAC 3/><:**

**Pregnancy; Weakness, tiredness, exhaustion in BAC 3/><:**

**Growth, weak, strong BAC 3/><:** see "Length growth" above;

**Growing pains BAC 3/><:** see "Extremities, growing pains";

**old people; Trembling BCA 3/><:**

**Age; Weight loss through BCA 3/><:**

**Writing paralysis of the hand BAC 3/><:**

**Pregnancy**

**Pregnancy; Dropsy BAC 3/><:**

**Pregnancy; Varicose veins in BAC 3/><:**

**painful varicose veins during pregnancy BAC 3/><:**

**Breastfeeding worsens BAC 3/><:**

**Breastfeeding weakens, weakness, fatigue of breastfeeding women BCA 3/><:**

**children; Weakness, fatigue with BAC 3/><:**

**Emaciation, losing weight BCA 3/><:**

**arms; Loss of BCA 3/><:**

**legs; Loss of BCA 3/><:**

**fingertips; Loss of BCA 3/><:**

**Buttocks; Emaciation at BCA 3/><:**

**Immune deficiency, immune deficiency BCA 3/><:** it is an emotional sensitivity

**Anemia, anemia BCA 3/><:**

**Blood loss, bleeding + anemia BCA 3/><:**

**Chlorosis (paleness caused by anemia, anemia) BCA 3/><:**

**hemolytic anemia (premature erythrocyte breakdown) BCA 3/><:**

**hypochromic anemia (hemoglobin formation in erythrocytes disturbed, erythrocyte count sufficient) BCA 3/><:**

**Pernicious anemia (erythrocytes do not mature due to reduced Vit B12 absorption due to gastric mucosal atrophy; sometimes aspirin) BCA 3/><:**

**Atrophy BCA 3/><:**

**Artery**

**Artery dilatation BCA 3/><:** see below "Bulge, aneurysm";

Cartilage tumor BAC 3/><:

Cartilage cancer BAC 3/><:

cramp

Flexor spasms, cramps, convulsions of the flexor muscles BCA 3/><:

Arms, legs bent spasmodically BCA 3/><:

clenched fist; Finger convulsive to BCA 3/><:

Thigh convulsively bent towards the lower leg BCA 3/><:

Unilateral spasms BCA 3/><:

one side cramps, the other is paralyzed BCA 3/><:

clonic (spasmodic twitching) convulsions BCA 3/><:

foaming at the mouth; Cramps with BCA 3/><:

Tetanus BAC 3/><: see below "tetanic lockjaw, lockjaw";

Lockjaw BCA 3/><: see "tetanic lockjaw, tetanic lockjaw" below;

extensor spasms; stretches limbs during cramps BCA 3/><:

tetanic rigidity, tetanus BCA 3/><:

tonic spasm (tonic = long-lasting contractions of strong intensity) BCA 3/><:

Paralysis BCA 3/><:

Diphtheria; Paralysis after BAC 3/><: :

Brain stroke, apoplexy (brain stroke, blood vessel burst); Paralysis after BAC 3/><:

Hemiplegia, hemiplegia C 3:

Hemiplegia, hemiplegia after apoplexy, stroke BAC 3/><:

Polio, poliomyelitis BAC 3/><: :

crippled limbs after polio BAC 3/><:

Muscle paralysis BCA 3/><:

flexor muscles; Paralysis of the (cannot bend, remains stretched) BCA 3/><:

extensor muscles; Paralysis of the (cannot stretch, remains bent) BCA 3/><:

- Hand fall, paralysis of the extensor muscles of the hands or forearms BCA 3/><

rheumatic paralysis BAC 3/><:

Spinal cord sclerosis + muscular atrophy, amyotrophic lateral sclerosis BAC 3/><:

spastic paralysis BAC 3/><:

spastic spinal paralysis BAC 3/><:

speech organs; Paralysis of BCA 3/><:

painful paralysis BCA 3/><:

thyroid

Hyperthyroidism, hyperthyroidism BCA 3/><:

Hypothyroidism, hypothyroidism BCA 3/><:

myxedema; edematous distention of the subcutaneous tissue BCA 3/><:

Thyroid tumor, thyroid swelling C 1:

**Hashimoto's thyroiditis (autoimmune hypothyroidism: accompanying muscle weakness, gastritis with tissue loss and pernicious anemia) BCA 3/><:**  
**Cretinism (short stature, intelligence deficit, hypothyroidism) BCA 3/><:**  
**Stroke, apoplexy (brain stroke, blood vessel burst) BCA 3/><:** see above "embolism"  
**Thromboses BCA 3/><:** see above "Blood vessels, thromboses";  
**Inguinal hernia BCA 3/><:** see "Abdomen";  
**Leukemia BAC 3/><:** see above "Cancer, blood cancer";  
**Lipoma BAC 3/><:** see "Tumor, Lipoma" below;  
**necrotic, spongy, decaying BAC 3/><:**  
**Organ relocation BCA 3/><:** see "Organ relocation" below;  
**Parkinson's BAC 3/><:** see "neurological complaints" above;  
**Poliomyelitis, polio BCA 3/><:** see "Paralysis, Polio";  
**progressive, progressive complaints BAC 3/><:**  
**Prolapse BAC 3/><:**  
**Scheuermann's disease BAC 3/><:** see "Back, Scheuermann's disease";  
 muscles

**Catalepsy (passive remaining in a given posture) BAC 3/><:**  
**Muscle wasting, muscle atrophy BCA 3/><:**  
**Muscular dystrophy (muscle nutritional disorder) BCA 3/><:**

#### Pain

**persistent pain BCA 3/><:**  
**unbearable, extreme pain conditions BCA 3/><:**

#### Weakness

**Shortness of breath accompanied by weakness, exhaustion, tiredness BCA 3/><:**  
**Fever; Weakness follows long-lasting BCA 3/><:**

#### Adhesions BAC 3/><:

**Eye, adhesions at BCA 3/><:** see "Eye, adhesions of the cornea";  
 see "Eye, adhesions of the eyelid to the eyeball";  
**abdominal cavity; Adhesions in BCA 3/><:**  
**chest cavity; Adhesions in BCA 3/><:**  
**hair; ingrown C 3:**  
**skin; BCA 3/>< adhesions:**  
**endometriosis: adhesions of internal (female) genitals BCA 3/><:**  
**ear, middle ear; Adhesions in BCA 3/><:**

#### Dropsy, internal and external:

**Ascites, liver congestion BCA 3/><:**  
**Thoracic dropsy, pulmonary congestion BCA 3/><:**  
**Hydrocele BAC 3/><:** see "Hydrocele" below;  
**Kidney disease + dropsy BCA 3/><:** see "Kidneys, kidney inflammation + dropsy";  
**Scarlet fever; Dropsy according to BCA 3/><:**  
**Hydrocele – hydrocele, testicular rupture BAC 3/><:** see "male genitalia; testicles, testicular rupture";  
**Hydrocephalus, hydrocephalus BCA 3/><:**  
**Hydrocephalus with long-lasting diarrhea BCA 3/><:**  
**blood sugar decreased; Hypoglycemia BCA 3/><:**  
**Cysts BAC 3/><:** see "Tumors, Cysts" above;

## Code B, BC

#### Secretions:

**improve; Secretions B 1:**  
**aggravate; Secretions B 1:**  
**Bleeding worsens, blood secretion, blood secretion worsens B 3:**  
**suppression of diseases, secretions; Consequences of BC 3:**  
**suppression of secretions; Consequences of BC 3:**

suppressed suppuration, fistulas, abscesses BC 3:  
washable; Period blood not BCA 3/><  
 Downward movement worsens BC 2:  
 Effort B 1: see "Body Modalities" below;  
 Applications physical, temperature applications B 1: see below "Temperature influences, atmospheric influences";  
 Warm applications - wrap baths:  
   Heat improves pain in general BC 1:  
   Heat worsens pain in general BC 1:  
   - Thermal radiation, worsened by a warm oven BC 2:  
 Cold applications – wraps, baths:  
   cold applications improve BC 1:  
   cold applications make BC 1 worse:  
 Warm application, warm baths:  
   better with warm applications BC 1:  
   aggravated by warm applications BC 1:  
 hot baths:  
   to bathe hot; Rejection BC 1:  
   to bathe hot; Request BC 1:  
 Work, physical B 1: see "Body modalities" below;  
 Breathe:  
Breathing worsens conditions, complaints BC 1:  
Breathing deeply, deep breathing impossible, causes discomfort BC 1:  
 atmospheric influences BC 1: see "temperature influences" below;  
 Straightening BC 1: see "Body Modalities" below;  
 Putting on BC 1: see "Body Modalities" below;  
 Excretions C 1: see "Excretions" above;  
 Bath, baths, Baden B 1:  
   Aversion to bathing BC 1:  
     to bathe hot; Rejection BC 1:  
     cold bathing; Dislike BC 1:  
   Desire to bathe B 1:  
     to take a hot bath, desire, improvement BC 1:  
     to bathe coldly; Desire, improvement BC 1:  
   Cold baths:  
     improves; cold bathing BC 1:  
     aggravated; cold bathing BC 1:  
   Warm baths:  
     improve; Warm baths B 1:  
     - hot baths better: see above "Desire to bathe, bathe hot";  
     aggravate; Warm baths BC 1:  
     sea improves; Swimming in BC 1:  
     sea aggravated; Swimming in BC 1:  
 Duvets, blankets:  
   Warmth of bed, duvets, warm blankets improve BC 1:  
 Bending, stooping BC 1: see "Body modalities" below;  
 Movement BC 1: see "Body Modalities" below;  
 Staring hard aggravated; Eye strain BC 1:  
 Circulation  
   Coffee; Circulation problems according to BC 2:  
   Menses; Varicose veins swell in the BAC 3/><  
   smoking, tobacco; Circulation problems according to BC 2:  
   Rest worsens circulatory problems BC 2: see below "General, pulse, rest worsens";  
   getting up from bending over; Circulation problems with BC 2:  
   Awakening; Circulatory problems, circulatory problems with BC 2:  
   Music; Blood circulation problems caused by AC 2/<:

Rest worsens circulatory problems BC 2:  
 warm weather; Circulatory problems BC 2:  
 exertion worsen; Bleeding caused by BC 3:  
 Circulatory sluggishness, tendency to congestion of blood C 2:

**Bleeding**  
 small wounds, wounds bleed profusely, bleeding tendency BAC 3/><: see "bleeder"  
 above;

**Hot flashes**  
at night; local heat, heat sensations BC 2:

**Bone**  
 X-rays; Bone softening according to BC 3:

**Creams for the skin BC 1:**

**Blanket, bed cover BC 1:**

**Soaking makes BC 1 worse:**

**Pressure BC 1: see below "Body modalities, posture and position modalities, posture  
 criteria";**

**Electricity; sensitive BC 1:**

**Food BC 1: see "Food symptoms, food" below;**

**Predisposition to colds BC 1: see below "Infections, susceptibility to colds";**

**Driving, being driven on the train, railway (passive) aggravates BC 1:**

**Drive, be driven; amel BC 1:**

**misstep; Coordination problems BC 1:**

**Humidity BC 1:**

**Walking BC 1: see "Body Modalities" below;**

**Clothing too tight, clothing tightness BC 1: see "clothing pressure" below;**

**Collar tightness BC 1: see "Clothing pressure";**

**Luxury and addictive substances: see "narcotics";**

**Alcohol BC 2:**  
 Alcohol, poorly tolerated BC 2:  
 Alcohol; Complaints caused by (small amounts) BC 2:

**Tobacco aggravates BC 1:**  
 Cough + tobacco BC 2: see "Cough, accompanying circumstances, smoking";  
 smell of tobacco; sensitive to the (zp) BA 1/>:  
 Smoke; Weakness after BC 2:  
 Smoking intolerant BC 1:  
 Smoking aggravates BC 1: see above "Intolerant to smoking";

**Coffee B 1: see "Food, Coffee" below;**

**Flu, influenza (perceived contagious process) BC 1:**  
Pain in limbs with flu BC 2: see "Fever, pain in limbs";  
 residual pain after flu BCA 3/><:

**Attitudes: see "Mind, Gestures";**

**Sensitive to any skin cream, including skin oils BC 2:**

**Heat: see above "Allergy, heat allergy";**  
 see "Weather conditions, hot weather" below;

**Hot flashes**  
at night; Hot flashes BC 2:

**Altitude improvement, mountains, mountains improve BC 1:**

**Altitude sickness caused by climbing, high altitudes, mountains, mountains worse BC  
 1:**

**Tendency to catch colds BC 2:**

**Seasons BC 1:**  
Spring problems BC 1:  
Summer problems in BC 1:  
Summer improves BC 1:  
Autumn problems BC 1:  
gloomy mood in autumn BA 2/<:

- Fog BC 1:**
- Autumn rain BC 1:** see below "Weather conditions, humidity, cold wet weather";
- Winter problems BC 1:**
- Improvement in winter BC 1:**
- Snow; Problems snowy weather, snowfall, snowing aggravated BC 1:**
- Cold BC 1:** see below "Temperature influences",  
see "Applications" above;
- Chewing aggravates BC 1:**
- Clothing pressure BC 1:** see above "Feelings, collar tightness BC 1";  
see below "Temperature influences, getting warm; Cover up";
- Clothing pressure aggravates BC 1:**
- Chest, clothing pressure aggravated BC 2:**
- Pants; Intolerance of BC 2:**
- Clothing printing improves BC 1**
- clothing too tight, feeling; Clothing tightness Bc 1:** see "clothing pressure" above;
- Collar width BC 1:**
- Air conditioning BC 1:**
- Body modalities, posture and positioning modalities, posture criteria BC 1:**
- Moving downwards, climbing stairs worsens BC 1:**
- Lean on: look for reliable support, back space;**  
**improves; Lean BC 1**  
**aggravated; Lean BC 1:**
- effort, activity; physical BC 1:**  
**improves; physical exertion (rest aggravated) BC 1:**  
**aggravated; physical exertion (rest improves) BC 1:**
- Worse at rest, worse at rest after previous exertion BC 1:**
- Lifting a load aggravates BC 1:**
- Straightening from bending over:**  
**improves; Straightening from bending down BC 1:**  
**aggravated; Straightening from bending down BC 1:**
- Standing up + bending over worsens:**
- Sitting up, standing up from lying down:**  
**Sitting down improves BC 1:**  
**Sitting up makes BC 1 worse:**
- Getting up from bed:**  
**improves; getting up from bed BC 1:**  
**aggravated; getting up from bed BC 1:**
- Getting up from sitting:**  
**improves; to get up from sitting BC 1:**  
**aggravated; to get up from sitting BC 1:**
- Lying down and getting up, changing position worsens BC 1:**
- Support:**  
**Support improves BC 1:**  
**Propping up makes BC 1 worse:**
- Occurrence, shock aggravates conditions, pain BC 1:**
- Bandaging, poultices:**  
**Bandaging improves BC 1:**  
**Bandaging aggravates, rebels against poultices BC 1:**
- Touching something:**  
**Touching something cold worsens BA 1/>:**  
**Cold aggravates, extremely cold; needs warm clothing BC 1:**
- Touching, being touched: instead of being touched, you are only exposed to intrusiveness, harassed, questioned, criticized, questioned**  
**Touch, pressure aggravated; light BC 1:**  
**Touch, pressure aggravates, hard improves; light BC 1:**
- Bending BC 1:** see "Bending" below;

see "Wrapping Up" below;

**Movement BC 1:**

Exercise improves BC 1:

continued exercise improves BC 1:

Moving the upper body back and forth improves BC 1:

Exercise aggravates BC 1:

rapid, rapid, sudden, violent movement aggravates BC 1:

**Stooping, bending forward, tilting BC 1:**

improves; Bending over, bending forward BC 1:

aggravated; Bending, bending, bending forward BC 1:

**Bending + straightening worsens BC 1:**

**Turning, turning over in bed BC 1:**

**Twisting, twisting, twisting your posture aggravates BC 1:**

bed aggravated; Turning, turning around in BC 1:

joint; Pain when twisting or turning BC 1:

head aggravated; Turning BC 1:

**Turning, twisting improves BC 1:**

**Pressure BC 1:**

improves conditions, pain; Pressure BC 1:

aggravates conditions, pain; Pressure BC 1:

Pressure on the painless side aggravates, increases pain BC 1:

Pressure on the painful side worsens = you lie on the painful part of the body BC 1:

**Shock BC 1:**

improves; Shock BC 1:

aggravated; Shock BC 1:

**Going BC 1:**

improves; Go BC 1:

continued walking improves (see exercise, continued exercise improves) BC 1:

bent over walking, bending over while walking improves BC 1:

walking slowly improves BC 1:

aggravated; Go BC 1:

**Hanging the limbs BC 1:**

arms mends; Leaving the BC 1 hanging down:

arms aggravated; Leaving the BC 1 hanging down:

legs improved; Leaving the BC 1 hanging down:

legs aggravated; Leaving the BC 1 hanging down:

limb improves; Leaving the BC 1 hanging:

limb aggravated; Leaving the BC 1 hanging:

back and forth; Movements, rolling, rocking from one side to the other BC 1:

to lie down; Request BC 1: see below "lying, lying down";

**Brackets BC 1: see "Mind, Brackets BA 3";**

Leaning, clinging aggravates BC 1:

Leaning, clinging improves BC 1:

**Knocking improves BC 1**

**Kneel, get on your knees BC 1: squat, pull your legs up;**

improves; Kneel, get on your knees BC 1:

aggravated; Kneel, get on your knees BC 1:

**Changes in position worsen BC 1:**

**Running, walking fast BC 1:**

Running, walking fast improves BC 1:

Running, walking fast aggravates BC 1:

**Lying BC 1:**

improves; Lying BC 1:

aggravated; Lying BC 1:

to lay down; Desire BC 1:

Lying down improves BC 1:

Lying down aggravated; after (if the complaint calms down again after lying down; if it doesn't calm down, it is "lying aggravated") BC 1:  
 Elevating extremities (legs) improves BC 1: see above "Lying down improves";  
 Page improves; Lying on painful BC 1:  
 side aggravated; Lying on painful BC 1:  
 - Pain goes to the side you are lying on BC 1:  
 - Pain goes to the side you are NOT lying on BC 1:

Lying down, changing position BC 1:  
 Change, change of position, change of position, lying down and getting up improves conditions, pain BC 1:  
 Change change in position, change in position lying down and getting up, worse; according to BC 1:

Grating BC 1:  
 Rubbing improves BC 1:  
 . gentle rubbing improves BC 1:  
 Rubbing aggravates BC 1:  
 . clothing aggravated; Rubbing the BC 2:

Rest BC 1: see above "Effort; physical";  
 Sitting BC 1:  
 improves; Sitting BC 1:  
 . Sitting upright improves BC 1:  
 . Sitting down improves BC 1:  
 . Sitting forward improves BC 1:  
 aggravated; Sitting BC 1:  
 . Sitting upright aggravates BC 1:  
 . Sitting down makes BC 1 worse  
 . Sitting cold worsens BC 1:  
 . Sitting forward aggravates BC 1:

Standing BC 1:  
 improves; Standing BC 1:  
 aggravated; Standing BC 1:

Climbing, climbing stairs BC 1:  
 improves; Climb BC 1:  
 aggravated; Climbing, climbing stairs BC 1:

Stretching BC 1:  
 improves; Stretch; Desire, tendency to stretch BC 1:  
 Stretches with yawning BC 1:  
 aggravated; Routes BC 1:  
 Cramps worsened by stretching the lower leg, stretching the limbs BC 1:  
 Fever; stretch out at CB 2:  
 paroxysms, sudden stretching cramps, cramp-like stretching BAC 3/><:

Dancing makes BC 1 worse:  
 Carrying, lifting a load BC 1:  
 Carrying, lifting a load aggravates BC 1:  
 Laying on top of each other, crossing the limbs makes BC 1 worse:  
 Laying on top of each other, crossing the links improves BC 1:  
 Curl up BC 1:  
 improves; Curl up BC 1:  
 aggravated; Curl up BC 1:

Body temperature:  
 frosty, lack of vital heat C 1:  
 undressing, undressing; sensitive BC 1: see below "Temperature influences, cooling";  
 frosty when exerting BC 2: see "Freezing due to physical overheating";  
 Warmth and covering do not improve; frosty, lack of vital warmth BC 1:

Cramps C 2:

Alcohol causes seizures BC 2:  
 Exertion causes cramps BC 2:  
 Touch causes cramps BC 2:  
 Movements cause cramps BC 2:  
cramping pain, cramping pain C 2:

paralysis

Effort; Paralysis according to BC 3:

Weather change from warm to wet and cold; Paralysis in BC 3:

Running BC 1: see "Body Modalities" above;

Lying BC 1: see "Body Modalities" above;

Air, open air BC 1: see below "Temperature influences, atmospheric influences";

Muscles

Effort; muscle pain after; Muscle soreness BC 2:

Sneeze:

Sneezing improves BC 2:

Sneezing worsens BC 2:

Periodicity BC 2: see "Times of day, periodicity" below;

Smoke aggravates BCA 3/><:

Reflexes: involuntary reactions;

increased reflexes BC 2/<:

decreased reflexes BC 2/>:

Closing your eyes:

Closing the eyes improves (opening the eyes worsens) BC 1:

Closing eyes worsens (opening eyes improves) BC 1:

Wearing shoes, pressure from shoes improves BC 1:

Wearing shoes, pressure on shoes difficult BCA 3/><:

noise, noise; Pain caused by BC 2:

weakness

In the morning; Weakness, exhaustion BC 2:

in the afternoon, after lunch; Weakness, fatigue BC 2:

Exertion improves fatigue, weakness BC 2:

Effort; Weakness, fatigue after physical activity:

exertion, overexertion, sport; Weakness after physical BC 2:

extremities after light physical exertion; Weakness of BC 2:

low physical exertion; Weakness after BC 2:

slightest movement; Weakness after BC 3:

eating aggravates weakness BC 2:

Lay; Weakness, fatigue during BC 2:

Menses, period weakness, tiredness afterwards / after BAC 3/><

Menses, rule; Weakness, tiredness before BAC 3/><:

Menses; Weakness, fatigue during BAC 3/><:

Milk; Weakness, fatigue after BC 2:

Swimming makes B 1 worse:

Sitting BC 1: see "Body Modalities" above;

Sun; Weakness in BC 2: see "General, Sun" below.

Bowel movement; Weakness, tiredness due to BC 2:

Sun; Relationship with:

Sun improves; Stay in BC 1:

Sun aggravates; Stay in BC 1:

Twilight aggravates BC 1:

sunrise to sunset; Complaints rise and fall, come

and go from BC 1:

Sunlight:

Sunlight improves BC 1

Staying in sunlight, in the heat of the sun aggravates BC 1:

Sunset; worse in the evening after BC 2:

**Solar heat worsens BC 1:**

**Sun causes weakness; Stay in BC 2:**

**Food and drinks:**

I will not go into the very extensive, individual food symptoms because their meaning is primarily what counts for the patient's understanding. You can find an overview of the meaning of the most important food symptoms in file B;

**Eating makes BC 1 worse**

**Eating improves BC 1:**

**Overeating aggravates BC 1:**

**warm food; requires or improves BC 1:**

. hot food; requires or it improves BC 1

. cooked meals; Request BC 1:

**warm food; reluctant BC 1:**

. hot food; reluctant BC 1:

. cooked meals; Rejection BC 1:

cold dishes; requires BC 1:

**cold foods make things worse BC 1:**

**Drink:**

**Drinks, cold:**

**cold drinks improve BC 1:**

**Craving cold drinks BC 1:**

**aggravate; cold drinks BC 1**

. cold drinks worsen when heated BC 1:

**Drinks, warm:**

**improve; warm drinks BC 1:**

. hot drinks, requires BC 1:

aggravate; warm drinks BC 1:

. hot drinks; reluctant BC 1:

**Dinner aggravates BC 1:**

**Alcohol craving BC 1/<:**

**Alcohol, poorly tolerated BC 1/>:**

**Alcohol; Complaints caused by (small amounts) BC 1/>:**

**Dust; sensitive to BC 1:**

**Dust; Cough due to BC 2:** see "Cough, accompanying circumstances, cough due to dust";

**Standing BC 1:** see "Body Modalities" above;

**times of day; aggravation to certain; Daily rhythm, time modalities:**

**morning BC 1:**

**awakening in the morning; worse with BC 1:**

- In the morning; Getting up worse; worse after getting up BC 1:

**better in the morning BC 1:**

- In the morning; Getting up improves; Better after getting up BC 1:

**worse in the morning and evening BC 1:**

**improves during the day: BC 1**

**worsens during the day BC 1:**

worse outdoor BC 1:

**worse during the day; over the course of the day, worse during the day BC 1:** see above "worse during the day";

**day and night BC 1:**

**morning BC 1:**

- **in the morning, better in the morning BC 1:**

**12 p.m., noon BC 1:**

**afternoon BC 1:**

**constantly believes it is the afternoon A 3: off, falls silent (stannum):**

**Twilight BC 1:** see "Sun" above;

**evening BC 1:**

- Bed, in bed after lying down in the evening Conditions worse BC 1:**  
**better in the evening BC 1:**  
**evening and night; worse BC 1:**  
**at night; Aggravation BC 1:**  
**Awakening; worse with BC 1**  
**Awakening; worse after BC 1:**  
**Lying down at BC 1:**  
**Lying in BC 1:**  
**better at night BC 1:**
- Times: the topic of arousal is indicated by the organ clock (organ meaning);**  
**12 a.m., midnight, midnight B 1:**  
**0-2: Bile (Yang) B 1: ;**  
**2 a.m.: Bile/Liver B 1:**  
**2-4: Liver (Yin) B 1:**  
**4 a.m.: Liver/Lung B 1:**  
**4-6: Lung (Yin) B 1:**  
**6 a.m. Lung/large intestine B 1:**  
**8-10: Stomach (Yang) B 1:**  
**10-12: Spleen, Pancreas (Yin) B 1:**  
**12-14: Heart (Yin) B 1:**  
**14-16: Small Intestine (Yang):**  
**16-18: Bubble (Yang) B 1:**  
**18-20: Kidney (Yin) B 1:**  
**20-22: Circulation, Sexuality Bb1:** Control of the relationship to the environment  
 (Yin):  
**22-24: Triple heater B 1:** functions of the respiratory, digestive, urogenital  
 taltractes; Control of the Self (Yang)
- Periodicity BC 2:**  
**every day at the same hour BC 2:**  
**weekly complaints BC 2:**
- Temperature influences, temperature modalities, atmospheric influences:**  
**Both heat and cold make things worse; both BC 1:**  
**Cooling down, getting cold, cold aggravates BC 1:**  
**Undressing, undressing aggravated; Cooling through BC 1:**  
**Heat, sweating aggravated; Cooling at BC 1:**  
**worse on hot day; Cooling down in the evening after (hot weather, cold night) BC 1:**  
**Getting wet, drenching aggravated; Cooling through BC 1:**  
**Temperature change from warm to cold worsens BC 3:**  
**wounds; Cooling down, getting cold, cold aggravates BC 1:**  
**Cooling, getting cold improved BC 1:**  
**Bare; Request for A 1/<:**  
**Temperature change from cold to warm worsens BC 1:**
- Moisture improves BC 1:**  
**Moisture aggravates BC 1:**  
**Damp rooms, vaults, basements make BC 1 worse:**  
**damp heat, humid weather, warm and humid:**  
**outdoors, in, open air BC 1:**  
**better outdoors BC 1:**  
 - outdoors; in the desire to stay outdoors, drafts aggravated: BC 1  
**worse outdoors BC 1:**  
**Walking outdoors, fresh air improves, makes conditions better BC 1:**  
**Walking outdoors, fresh air worsens, makes conditions worse BC 1:**  
**Windows and doors must be open; opens window BC 1:**
- Temperature change BC 1:**  
**warmth BC 1:**  
**warmth; Pain better with BC 1:**

warmth; Pain aggravated by BC 1:  
 warming up BC 1:  
   Getting warm improves BC 1:  
   Getting warm makes BC 1 worse:  
     warmth, covering, wrapping improves BC 1:  
     warmth, covering, wrapping aggravates BC 1:  
 Stiffness C 2:  
   In the morning; Stiffness BC 2:  
 Routes BC 1: see "Body modalities" above  
 to overdo, to lift, to take over, to overexert BC 1:  
   Overexertion, overexerting muscles and tendons: lifting, lifting, taking over, having  
   taken over BC 1:  
   lifting, lifting the back; light BC 1:  
 Vaccine prevention BC 1: Improve flexibility;  
 warmth B 1:  
 Dropsy  
   at night; Swelling, dropsy of the hands BC 2:  
 Weather conditions BC 1: Examination of temperament with social moods,  
 environmental conditions;  
   cloudy weather BC 1:  
   cloudy weather improves BC 1:  
   cloudy weather aggravates BC 1:  
   Humidity, wetness BC 1:  
   Wetness, moisture improves BC 1:  
   cold, wet weather, cold wet weather aggravates BC 1:  
   warm, humid weather, humidity worsens BC 1:  
   warm, humid weather improves BC 1:  
 Foehn BC 1: see below "South wind; warm";  
 Thunderstorm; Aggravation before or during BC 1:  
   before the thunderstorm BC 1:  
   during thunderstorm BC 1:  
     happy when there is thunder and lightning BA 2/><:  
     Storm worsens BC 1:  
 Hot weather, hot weather BC 1:  
 Cold weather b !: see "Dry, cold weather" below;  
 Fog BC 1:  
 Rain BC 1:  
   improves; Rain BC 1:  
   worsened, rain BC 1:  
     aggravated; heavy rain BC 1:  
 Snowmelt BC 1:  
 south wind; warm; Foehn BC 1:  
 dry weather BC 1:  
   improves; dry weather BC 1:  
   improves; dry, cold weather BC 1:  
   aggravated; dry weather BC 1:  
   Frosty, dry, cold weather worsens BC 1:  
 Weather change BC 1:  
   cold to warm; Weather change from BC 1:  
   warm to cold; Weather change from BC 1:  
 Wind: to be exposed to emotional non-commitment, arbitrariness, insignificance;  
   Wind aggravates BC 1:  
   Foehn, warm southerly wind worsens BC 1:  
   Wind aggravates; cold BC 1:  
   Desire to be in the wind BC 1:  
 Drafts make BC 1 worse:

wasting diseases BAC 3/><: see above “loss of juices”;  
 Times BC 1: see “Daily rhythm” above;  
 Room full of people worsens BC 1:  
 Tremble

In the morning; Tremor BC 2:

Effort; Trembling with BC 2:  
 Eat; Trembling extremities during/after BC 2/<:  
 Smoke; Trembling after BCA 3/><:

**Code C:** All C symptoms are considered an internal system process and should therefore be considered underlined.

Dead; diseased areas, parts look like they are dead BCA 3/><:

Type of secretions:

chronic secretions C 3:  
 thick secretion C 1:  
 moist, oozing; Secretions C 1:  
   flowing, watery, thin; Secretions C 1:  
 sticky secretions C 2:  
   lumpy, coagulated deposits C 3:  
 frothy; Secretions C 2:  
 - foamy; Saliva C 2:  
 mucous secretion, mucus C 2:  
 gush-like, cast-shaped secretion BCA 3/><:  
 smelly secretion C 3:  
 . fish brine; Secretions smell like C3:  
 . sour smelling secretion C 3:  
 involuntary secretions BCA 3/><  
 hardening secretions, drying, dried C 3:  
 sore-eating, caustic, acrid, burning, phagedenic; Secretion C 3:  
 tough, stringy secretions C 2:

Color of secretion:

bloody C 3:  
 purulent C 3;  
 yellow CA 1/>:  
 glassy C 1;  
 green CA 3/<:  
 black CA 3/>:  
 white CA 1/<  
 aqueous C 1:

abscess

breakthrough suppuration in abscesses; Expellant C 3:  
 delayed suppuration, abscesses, aqueous pustules that do not mature, break through C 3:

wounds; festering BCA 3/><:

- Foreign bodies, splinters, dead teeth, catheters, implants cause problems, abscesses BCA 3/><:

Fever due to abscesses C 3: see “Fever, septic fever”;

Fever; Abscesses with long-term C 3:

Fistulas C 3: see “Fistulas” below;

Joint abscesses C 3:

Buttocks, psoas muscle abscess C 3:

Bone abscesses, bone suppurations C 3:

Cartilage abscesses C 3:

Organs; Abscess internal C 3:

AIDS, HIV BAC 3/><:

and “kidneys, Addison’s disease”;

Activity: see “Body Modalities, Effort” below;

Drying out C 1: see “Dryness” below;

Blood vessels:

Cholesterol levels increased, cholesterolemia C 1:

throbbing blood vessels: see “pulse”;

carotid arteries; knocking the; Carotid hopping C 2:

temples; throbbing blood vessels of C 2:

Varicose veins C 3:

Spider veins, dilated veins, network under the skin C 3:

Legs; Varicose veins of C 3:

- lower leg; Varicose veins of C 3:

bleeding varicose veins C 3:

aching, painful varicose veins C 3:

- burst, burst; Varicose vein pain as if they were C 3:

Vein problems:

Phlebitis, phlebitis C 3:

Vein dilatation C 3: see “Varicose veins” above;

Vein pain C 1:

Blood circulation C 2:

Blood pressure:

low blood pressure, hypotension C 2:

- Blood rush C 2:

Blood values:

Iron deficiency, blood iron levels, iron levels in the blood too low C 1:

Erythrocyte count, number of red blood cells increased C 1:

potassium or sodium deficiency; Alkalosis C 3: see above "Iron deficiency";

Cholesterol C 1: see above “Blood vessels, cholesterol level increased”;

chronic complaints C 3:

Glandular problems C 1:

Gland inflammation C 3:

Swelling of glands C 1

painful; Swelling of glands C 1:

Suppurations C 3: see above “Secretion, excretions, pus, suppurations”;

Inflammation C 3:

Exhaustion, tiredness C 1: see “Weakness” below; see also “Mind, burn out”;

Obesity C 1: see “Overweight” below;

Fistulas general C 3:

Frosty, tends to freeze C 1: see “Body temperature, frosty” below;

Gangrenous ulcers C 3: see “Skin, gangrenous ulcers, gangrene”;

Feelings like, sensations as if, body feelings:

rising feeling from feet, legs, stomach, abdomen, aura extends upwards C 2/>:

Bandage feelings C 2: see below “Feelings of constriction”;

Burning, burning pain, heat in the body or internally if the skin is cold, hot on the inside, cold on the outside C 2:

electric current pain C 2:

electrical voltage; Feeling of inner CA 2/><:

Gurgling, bubbling feeling C 2:

Cold; Feeling of external C 1:

Cold; Feeling of external heat with internal heat C 2: see above “Burning throughout the body, with cold skin”;

Cold; Feeling inner C 1:

coldness in blood vessels; Feeling of C 1:

internal cold with external heat C 2:

Tickling, tickling, itching, itching internally general C 2:

boiling sensation C 2: see below “Pain; boiling”;

**Tingling C 2:****Jerks go through body C 2: see “nervous sensitivity”;****Vise feelings C 2:****Feelings of swelling C 1:****Feeling of heaviness C 1:****Feelings of tension C 2:****external feelings of tension C 2:****internal feelings of tension C 2:****joints; Feelings of tension C 2::****Muscles, muscles tension, feelings of tension C 2:****Knit rope feel around neck C 2:****constriction band feeling external, feeling band general, belt, bandage, bandage****feeling external, feeling bandaged C 2:****Thigh C 2:****Contraction, band feeling inside C 2:****Hair C 1: expression of independence; see also “head, hair”;****Hair loss BCA 3/><:****Skin cream:****back and forth C 2: see “Body modalities, back and forth” below;****Hypertension C 2: see “Blood circulation, blood pressure” above;****Hypotension C 2: see “Blood circulation, blood pressure” above;****Infection:****descending infection (runny nose followed by larynx and chest problems) C 2:****Ascending, upward migrating infection (cough followed by larynx and nasal problems), rises, spreads upwards C 2:****Ascending infection moving upwards from the nose (to the ear, frontal sinuses) C 2:****defensive position; weak C 3: see “weak defenses” above;****Bone****Pain in the bones, bone pain C 1:****Swelling of the bones, bone swelling C 1:****Overlegs, exostoses BCA 3/><: see “Extremities – General, Exostoses”****Feeling of cold in bones C 1:****Suppuration, bone suppuration C 3: see “Bone necrosis” below;****Inflammation, bone inflammation C 3:****Bone marrow inflammation BCA 3/><:****Softening, bone softening, bone curvature, rickets, bone tuberculosis BAC 3/><:****Bending, twisting limbs, joints: BAC 3/><****Fistulas, bone fistulas BAC 3/><:****Caries, bone caries, bone erosion BAC 3/><: see “necrosis, bone necrosis” below;****Bone cancer BAC 3/><:****Body odor C 1: see “Sweat, body odor”;****Side of body:****left side of body; Susceptibility of C 1:****right side of body; Vulnerability of C 1: problem, exposed to negative social conditions, negatively prejudiced against the environment;****hot-tempered, warm-blooded, local heat, heat sensations C 1:****Hot flashes C 1:****descending, extending downward hot flashes C 2:****ascending, upwardly extending hot flashes C 2:****palpitations; Hot flashes with C2:****feeling of cold, frost; Hot flashes alternating with C 2:****Sweat in the heat, hot flashes C 2:****Warm-blooded C 1: see above “hot-blooded, warm-blooded”;****contraction of muscles, tendons; Muscle contraction, tendon contraction C 3:****Convulsions BCA 3/><: see “Convulsions” below;**

**Varicose veins C 3:** see “Blood vessels” above;  
 extensor spasms; stretches limbs during cramps C 3:  
 tetanic rigidity, tetanus C 3:  
 tonic spasm (tonic = long-lasting contractions of strong intensity) BCA 3/><:  
**Scabies BCA 3/><:** see “Skin, scabies. Scabies”;  
 scratching aggravates BC 1:  
**Circuit C 2:** see “Blood” above;  
**circular, circular, ring-shaped, circles, rings C 2:**  
 lymph glands  
 lumps under the skin; Lymph glands like B 3:  
 Inflammation of the lymph glands, swelling of the lymph glands, swelling of the  
 lymph nodes,  
 Lymph node inflammation, lymphadenitis C 3: see “lymph glands” above;  
 Lymphatic vessel inflammation C 3: thematically like “lymph node  
 inflammation”: lymph gland cancer, lymphoma C 3:  
 stony hard lymph glands C 3:  
**Sea, sea air:**  
 Sea; better on BC 2:  
 Sea; worse on BC 2:  
**Spleen C 1:** see “Abdomen, Spleen”;  
**Malformations, disabled people BAC 3/><:**  
**Addison's disease BAC 3/><:** see “Addison's disease” above;  
**Boeck disease BAC 3/><:** see “BoecMorbus” above;  
**Crohn's disease BAC 3/><:** see “Intestinal: Crohn's disease”;  
**Cushing's disease BAC 3/><:** see “Cushing's disease” above;  
**Raynaud's disease BAC 3/><:** see “Extremities, hands, Raynaud's disease”;  
**Multiple sclerosis BAC 3/><:** see “neurological complaints” below;  
**Muscles**  
 contraction of muscles, tendons; Muscle contraction, tendon contraction C 2:  
 Inflammation; contraction of muscles, tendons; Muscle contraction, tendon  
 contraction after C 3:  
 Muscle pain C 1:  
 Muscle weakness C 1:  
 Muscle stiffness C 2:  
 lack of tone; physical lethargy, lack of tension, relaxation C 1:  
**Wetness BC 1:** see below “Weather conditions, humidity, wetness”:  
**Edema C 1:** see “dropsy” below;  
 see above “Allergies, edematic reactions”;  
**Opening the mouth worsens pain in the throat, also discomfort, pain jaw jointsC 2:**  
**Jaw joint C 2:**  
**Smallpox, Variola C 3:**  
 smallpox, variola; black C 3:  
**Pulse abnormal, problematic C 2**  
 accelerated pulse, pulse racing C 2:  
 intermittent, intermittent pulse C 2:  
 slow pulse C 2:  
 slower than heartbeat; Pulse C 2:  
 faster than heartbeat; Pulse C 2:  
 rigid, unchanged pulse, does not work with situation with C 2:  
 impalpable pulse C 2:  
 irregular pulse C 2:  
 slow and irregular pulse C 2:  
**Smoking BC 1:** see “Stimulants” above;  
**Traveling, driving (passive) aggravated; Complaints from BC 1:**  
**Rheumatism:**  
 Arthritis, joint rheumatism C 3:

**Bone rheumatism C 3:**  
**Muscular rheumatism, joint rheumatism C 3:**

**Jerking C 2:** see below "Types of pain, jerking pain"; Pull out;  
 see "Twitch" below;

**Mucus**

chronic; Secretions, mucus, mucous membrane secretions C 3 :  
 Inflammation, discomfort of the mucous membrane; Mucous membrane problems  
 catarrhal C 3:

**pain**

chronic or rheumatic pain C 3:  
 Gout pain C 3:  
 neuralgic pain C 3:  
 tearing apart; Pain tearing C 2:  
 Outside; Pain extends to C 2:  
 bursting pain C 2:  
 boring, stabbing pain, pain in small area C 1:  
 bubbling complaints C 2: see above "Feelings; fluttering, bubbling";  
 burning pain C 1:  
 pressing pain as if from a load C 1:  
 pressing pain from outside to inside C 2:  
 electric shock; Pain like C 3:  
 lightning-like pain CA 3:  
 exploding complaints BCA 3/><:  
 beaten; Pain as if broken into pieces, crushed, sore C 3:  
 throbbing pain C 2:  
 Inside; Pain extends to C 2:  
 Bones beaten, detached, scraped loose, scraped; Pain like flesh from C 3:  
 boiling, surging, seething pain C 2:  
 cramping pain C 2:  
 scratched; Pain like C 1:  
 throbbing pain; Pulsating C 2:  
 tearing pain C 1:  
 jerking pain C 2:  
 Tension pain C 2: see "Skin, sensations, feeling of tension";  
 Splinter pain C 3:  
 stabbing pain C 1:  
 Knife pain, stabbing, cutting as with a knife, dagger, knife stab, dagger thrusts  
 BCA 3/><:  
 writhing pain C 2:  
 broken, broken off; Pain C 3:  
 pulling pain C 1:  
**Pain of the nerves, nerve pain - neuralgia C 3:**  
 Loss of feeling, loss of sensitivity in neuralgia CA 3/<:  
 Pain; Numbness, numbness DURING or AFTER pain CA 3/<:  
 herpes zoster; Neuralgia, nerve pain after C 3:  
**Pain in the nerves – neuritis, nerve inflammation C 3:**  
 slow reaction, lack of reaction BCA 3/><:  
**Pain dynamics:**  
 radiating pain C 2:  
 radiating out on all sides; Pain extends to C2  
 Outside; Pain extends to C2  
 rear; Pain extends to C2  
 Inside; Pain extends to C2  
 above; Pain extends to (ascending) C 2:  
 below; Pain extends to (descending) C 2

**Legs; Dropsy C 1:**  
 feet and ankles; C 1 dropsy: pent-up excitement, unable to adapt to or detach from the location: see "dropsy" above;  
 Hands; C 1 dropsy:  
**Joint dropsy C 1:** see "Extremities - General, Joints, Joint dropsy";  
 edematic swelling C 3: see "Allergy" above;  
 saccular dropsy, edema C 3:  
**Tremor C 2:**  
 externally C2  
 internal C 2/:  
 Weakness; tremors from BCA 3/><;  
**Twitching, jerking C 2:**  
 Electricity; Twitching as caused by C 2:  
 Poor; Twitching, jerking of the C 2:  
 Legs; Twitch of C 2:  
 facial, facial twitching; Twitch of C 2:  
**Feelings of constriction C 2:**  
 Constriction of bones C 3:  
 Constriction of body openings, stricture C 2:
